Clean lines. Complete finish options. Power-ready. Height adjustable options. From cafés to meeting rooms, Audience offers a cost-effective solution for every space, designed with intention.

Audience is a comprehensive table collection created to meet the diverse needs of modern workspaces. Designed with a clean, simple aesthetic, Audience offers a quiet, architectural presence that complements a wide range of environments—from casual cafés and collaborative gathering spaces to formal meeting rooms.

Engineered with value in mind, Audience delivers not only thoughtful design and robust functionality, but also height adjustability and embedded power options. Audience is more than a table—It's a collection designed to adapt, connect, and perform wherever people gather.

casual tables

Audience Casual tables span lounge, dining and cafe applications, with sizing, heights, and specifications to suit a variety of postures. Thoughtful details such as bag hooks, height adjustability, and optional electrics extend the tables' accessibility and comfort.

casual tables – lounge

Lounge tables create a comfortable and functional space. They are designed to complement relaxed seating, encouraging informal conversation and collaboration. Their lower height makes them ideal for holding drinks, books or devices.

Audience's first-to-market lounge-to-task height adjustable table rises from 18" to 26.5" in surface height, supporting relaxed and focused activities. Its task-to-standing counterpart (26" to 42") adds standing postures to the mix, inviting playful arrangements across the floorplate.

08

#### casual tables - dining

Dining height tables in an office create a familiar, comfortable atmosphere. Their traditional height is ideal for sustained team meetings, focused project work, or as a group lunch spot, offering a versatile alternative to formal conference

rooms. At their lower 26" height, they invite long conversation and casual connections surrounded by soft seating such as pull-up ottomans and communal benching. Pedestal bases engineered to accept power routing enhance productivity.

#### casual tables - cafe

Cafe tables in bar, counter, and task heights maximize both functionality and style. These tables provide the flexibility to serve as a informal dining spot, a quick meeting hub, or a comfortable standing workstation. Surface mounted electric

can be fitted into task height tables, while bar and counter height tables support undermount power modules.

meeting tables

Meeting tables are available in five work surface shapes appropriate for focused teamwork or broad discussions: Circular, Square, Rounded Square, Rectangular, and Rounded Rectangle. Choose from Fixed Post or Stretch legs, with either levelers or casters for flexible mobility.

aesthetics, anywhere

Every space. Every task. Every style. At home in both enclosed meeting rooms and collaborative open spaces, Audience Meeting Tables have a minimalist presence that doesn't skim on performance. With options for mobility and power integration, Audience supports any task without compromising on design.

power

Recognizing the importance of technology in today's workplaces, Audience integrates a variety of power solutions that can be routed into both casual pedestal base tables and four legged

meeting tables. Surface-mounted (recessed or flush) and below-surface options ensure users stay connected, without compromising the table's refined appearance.
