beauty in simplicity

With the ever-evolving nature of workspace, Expansion® CityBench is adaptable, flexible and reconfigurable. It empowers personalization with its aesthetics and simple application.

This modern easy-to-use system offers endless variations of workstations to suit any form of work setting or office environment, whether it is for a collaborative space, co-working space or a private workstation.

Expansion CityBench is a new approach for collaborative teams to control and adapt their space as needed with integrated components in different finishes.

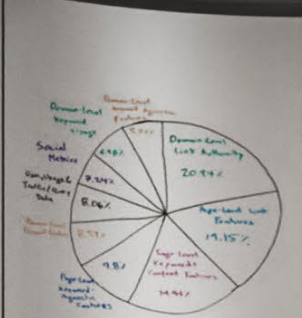

optimised for benching

As part of the Expansion Cityline family of desking systems, Expansion CityBench offers a myriad of solutions for increased worker interaction.

Versatile components allow adaptation for both open plan and private workstations, as well as impromptu spaces. It can be reconfigured from two-cluster to six-cluster benching.

- Some Big Takeaways
- 1) Completely contained by domain's history on single domain's factor
 - 2) Links are still a little shared both at the page and domain level
 - 3) Broad-related Personalization metrics are on the rise
 - 4) Social is still perceived to have a higher impact (despite the high correlations)
 - 5) Personalized search domain metrics continue to be more in general impact (and that's a good thing)

07

dynamic application
Outfitting meeting rooms with Expansion
CityBench can ignite productivity in a
workplace and foster an enhanced work
dynamic.

space delineation

Expansion CityBench is also available single-sided, providing a sense of privacy to facilitate focused work while enabling collaboration in more open spaces.
