

drayton

drayton product information

Designed by Studio TK, Drayton brings a modern aesthetic to the current seating portfolio while staying accessible and price-competitive. Created to meet the growing demand for contemporary, soft-surface seating that performs across workplace, hospitality, and transitional environments, the collection offers a cohesive family of a lounge chair, settee, and sofa. Each piece features clean lines and inviting proportions to create a unified sculptural silhouette.

For added warmth and material expression, optional wood panels on the arm and leg are available at an upcharge, allowing clients to tailor the level of craft and detail to their project needs.
