

tekunion architectural interiors

elevating workspaces

In today's evolving workplace, walls are more than partitions—they shape how people engage with space. Behind their clean exteriors is a fusion of design thinking and purposeful engineering.

At Teknion Architectural Interiors, we design wall systems, acoustic enhancements, and micro-architecture environments that elevate the space. We continue to push the boundaries of performance while maintaining elegance in design.

solte

dynamic versatility

Altos is a versatile demountable wall system that combines a non-unitized universal framing system with solid, glass and smart fascia elements to create dynamic workspaces.

Product: Altos

optos

seamlessly adaptable

Optos provides the visual aesthetics of a butt-glazed storefront wall system, with an industry leading leveling range due to it's mechanical adjustments at both the base and ceiling. The perfect blend of aesthetic and function.

Product: Optos

tek vue

minimalist sophistication

Tek Vue is a minimalist glass office-front system, combining a sleek, single-glazed design with ultra-slim profiles. It offers a perfect balance of functionality and aesthetic appeal, featuring lightweight framing and innovative engineering for easy installation and material efficiency.

focus

acoustic elegance

Focus delivers a comprehensive range of acoustic performance with a refined, European aesthetic. It offers single and double-glazed glass configurations engineered to maximize acoustic performance, combined with matching wall and door pairings for visual and acoustic continuity.

within

a space within a space

Within utilizes a post-and-beam structure to create versatile spaces for collaboration, privacy, and lounging and more. It integrates solid and glass panels for sound insulation, and includes bar-height work surfaces and power/data outlets to boost productivity. Customizable baffles and louvers also enhance acoustics while maintaining a collaborative atmosphere.

pod

defined privacy and comfort

Designed for modern workspaces, the POD family offers on-demand privacy and comfort for both individual focus and collaboration. It includes **Tek Booth** for short-duration single-user privacy, **Tek Work** for longer sessions, and **Tek Room** for small group work—each designed to integrate seamlessly, whether individually or as a cluster within the space. Its freestanding design enables easy relocation independent from building architecture.

eugin

coming soon / winter '26

Ligna draws on the timeless appeal of wood and brings refined aesthetics and adaptable space division to interior architecture through a modular millwork framework. With a mix of louvers, shelving, glass or solid panels, passthroughs, and end units, Ligna offers a toolkit to configure spaces that are as functional as they are beautiful.

architectural complements

functional aesthetics

Architectural Complements enhances Teknion Architectural Interiors with functional and aesthetic elements that integrate seamlessly into existing wall systems. This curated program offers acoustic panels for improved sound absorption, markerboards for collaboration, and mullions that add sleek design to glass partitions.
