## flotte

Enrich executive spaces with Flotte, a premium seating solution introduced in partnership with Okamura. Refined and elegant by design, Flotte befits private office suites, meeting spaces, and conference rooms. The chair's minimal, flowing silhouette echoes a philosophy of intention and rigor, in which every line serves a purpose. Its sculptural profile is bisected by a signature gap between the backrest and seat, creating an architectural lightness.

The high back chair's assertive form sits as a focal point of an executive office. The mid-back configuration provides a respectful welcome when lining the sides of a boardroom table. Upholstered in a selection of luxurious full grain leathers and performance alternatives, Flotte brings bespoke style and a distinctly elevated presence.

## tone SQ

Visually soft and minimalist, the Tone chair is designed to blend seamlessly with its setting. With the introduction of Tone SQ, the collection now offers two distinct geometries: The original rounded frame and a new rectilinear silhouette. This addition maintains Tone's hallmark comfort and expressive range of textile options. Two different mesh styles are available in an uplifting color palette. Exclusive to Tone, an innovative knit sleeve, adapted from the organic structure of a leaf, adds texture; while the Luum sleeve expands aesthetic choice.

### tone lumbar enhancement

For elevated comfort across the entire product line, all models of Tone and Tone SQ now offer a reengineered lumbar support. The redesigned central pad offers deeper, more supportive back contact. With a shallow sliding channel, the new lumbar pad delivers a smooth, integrated height adjustment.

## nuri

Nuri balances a light aesthetic with a strong feature set, elevating the standard for entry-level seating. Designed for the pace of an active workday, it offers smooth support and a clean, modern profile, reaching beyond utility to defy its accessible price point.

Nuri is available in Standard, Plus, and Pro configurations to meet all levels of preference. Whether configured as a streamlined essential or a fully equipped performance chair, Nuri remains stylish, responsive, and remarkably comfortable.

## quick shift pneumatic HA table

A simpler approach to sit-to-stand brings lower carbon, electricity-free movement and greater planning freedom. The Quick Shift Pneumatic Height Adjustable Table replaces motors and power cords with pneumatic cylinders to provide a smooth, assisted transition between sitting and standing. Because the pneumatic cylinders use compressed air to provide the lifting force, no electricity is required to raise or lower the work surface.

The result is a height adjustable table with a lower carbon footprint, both in its manufacture and its daily use. This simplicity also creates greater planning flexibility: Without the need for a power connection, tables can be placed wherever work is needed and freely repositioned as needs change. The collection integrates seamlessly with Teknion screens and accessories to create complete, flexible work settings.

## fabric study carrel

Elevate privacy and aesthetics in unison with Fabric Screens for height adjustable tables. Part of the Complements catalogue, these desk mounted screens outfit freestanding workstations with an enveloping yet open surround, putting up a soft buffer between the occupant and neighboring distractions. Available in L- and C-shaped configurations, the slim, fabric-wrapped screen can be customized in a range of textural or colorful textiles for a tailored look.

zones soft seating additions

Designed in partnership with Pearson Lloyd, Zones is a comprehensive series of furniture products that transforms the office, challenging convention and changing the way people experience work. New soft seating additions build upon this cultural shift, furthering Zones' support of workplaces that suit a variety of preferences and working habits while maintaining the family's consistent design language.

wrap chair & lounge chair

The Zones Wrap chairs are a sophisticated and sculptural extension of the Zones Soft Seating collection. Adopting a design language analogous to the Club Chair, each shares an organic, welcoming silhouette. The Wrap Chair is a highly versatile addition designed for guest and conference use. In ancillary environments, the Wrap Lounge Chair scales the form into a cocooning invitation for more relaxed postures.

crescent lounge arm chair

Drawing on the residential spirit and collaborative nature of the Zones collection, the Crescent Lounge Arm Chair is an exploration of comfort, form, and materiality. Its distinctive crescent backrest supports a range of lounging postures. The wood frame and plush upholstery emphasize material warmth and craftsmanship, with a familiar style that enhances ancillary spaces.

club chair, high back

The Zones Club Chair family expands with the introduction of a High Back model. Configurable with all original base designs—Wood Leg, 4-Prong, 5-Star, and 5-Star Stool—the High Back Club Chair continues the Zones collection's established aesthetic and material language. Prioritizing versatility, Club Chairs allow the flexibility to select multiple coordinating seating solutions across a floorplate.

## routes occasional tables

Routes departs from conventional contract furniture with a suite of boldly conceived products that encourage movement and interaction between people and their furniture. Designed in partnership with Pearson Lloyd, Routes' new suite of coffee, side and laptop tables expands on this dynamic spirit with a hospitality-driven approach. Routes Occasional Tables are designed to nest, layer, float, or move wherever they are needed. Available in a

varied collection of shapes, sizes, and refined or playful finishes—incorporating options for solid wood legs and elevated top surfaces in natural veneers, backpainted glass, and Grade 2 laminates—these tables add a beautiful and functional element to spaces where people think, meet and create.

LUUM TEXTILES

mix + match collection

Mix + Match by Dorothy Cozonas is a collection of six distinct but harmonious textiles crafted for timeless appeal and function. Striving to look beyond the familiar, Cozonas designed and developed various fundamental textile elements—a stripe, a plaid, a texture, and heathered solids—for a comprehensive interior solution. Individually, each material stands elegantly on its own. Combined, the collection offers attractive and useful materials that work seamlessly together.

Through careful attention to detail, Mix + Match delivers fresh, forward-looking twists on patterns, thoughtful textures and dynamic color palettes, highlighting Luum's ongoing commitment to good, meaningful and sustainable design.

STUDIO TK  
drayton

Designed by Studio TK, Drayton is a cohesive collection of soft seating that performs across workplace, hospitality, and transitional environments. Modern and refined, Drayton's luxe contemporary aesthetic belies its accessible, price-competitive position. Comprised of a lounge chair, settee, and sofa, the family shares a cohesive language of clean lines, inviting proportions, and fully upholstered legs that creates a unified, sculptural silhouette. For added warmth and material expression, optional wood arm panels and wood legs enhance the level of craft and detail.

harbour hybrid storage,  
seating & tables

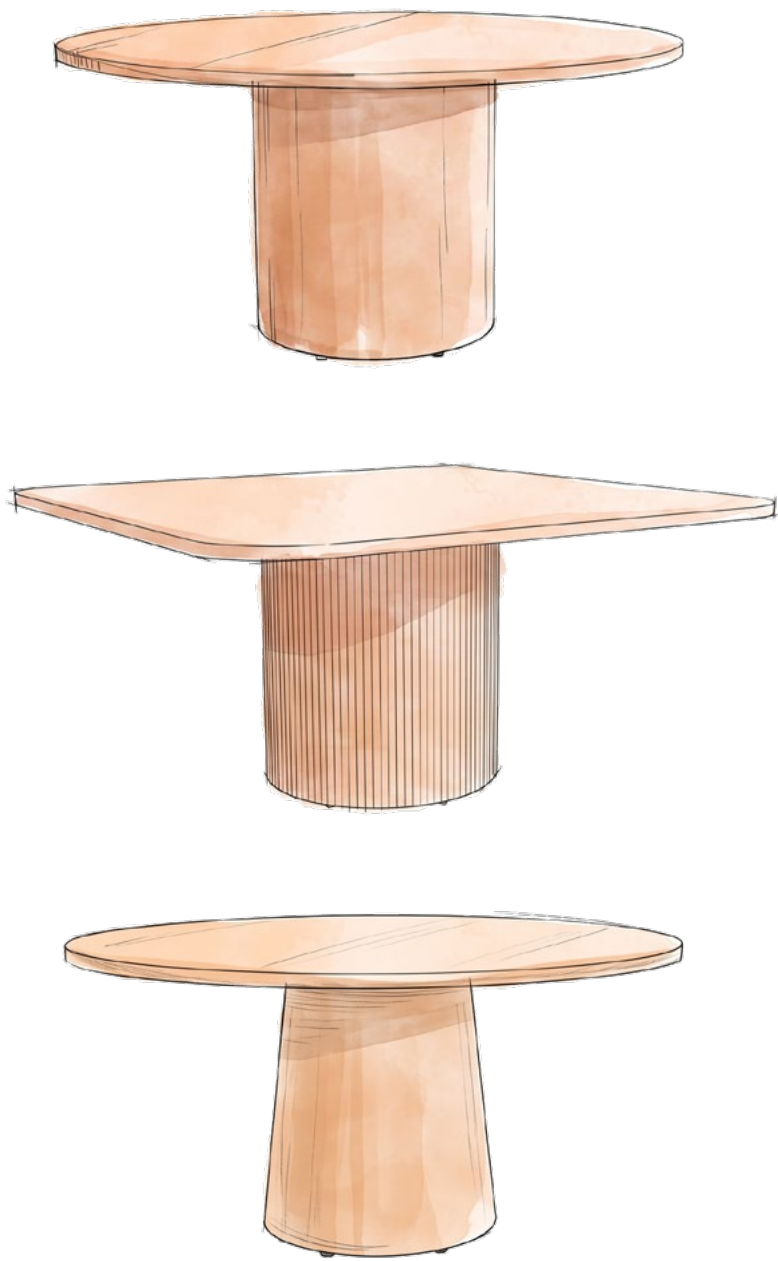

In a world where the workday moves as swiftly as it does fluidly, Harbour offers a moment of stillness. Thoughtfully designed by Alyssa Coletti, Harbour endeavors to create a sense of belonging for the hybrid professional who is untethered, agile, and always in motion. Harbour's multi-purpose pieces incorporate modular seating, storage, and work surfaces. From standalone credenzas to fully equipped storage hubs, Harbour attunes to the worker's individual rhythm, whether in-office for a few hours or staying all day. Integrated storage cubbies, locked or unlocked, provide a place to stow away essentials and step into focus.

Harbour is more than furniture. It's a flexible, inclusive, and welcoming extension of work life: A quiet corner. A jumping-off point. A personal harbor in a shared world.

africa upholstered  
armchair & lounge

Designed by Eugeni Quitllet and in partnership with Vondom, the Africa collection expands with an armchair and a lounge, featuring an upholstered seat to better support the way people live and gather across indoor and outdoor spaces. Balanced proportions and an inviting, sculpted form create ease while maintaining a clean silhouette. Durable materials and refined detailing ensure lasting performance. These additions extend interior comfort and design sensibility across hospitality and workplace environments with a residential warmth.

## series 48

A new family within the Custom Wood portfolio, Series 48 centers on the simple archetype of the drum base table. This tight collection of wood meeting tables is concise in its breadth, yet endlessly versatile. Series 48 tables are designed to enhance the private office suite or facilitate conversations in meeting spaces and open areas. The collection provides a clean and refined aesthetic, acting as a gathering point for face-to-face touch points and connections. Whether a smooth cylinder, tambour style, or tapered drum, all base styles discreetly manage electrical solutions for accessible and functional connectivity.

Series 48 is named in reference to the production house where these tables are made (located on 48<sup>th</sup> Street SE in Calgary) as a nod to the people and place that deliver this level of quality and craftsmanship.
