reference guide

II.24.2025

A photograph of a modern office interior. Two women are seated at a long, white, minimalist table. The woman on the left is blonde and wearing a grey top, looking down at a laptop. The woman on the right is Black with dark hair in a braid, wearing a grey top, also looking at a laptop. They are both working. The table is supported by a dark wood structure. In the foreground, several dark wood stools with grey upholstered seats are visible. The background shows a large window with a view of a city skyline. The floor is made of light-colored tiles.

what is community table

what is community table

Designed for Teknion by Michael Vanderbyl, the Community Table is a model of simple, straightforward design, with substantial proportions to act as a focus for the space. It is an architectural anchor that invites people to gather and indulge in deeper social and work interactions.

Access to power/data is transparent, provided via a central trough. The finishes and dimensions of the table can be customized to meet clients' exact requirements. Minimal and yet warm, this well-crafted wood table is ideal for the new human-centered workplace, one that references the domestic environment; one that is informal and collaborative.

A model of simple design, that is about people.
