

LUUM

Care for Leather Upholstery

Leather provides luxury performance, ages with grace, and withstands the test of time. Our leathers were carefully chosen to be chrome free and are semi-aniline. Proper care and maintenance is key to a long lifespan. With semi-aniline leather, leather makers slightly buff the leather surface to remove more significant blemishes like insect bites, giving it a smoother, more even surface while still maintaining unique character.

General Care + Maintenance

- Protect leather from direct sunlight, sources of heat and sharp objects.
- Clean leather regularly with a damp cloth.
- Clean gently using a circular motion and a very mild soap solution.
- Avoid saturating the leather with liquid.
- Never rub vigorously in one location.
- Dry and polish the leather with a dry cloth.
- Do not use cleaning agents containing solvents such as alcohol and benzene.
- Always test all cleaning agents in an inconspicuous area first.

Consult your nearest professional cleaning service with experience in leather cleaning in the case of heavy soiling.

Improper use of cleaners/disinfectants can expedite a product failure and void warranty.
