APPLICATION GUIDE 19

PRICE & PRODUCT GUIDE. 95

what is journal

Journal is a unique line of casegoods that promotes the not-so private office that is made for one, used by five.

These layered and more fluid spaces can accommodate varied levels of interaction to create new ways of planning.

designer

To design Journal, Teknion joined forces with Christopher Wright from Figure3.

Chris's experience encompasses workplace, retail, banking and hospitality architectural interiors.

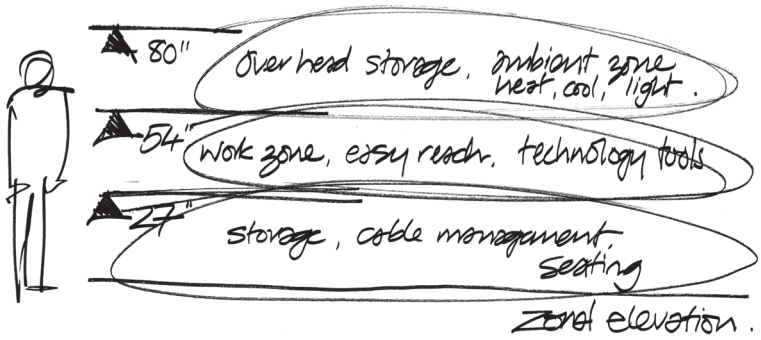

Journal reflects the depth and breadth of Mr. Wright's knowledge. In particular it reflects his insights into the evolving workplace and activity-based planning possibilities.

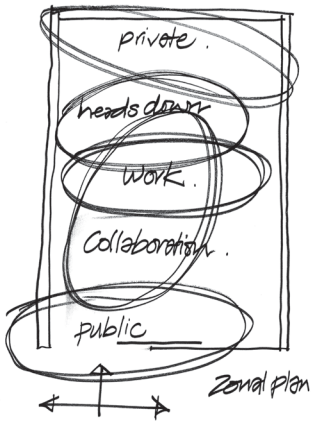

work zones

Journal is inspired by the low, mid and high-rise structures of the urban skyline and the lively ambiance of mixed use in the city streets.

Journal includes low elevation credenzas, worksurfaces at the mid-touch zone, and "high-rise" shelves and cabinets.

Along the horizontal plane these elements create zones designated as personal/private, collaborative and public – with over-lapping activity zones that create a context for the continual ebb and flow of work.

made for one, used by five

In the modern workplace where one must create smarter spaces that do more with less, Journal offers a singular advantage to maximize the use of real estate.

Journal is simple and scalable. It makes it easy to construct a private office that provides everything a person needs to get work done without a distraction, yet accommodates and engages guests when desired.

Journal loosens the formality of the private office, while retaining user choice and control.

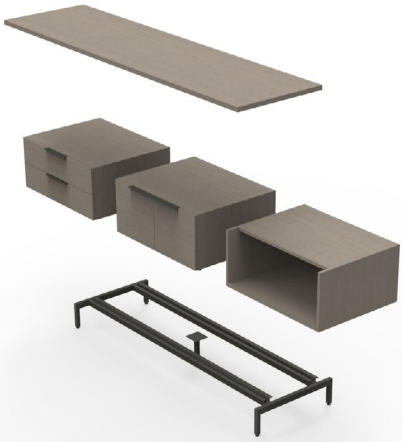

unique features

Journal offers unique features not often found in traditional casegoods lines that range from contemporary to traditional. There are a variety of options for credenzas, desks and storage.

planning with configurable credenza closed & open storage

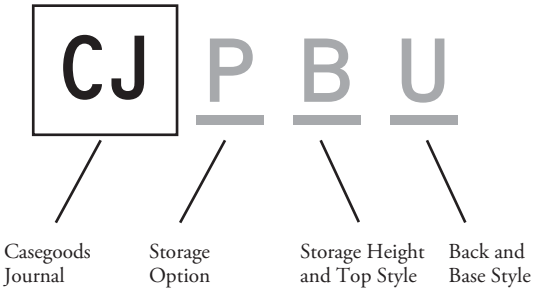

The following should be considered when planning with configurable credenzas.

coding

Credenza coding is structured to describe the following:
- Storage type
- Storage height
- Overall case height

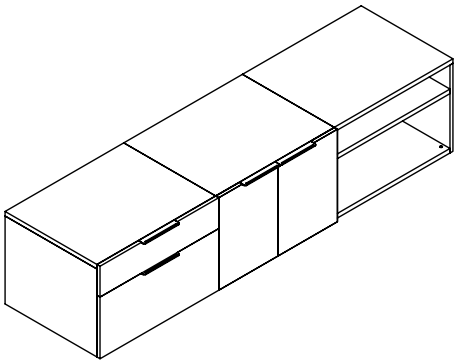

This is helpful in determining how to group similar products.

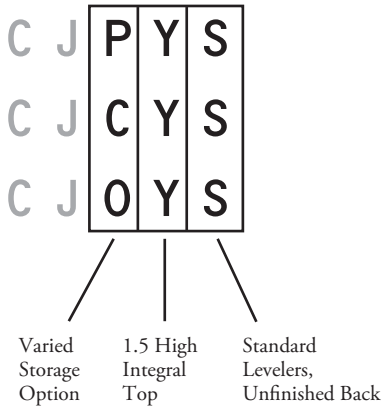

Example: CJPBU = Pedestal, Unfinished Top, 1.5 High, Elevated by base: Unfinished back

Example:
- Storage heights and top styles are equal
- Back and base style are equal
- Only the storage options vary

This indicates that these components can be grouped into the same configuration.

Storage Option Codes:

(**C**) Closed

(**O**) Open

(**P**) Pedestal

- (**1H,B**) Box/Box
- (**1.5H,B**) Box/File
- (**2H,B**) Box/Box/File
- (**1H,F**) File
- (**2H,F**) File/File

Storage Height Codes

Unfinished Top (Requires top to be ordered separately)

- (**A**) 1 High
- (**B**) 1.5 High
- (**C**) 2 High

Integrated Top

- (**X**) 1 High
- (**Y**) 1.5 High
- (**Z**) 2 High

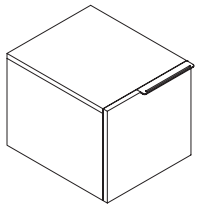

Back and Base Codes

- (**S**) Standard Levelers, Unfinished Back
- (**F**) Standard Levelers, Finished Back
- (**A**) Standard Levelers, Electrical Access to Back (Open and closed storage only)
- (**W**) Elevated: Wall-Mounted (Open and closed storage only, available in 20" depth only)
- (**M**) Elevated: Wall-Mounted Electrical Access Back (Open and closed storage only, available in 20" depth only)
- (**U**) Elevated by Base: Unfinished Back (Base ordered separately)
- (**B**) Elevated by Base: Finished Back (Base ordered separately)
- (**E**) Elevated by Base: Electrical Access Back (Open and closed storage only, base ordered separately)

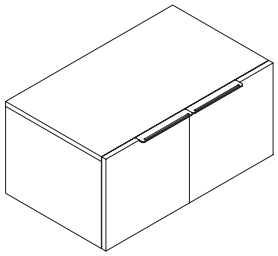

planning with configurable credenza closed & open storage (continued)

wall-mounting

- 1 High and 1.5 High Open and Closed credenzas can be mounted to a wall
- Pedestals **cannot** be mounted to a wall
- Cabinets specified with the wall-mounted option will be notched to allow for a mounting bracket
- Notched units are handed, the handedness is determined by the location of the notch when viewed from the front

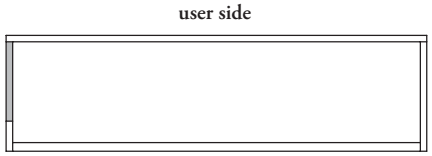

Note: Proper Blocking is required for wall-mounting and will vary depending on wall construction.

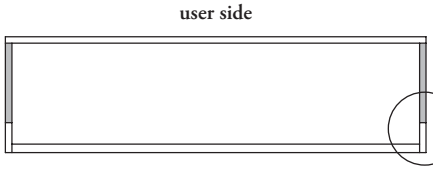

No notch on back side used when no cabinets are mounted on either side

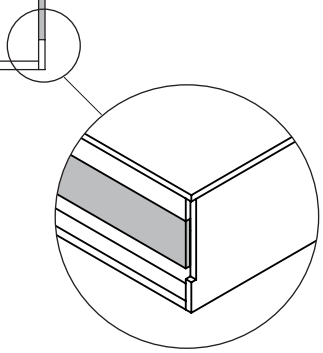

Left notch on back side used when a second cabinet is being mounted on the left side

Right notch on back side used when a second cabinet is being mounted on the right side

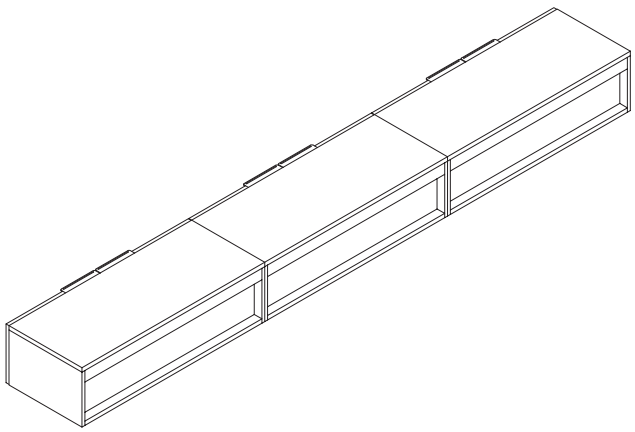

Both notches on back side used when additional cabinets are being mounted on both sides

Wall Cleat fits inside of the notch

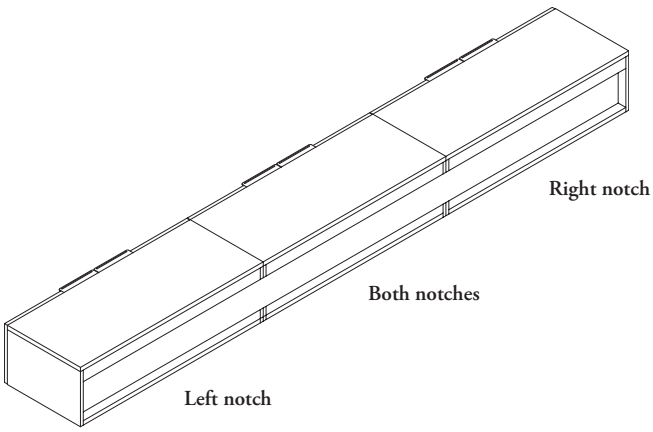

Storage Cabinets with the wall-mounted option will include one individual wall cleat.

- Each cabinet can be mounted individually

For ease of installation and alignment with wall studs, the Wall Rail, Wood (CJXW) can be used.

- This provides one continuous cleat across the back of all units in a configuration
- All units must have a notch to accommodate the cleat

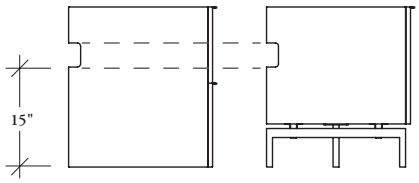

planning electrical for configurable credenzas

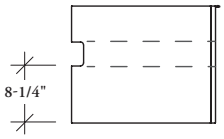

The following should be considered when planning with electrical for configurable credenzas.

• Up to four storage units can be used on one base

Credenza Base (CJSB)

spacer – support bracket

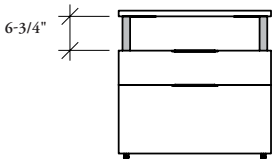

Spacers are used on the following configurations:

• Between a 1 High credenza and a credenza top

• Between a 1.5 High credenza and a credenza top

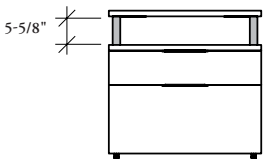

• Between a 1.5 High credenza elevated by a base and a credenza top

Spacers are available in various heights
• 5 5/8" for finished tops
• 6 3/4" for integral tops

Integral Top

Spacers can be placed on a unit either
• Left
• Right
• Centered

Spacer configuration to create an elevated worksurface
• Both spacers face inward over the storage unit

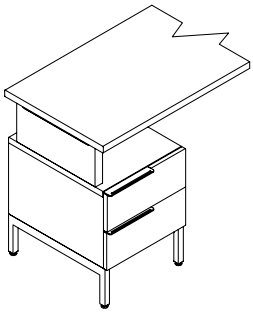

Spacer configuration to create an open knee space
• Spacer faces inward over the storage unit and one faces outward over the knee space

planning with configurable credenza supports (continued)

spacer depths

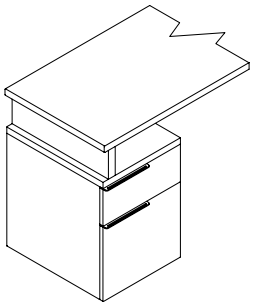

Spacers are available 16", 20" and 24" deep.

Integral Top

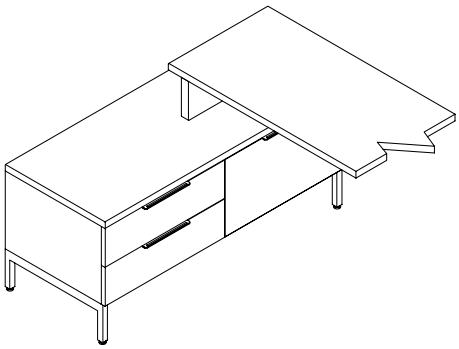

When used along the depth of a storage unit
- Spacer must be one size smaller to avoid the spacer overlapping the drawer front

Finished Top or Unfinished Top

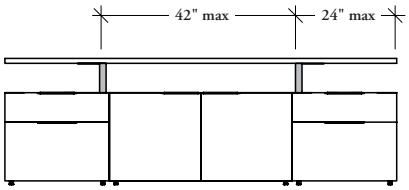

When used along the depth of a storage unit
- Spacer can be the same depth
- 6" less than the storage depth
- Mounts to the credenza top and will not interfere with the door/drawer front

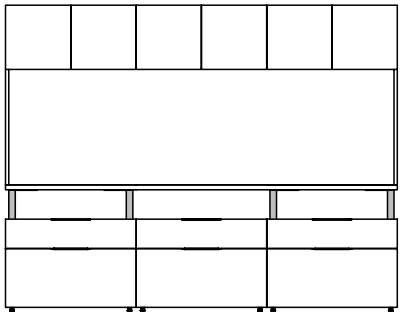

When used along the width or parallel to the unit
- Spacer depth will match either the case depth or the credenza top depth
- Can be flush or inset

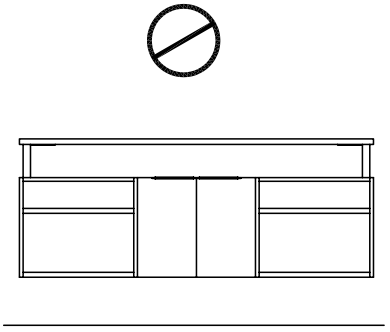

elevated worksurfaces

- Elevated credenza tops do **not** require vertical load transfer, spacers do **not** have to be on the ends of cabinets
- The maximum span between two spacers **cannot** exceed 42"
- Maximum overhang beyond spacers is 24"

When a vertical load transfer is required, the spacers must be placed over the gables of credenza units.

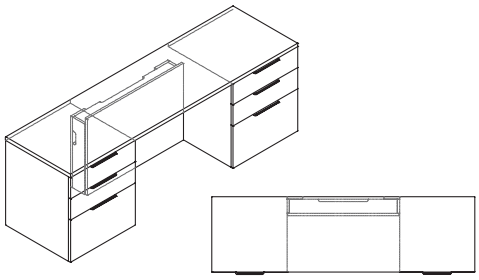

Credenza tops and spacers **cannot** be used on wall-mounted storage.

When a Pivot Bench is used adjacent to another storage unit, both need to be the same height

- The bench pivots 6" over the adjacent storage

If 1.5 High storage is required with a 1 High Pivot Bench, there must be a 1 High storage unit between the two units to allow the bench to pivot

Stacking Storage can be used in

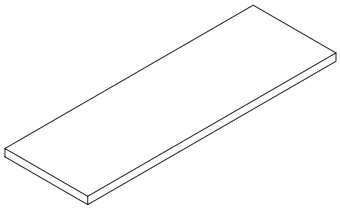

- Back to Back applications
  - there will be sufficient space for the bench to pivot
- Side to Side applications
  - the stacker must be 6" from the end of the cabinet to allow the bench to pivot

planning with wall mount storage

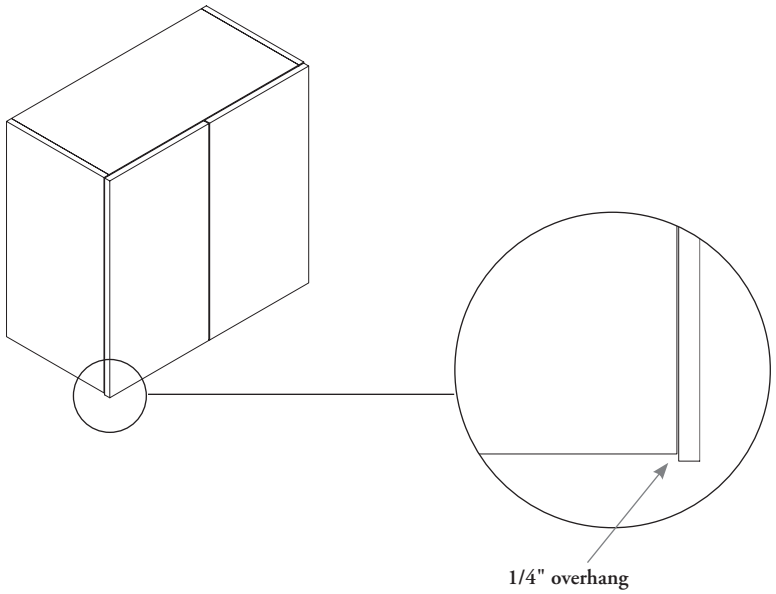

Journal provides options for wall-mounted storage.

The following demonstrates the recommended datum heights that overhead storage should be mounted at.

doors

Wall-mounted storage doors do **not** have handles, the door extends 1/4" below the bottom of the cabinet to act as an edge pull.

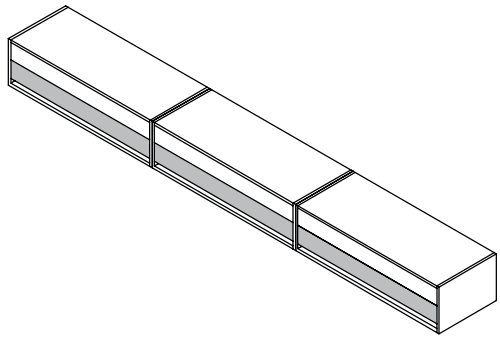

planning with wall mount storage (continued)

The following should be considered when planning with wall-mounted storage.

backs

Backs are unfinished

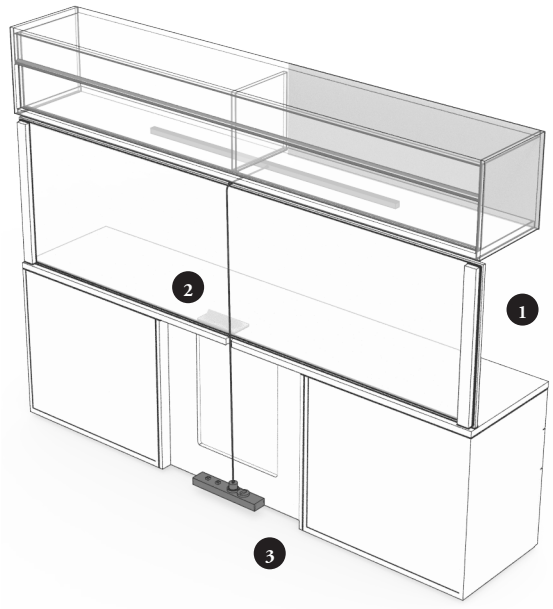

- A 5/8" recess accommodates the "cleats" that anchor units to a wall
- Proper blocking in the wall is required to support wall mounted storage

cable routing for light with valance

When specifying a light with valance option, the following should be considered for the cable routing.

1. A Wall Panel Under Wall Mounted Storage must be specified to allow clearance for the light cable to route behind it. A standard Wall Panel will not work in this application
2. The Credenza Top must have a notch or scallop to allow the electrical to pass through
3. In open knee space applications, a Power Trunk or Power Truck with End Gable should be specified to allow access to the wall receptacle
4. For preconfigured credenza applications, the storage unit should have an electrical access back to allow access to the wall receptacle

Notch, shown

Large Scallop, shown

hutch basics

Journal hutches mount above credenzas and provide an alternative aesthetic to wall-mounted storage.

planning with hutches

The following should be considered when planning with hutches.

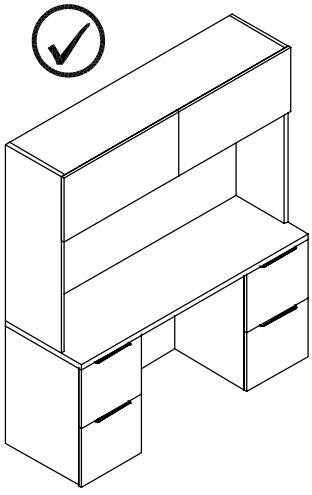

doors

Hutch doors do **not** have handles, the door extends 1/4" down from the bottom of the cabinet to act as an edge pull

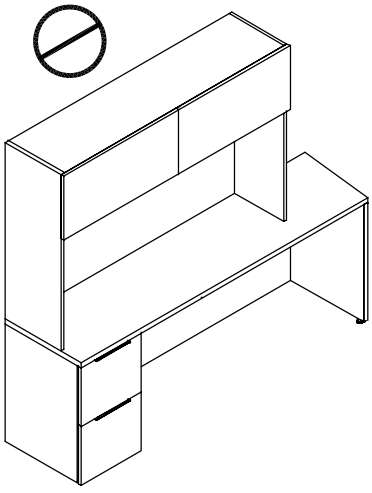

- Nominal depth is 14"
- Actual depth is 15-5/8" which includes the door depth

hutch placement

Both end gables of the hutch must sit over a storage unit to carry the load.

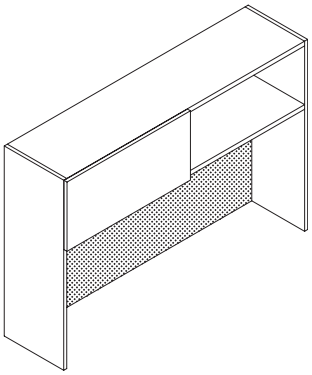

A knee space is possible in the middle where there is no load.

Hutches **cannot** sit over an open knee space on either end.

S O K L
Set of Keys Alike

WHAT'S INCLUDED
Each set of cores include a lock & core and 2 identical keys.

NOTES
All storage furniture is shipped with the lock housing pre-installed in each unit ready to receive the required lock plug cores. Based on the product option, lock cores and keys are shipped either numbered randomly or in "keyed-alike" sets. Quantity of lock cores and keys will match the quantities required for the locking components on the order.

SPECIFICATION NOTES
Count the number of locking components in each workstation. Enter the number of locks into the Quantity column, and then assign a SET to each quantity.

Office Number	Quantity	Set #	Set Total
T1	5	SOKL - 4	2
T2	3	SOKL - 2	2
T3	5	SOKL - 4	2
T4	4	SOKL - 3	2

Total the number of SOKL (Sets of Keys Alike) quantities and transfer each total quantity to your Purchase Order.

Sets ordered in the incorrect quantities that are required for the order may result in the order being placed on hold.

Verify the quantity by reviewing the plan carefully to ensure that all products with locks have been identified. Remember that some products may have more than one lock core per unit based on size and configuration.

For further details on how to specify locks, see the *Teknion Lock Specification Guide* on our website.
