teknion

update summary

Please be advised that information has been updated within the upStage Price & Application Guide. To highlight these updates, a summary has been created for your reference.

revised

Price increase has been incorporated.

First orders for new products will be accepted on November 24, 2025. All software will also be updated by November 24, 2025. If you have any questions regarding the information enclosed, contact your Teknion Customer Service Representative.

APPLICATION GUIDE 23

PRICE & PRODUCT GUIDE. 239

inspiration

upStage is a furniture based system consisting of worksurfaces, storage, screens and accessories that drop into place and fit together. It is supported by a stage that houses power/data.

real furniture A truly unique structural solution, the staging unit integrates a full complement of desks, height-adjustable tables, cabinets, shelves, cubbies and screens and serves as a conduit for electrics. Every element simply moves into place and fits together, offering innumerable combinations and fresh design concepts for a dynamic and collaborative workplace.

creative freedom A rich material vocabulary gives designers an opportunity to be original and bold; to use color and texture to create a more varied and more inspiring work environment. upStage offers a myriad of options, including textiles and wood veneer, translucent and back-painted glass, perforated metal and a range of beautiful metal finishes.

user choices Offering an array of versatile furniture pieces, upStage gives users the ability to tailor the layout and configuration of their own workspace, the position and height of desks, cabinets, cubbies and screens. Equally, teams can create the workspace that works best for their project, moving tables and desks around and adjusting the level of privacy. As priorities change, upStage adapts.

what is upstage

components and features

stage

- The stage and simple Stage is the support structure for workstation configurations. Height-Adjustable Tables can be integrated into a Height-Adjustable Power Modules allowing the Leg of the table to be concealed, giving it a clean and integrated look. It can also be placed adjacent to the Stage
- The Stage incorporates Navigate Height Adjustable tables in a variety of configurations:
 - Both legs exposed
 - One leg concealed
 - Two legs concealed

electrics

- Stage power can be accessed along the stage with Flexible Power Modules or on the worksurface with Access Doors or Rectangular Grommets
- Simple stage power is in fixed locations, it is accessed by a power box

components and features

upstage storage

- upStage storage options include Hutch Stackers, Credenzas, Bookcases, Hinged Door Stackers, Lateral Storage, Lockers and Cubby Lockers to provide a unique workstation landscape

district storage

- upStage can also accommodate all 16" deep District Storage Stackers including the Systems Stacker Bookshelf (*see District Storage Application Guide*)

screens

- A wide range of screens define space and offer varied degrees of visual privacy and functionality
- Functional Screens mount to the stage on and off-module and are available tackable, solid, metal, with accessory rail or whiteboard
- Glass add-on screens can be added to the Functional Screens to create height and a greater sense of enclosure
- Casual Screens are available as Desk Edge (Glass and Solid, Infinity and Framed), Stage Mounted or Lateral Screen in glass, tackable or solid

meeting tables

- Freestanding tables featuring Y-Legs
- Y-Legs are available in two finish options:
 - Wood and Metal
 - Metal and Metal

what is upstage

planning with upstage

upStage provides the functionality and flexibility of a panel system, but reinterprets how components are planned to give a real furniture look. The same criteria is met and provides new and exciting furniture layouts.

criteria: overhead & rethinking panels

panel system

upstage

spine planning

- 1 Back to back storage cabinets mount into the Stage
- 2 Casual glass screen mounted to the stage provide translucent space division
- 3 Worksurfaces mount to the stage
- 4 Elevated credenzas and stage credenzas provide shared or individual storage and can be placed beside or below the stage to create more open space in the workstation
- 5 Open cubbies in stackers and credenzas provide storage and provide a light and airy feel to a workstation
- 6 Cushion can be placed on elevated storage stages to provide guest seating
- 7 Accessories are designed to fit into cubbies to provide storage for small items

planning with upstage (continued)

criteria: adding light & rethinking storage

storage spine

- 0 Storage Spine
- 1 Hinged door Storage
- 2 Open Storage
- 3 Casual Screens
- 4 Mounted Worksurface
- 5 Tackable Surface
- 6 File Storage

upstage

- 0 The stage provides support for storage worksurfaces and routes power through a workstation
- 1 Unique locker formats allow for hinged storage
- 2 Cubbies provide open storage for small items
- 3 Casual screens mount to worksurfaces to provide privacy
- 4 Worksurfaces mount to hutches to allow for "Zero footprint" planning
- 5 Hutches can accommodate tackboards or they can mount to the back of stacking storage or lockers
- 6 File storage is provided with file drawers and accessories

upstage assets

Teknion offers a variety of assets to help better understand upStage and all that it can do.

understanding stages

The Stage provides a spine for workstation configurations. It routes power and data and provides support for storage and worksurfaces.

standard stage

Available with flexible electrics to provide maximum flexibility in a workstation

simple stage

Provides a more economical solution for a stage when flexible electrics are not required

- Electrical is in fixed locations
- Can be linked to the standard stage

understanding stages (continued)

standard stage

The standard stage consists of the following components:

- 1 Stage Surface for supporting worksurfaces, storage and hutches
- 2 Accessory Beam (optional) for mounting screens
- 3 Rail Cover (optional) for covering the exposed sections of the Accessory Beam
- 4 Data/Communication Cut Out to accept voice/Data Faceplates with a size of 2.71" x 1.38" (69mm x 35mm)
- 5 Cables management clips providing cable weight to both the exterior and interior of the stage Structure
- 6 Flip Down door for canaling power and data cord
- 7 Power Rail to support Flexible power Module
- 8 End Gable for supporting the ends of a stage
- 9 Infeed Grommet (optional) for routing harnesses
- 10 Levelers for leveling the stage (+2" -2")

simple stage

The simple stage consists of the following components:

- 1 Stage Surface for supporting worksurfaces, storage and hutches
- 2 Accessory Beam (optional) for mounting screens
- 3 Rail Cover (optional) for covering the exposed sections of the Accessory Beam
- 4 Data/Communication Cut-Out to accept voice/Data Faceplates with a size of 2.71" x 1.38" (69mm x 35mm)
- 5 End Gable for supporting the ends of a stage
- 6 Infeed Grommet (optional) for routing harnesses
- 7 Levelers (+2" -2")

standard stage basics

Beginning, Middle and Finish Stages are combined to create workstation spines. Complete Stages are used for single stage applications when combining with the Stage Module for Height-Adjustable Tables.

- Provides a base structure to support worksurfaces, storage and screens and to route power and data
- Widths: 48" - 96" in 6" increments
- Height: 21"
- Depth: 16"
- Optional Accessory Beam available
- Single or Double Sided Power and Data is accessed through flip down doors
- Single Sided electrics should only be used in applications where the stage is up against the wall. When Single Sided is placed in a corridor application, Stage hardware will be visible

Stage Finishes:
Source Laminate, Flintwood and Natural Veneer
Metal Finishes:
Foundation, Mica and Accent colors

Beginning Stage (HTBB)

- Includes one End Gable and one Mid Gable
- Infeed Grommet available for exterior base feed or power pole entrance

Middle Stage (HTBM)

- Includes one Mid Gable

Finish Stage (HTBF)

- Includes one End Gable
- Infeed Grommet available for exterior base feed or power pole entrance

Complete Stage (HTBC)

- Includes two End Gables
- Infeed Grommet available on one or both sides for exterior base feed or power pole entrance

Stage Center Support (HTBS)

- Used for additional support on Stages wider than 72"
- Must be mounted in the center location

Stage Accessory Beam Cover (HTBR)

- Used to conceal the exposed portion of the optional Accessory Beam when screens are not being used
- Available in widths of 48" - 96" in 6" increments
- Can be cut on site

Stage Connector (HTBA)

- Used to connect two Complete Stage End Gables together if Stages are reconfigured

Stage Grommet (HTBG)

- Stages are available with an option for a Grommet and Cover at time of order. The Grommet Cover is only ordered when an additional infeed is required on site
- Specified on Beginning, End and Complete Stages

planning with standard stages

The following should be considered when planning with Stages.

Beginning Stage

Used only at the beginning of a base structure and must be connected to a Middle Stage or a Finish Stage. One Beginning Stage is required on all configurations.

Middle Stage

Used only in the middle of a base structure and must be connected to a Beginning Stage on one side and either a second Middle Stage or a Finish Stage on the other. It is recommended that maximum length of a Stage run should not exceed 32'-0". (For example, four stages at 96" long) due to leveling ranges of the stage.

Finish Stage

Used only at the end of a base structure and must be connected to a Beginning Stage or a Middle Stage. One Finish frame is required on all configurations.

Complete Stage

Complete Stages do **not** attach to Beginning, Middle or Finish Stages, they are intended to be used as single units only or attached to stage module for height-adjustable tables. If reconfigured and two Complete Stages need to be attached to each other, the Stage Connector (HTBA) must be specified.

stage support

Stages greater than 72" wide require additional support. Support is provided by either the Stage Center Support (HTBS) or any Stage Credenzas.

On 72" wide Stages that support large amounts of storage and there is no Stage Credenzas underneath, it is recommended that the Stage Center Support (HTBS) be specified for additional support.

The Stage Center Support is installed in the middle of the stage to provide necessary support.

A Stage Credenza meets the underside of the stage to provide support. It can be located anywhere along the stage (See *Storage* section for Credenza info).

planning with standard stages (continued)

accessory beam

An optional 1-3/4" wide Accessory Beam can be specified on the stage for mounting Screens.

Screens must mount onto an Accessory Beam. Storage can be used on a Stage with an Accessory Beam, the beam will not obstruct the storage.

When specifying Stack on Storage only, no Accessory Beam is required.

stage connector

The Stage Connector (HTBA) is used when existing Complete Stages are being attached together. All other Stages come with the required attachment brackets.

grain direction

The grain direction will always run the length of a stage.

leveling

To ensure a level Stage, the maximum number of suggested spine structures should not exceed four. Maximum leveling capabilities for each Stage are +2" and -1".

understanding standard stage electrics

upStage power is distributed through the Stage using a Power Harness and Four-Way Splitters and is accessed with a Flexible Power Module that allows power to be positioned exactly where it is required.

1 **Base Feed** power enters the stage through a Base Feed cover at the End Gable and connects to a Four-Way Splitter. Power can also enter the stage through a Ceiling Feed and Power Pole.

2 **Four-Way Splitters** mount in the center of every Stage to accept Power Harnesses and Flexible Power Modules. It can route power in four directions.

3 **Power Harnesses** route power from a Four-Way Splitter to connecting Stages. Interior clips allow for wire management. These clips are designed to support Data/Connecting Cords. The Power Harnesses gets routed through interior clips.

4 **Flexible Power Module** mounts to the stage for easy access to power and can be moved anywhere along the length of the spine. The Cable routes to a Four-Way Splitter.

standard stage power entry basics

Power can enter a Stage through either a Base Feed or a Ceiling Feed.

Ceiling Feed (HTECF)

- Routes power from the ceiling to the workstation
- Wire systems:
 - 8-Wire Isolated Ground (8T)
 - 7-Wire Non Isolated Ground (7T)
 - 8-Wire Dual Isolated (8K)
 - 7-Wire Dual Non Isolated (7K)
- Used with the Power Pole (HTEL)
- Available 120" and 144" long

Chicago Ceiling Feed (HTECC)

- Required for the city of Chicago electrical code requirements
- Used with the Power Pole (HTEL)
- Available 120" and 144" long

Power Pole (HTEL)

- Routes a Ceiling Feed and Data Cables from the ceiling to the workstation
- Available in 96", 120" and 144" high
- Finishes available are Foundation, Mica and Accent colors

Base Feed (HTEBF)

- Routes power from the floor into the stage, then on a Four-Way Splitter
- Wire systems:
 - 8-Wire Isolated Ground (8T)
 - 7-Wire Non Isolated Ground (7T)
 - 8-Wire Dual Isolated (8K)
 - 7-Wire Dual Non Isolated (7K)
- Available (For Stage modules less than 60" or 66" or more)
- When For Stage Module 66" or more option is selected, base feed will come with additional I-Connector and Short Harness to reach the required length

Split Base Feed (HTEBS)

- Routes power from the floor into the stage, then to a Four-Way Splitter and is wired into the building power source in two locations for New York City wiring restrictions
- Wire systems:
 - 8-Wire Isolated Ground (8T)
 - 7-Wire Non Isolated Ground (7T)
 - 8-Wire Dual Isolated (8K)
 - 7-Wire Dual Non Isolated (7K)
- Available 72" long

Chicago Base Feed (HTEBC)

- Required for the city of Chicago electrical code requirements
- Available 72" long

upStage CALA Power In feed (VBPU)

- Routes power from the floor into the stage in CALA applications
- Length: 1800mm
- Country of Installation:
 - Argentina
 - Brazil
 - Chile

Base Feed Cover (HTEFB)

- Used to route Base Feed and Data Cables into a workstation from the floor
- Applications available are Interior, Mid or Exterior of Stage
- Finishes available are Foundation, Mica and Accent colors

planning with standard stage power entry

The following should be considered when planning with upStage power entry.

power poles

Power Poles mount to the outside of the Stage End Gable only in order to route power and data from the ceiling.

When using a Power Pole, the stage with an Infeed Grommet must be specified to allow power to enter the stage.

The Power Pole protrudes 2" beyond the stage gable.

base feed cover

Mounts to either the outside of an End Gable or the inside of a Mid or End Gable.

Interior and Mid application

Outside application

If mounting to the outside of the stage the Infeed Grommet must be specified.

The Base Feed cover will protrude 2" beyond the base.

The Base Feed is available in two sizes:

- For stages 60" or less and 66" or more
- The width of the stage determines which option is required
- When used with a Stage that is 60" wide or less, the Harness connects directly to the first Four-Way Splitter
- When used with a Stage that is 66" wide or wider, the Harness is complete with an I-Connector and extension Harness which allows it to reach the first Four-Way Splitter

understanding standard stage data/communications

The Stage provides various locations for both the Power Harness cable and data cables to be routed within the interior of the Stage.

- 1 Flexible Power Module entry location into the interior of the stage structure
- 2 Upper clips are used to house Harness cables for Flexible Power Module
- 3 Opening for Data Plate
- 4 Lower clips are used to house Data cables
- 5 Data cable entry location from the exterior of the stage

The stages provide various locations that both the Power Harness cables can be routed from the Flexible Power Module through to the Four-Way Splitter within the interior of the stage. Data cables can enter and exit the stage interior on both ends and the center of the stage. Clips for both are provided along the stage exterior to allow Data and Power Harness cables to be routed separately through to the interior of the stage.

Power Harness cables are routed through designated Cut Out locations to maximize user adjustment.

Data Cables are routed from the Exterior of the Stage down to the Data Plate through designated clips.

understanding standard stage data/communications (continued)

Above is the recommended installation of the attached Power Harness cable from the Flexible Power Module through the designated Cut Out locations in the stage structure to allow for maximum user adjustment. If the Power Harness cable is routed through the open channel not in the designed location of in the stage structure then the placement range of the Flexible Power Module will be limited to individual metal Cut Out locations instead of the complete Stage.

If the Power Harness cable is routed through the open channel not in the designed location of in the stage structure then the placement range of the Flexible Power Module will be limited to individual metal Cut Out locations instead of the complete Stage.

standard stage power distribution basics

Power is distributed through the Stage with Power Harnesses and accessed with Flexible Power Modules.

Flexible Power Module

Power Harness (HTEBH)

- Routes power through the stage by connecting to a Four-Way Splitter or I-Connector
- Wire system available:
 - 8-Wire Isolated Ground (8T)
 - 8-Wire Dual Isolated (8K)
- Lengths: 24" - 144" in 12" increments

Chicago Power Module (HTEFC)

- Mounts anywhere along the stage to provide power for Chicago applications
- Cable length is 24", 36" and 48" and specified half the width of the stage for maximizing flexibility
- Standard 15 Amp and T-Slot 20 Amp available
- Includes one Power Module and two Data openings
- Data covers will always be Platinum (receptacles will have to be specified separately)
- Finishes: Gris and Very White

I-Connector (HTEJIC)

- Used to join two harnesses when a single harness is not long enough

Four-Way Splitter (HTEJDB)

- Mounts to the stage and connects to a power harness, ceiling feed and splits power in four directions
- Are typically mounted to the center of each Stage

Flexible Power Module (HTEFP)

- Mounts any along the stage to provide Power
- Cable Lengths:
 - 24", 36" and 48"
 - Specified half the width of the stage for maximum flexibility
- Outlet Configurations
 - Circuit 1
 - Circuit 1 and 2
 - Circuit 1 and 3 (use 8T only)
 - Circuit 1 and 5
 - Circuit 1 and 6 (use 8K only)
 - Circuit 2 and 2
 - Circuit 2 and 3 (use 8T only)
 - Circuit 2 and 5
 - Circuit 2 and 6 (use with 8K only)
 - Circuit 3 and 3 (use 8T only)
 - Circuit 3 and 5 (use 8T only)
 - Circuit 5 and 5
 - Circuit 5 and 6 (use 8K only)
 - Circuit 6 and 6 (use 8K only)
 - USB and Circuit 1
 - Circuit 2 and 5 (use 7T and 7K only)
 - Circuit 1 and 6 (use with 7K only)
 - Circuit 2 and 2 (use 7T and 7K only)
 - Circuit 2 and 3 (use with 7K only)
 - Circuit 2 and 5 (use with 7K only)
 - Circuit 2 and 6 (use 7T and 7K only)
 - Circuit 3 and 3 (use with 7K only)
 - Circuit 3 and 5 (use with 7K only)

- Wiring Systems:
 - 8-Wire Isolated (8T)
 - 8-Wire Dual Isolated (8K)
 - 7-Wire Non-Isolated (7T)
 - 7-Wire Non-Dual Isolated (7K)

- Finishes:
 - Soft Gris
 - Very White
- Receptacles will automatically match the finish option selected

Chicago Junction Box (HTEX)

- Used in place of the Four-Way Splitter in Chicago applications

upStage CALA Power Module (VBCU)

- Mounts anywhere along the stage to provide power for CALA applications
- **Application:**
 - Single Sided, Single and Double Duplexes
- **Outlet Configurations:**
 - One Single Duplex
 - Two Power
 - One Power and One USB
 - Two Double Duplex
 - Four Power
 - Three Power and One USB
- **Country of Installation:**
 - Argentina
 - Brazil
 - Chile
- **Finishes:**
 - Ebony Coordinate
 - Very White Coordinate

CALA Jumper Power Harness (VBPH)

- Routes power through the stage in CALA applications
- Connects to a Four-Way Splitter or I-Connector
- Length: 2000 mm
- Finish: Black

planning with standard stage power distribution

The following should be considered when planning with Stage Power Distribution.

When power needs to pass through a Stage with no Flexible Power Modules, an I-Connector can be used between the two Harnesses, as only two connection points are required.

When more than one Flexible Power Module is required on the side of a Stage, an additional Four-Way Splitter can be used. The Harness length will be the distance between the two Four-Way Splitters.

When two Stages of different widths are specified, the Four-Way Splitters center to center dimension is used to determine the harness length required.

Example: 72" Stage and a 48" Stage requires a 60" harness

power harness lengths

The following chart demonstrates the nominal vs. actual lengths of Power Harnesses:

Nominal	Actual
24"	24"
36"	48"
48"	48"
60"	72"
72"	72"
84"	96"
96"	96"
108"	120"
120"	120"
144"	144"

simple stage basics

Beginning Simple Stage, Middle Simple Stage and Finish Simple Stages are combined to create workstation spines. Complete Simple Stages are used for single stage applications.

- Provides a simpler base structure to support worksurfaces, storage and screens and to route power and data
- Widths: 30" - 96" in 6" increments
- Available 21" high and 16" deep
- Optional Accessory Beam available
- Electrics are available as fixed or double sided on Simple Stages 72" - 96" wide

Stage Finishes:
Source Laminate, Flintwood and Natural Veneer
Metal Finishes:
Foundation, Mica and Accent colors

Beginning Simple Stage (HTDB)

- Includes one End Gable and one Mid Gable
- Infeed Grommet available for exterior base feed or power pole entrance

Middle Simple Stage (HTDM)

- Includes one Mid Gable

Finish Simple Stage (HTDF)

- Includes one End Gable
- Infeed Grommet available for exterior base feed or power pole entrance

Complete Simple Stage (HTDC)

- Includes two End Gables
- Infeed Grommet available on one or both sides for exterior base feed or power pole entrance

Simple Stage - Center Support (HTDS)

- Used for additional support on Stages wider than 72"
- Must be mounted in the center location

Stage Accessory Beam Cover (HTBR)

- Used to conceal the exposed portion of the optional Accessory Beam when screens are not being used
- Available in widths of 48" - 96" in 6" increments
- Can be cut on site

Stage Connector (HTBA)

- Used to connect two Complete Stage End Gables together if Stages are reconfigured

Stage Grommet (HTBG)

- Stages are available with an option for a Grommet and Cover at time of order. The Grommet Cover is only ordered when an additional infeed is required on site
- Specified on Beginning, End and Complete Stages

planning with simple stages

The following should be considered when planning with Simple Stages.

Beginning Simple Stage

Used only at the beginning of a base structure and must be connected to a Middle Simple Stage or a Finish Simple Stage. Beginning Simple Stage or Beginning Standard Stage is required on all configurations.

Middle Simple Stage

Used only in the middle of a base structure and must be connected to a Beginning Simple Stage on one side and either a second Middle Simple Stage or a Finish Simple Stage on the other. It is recommended that maximum length of a Simple Stage run should not exceed 32'-0" (For example, four stages at 96" long) due to leveling ranges of the stage.

Finish Simple Stage

Used only at the end of a base structure and must be connected to a Beginning Simple Stage or a Middle Simple Stage. One Finish frame is required on all configurations.

Complete Simple Stage

Complete Simple Stages do not attach to Beginning, Middle or Finish Stages. They are intended to be used as single units only or attached to simple stage modules for height-adjustable tables. If reconfigured and two Complete Simple Stages need to be attached to each other, the Stage Connector (HTBA) must be specified.

simple stage support

Stages greater than 72" wide or wider require additional support. Support is provided by the Simple Stage Center Support (HTDS).

On 72" wide Stages that support large amounts of storage and there is no Stage Credenzas underneath, it is recommended that the Stage Center Support (HTDS) be specified for additional support.

The Simple Stage Center Support is installed in the middle of the stage to provide necessary support.

Stage Credenzas cannot be substituted for a center support, unless a Simple Stage Center Support (HTDS) is also specified.

planning with simple stages (continued)

accessory beam

An optional 1-3/4" wide Accessory Beam can be specified on the Simple Stage for mounting Screens.

Screens must mount onto an Accessory Beam. Storage can be used on a Simple Stage with an Accessory Beam, the beam will not obstruct the storage.

When specifying Stack on Storage only, no Accessory Beam is required.

Elevated Hutches and Lateral Towers must mount onto an Accessory Beam.

grain direction

The grain direction will always run the length of the Simple Stage.

leveling

To ensure a level Stage, the maximum number of suggested spine structures should not exceed four. Maximum leveling capabilities for each Stage are +2" and -1".

planning with simple stages (continued)

connecting simple stages with standard stages

Simple Stages can be connected with Standard Stages with the use of a Stage Connector (HTBA). Only Finish stages at their finished ends or Complete stages can be connected with this connector.

Beginning Simple Stage
(HTDB)

Middle Simple Stage
(HTDM)

Finish Simple Stage
(HTDF)

(HTBB)

Middle Simple Stage
(HTDM)

Finish Standard Stage
(HTBF)

understanding simple stage electrics

upStage power is distributed through the Simple Stage using a Power Harness and is accessed from both sides in the end or center position.

- 1 Simple Stage Blank (HTEK)
- 2 Simple Stage Power Box (HTEFS)
- 3 Standard Data Plate
- 4 Receptacle Outlet (HTERO)

- 1 Base Feed power enters the stage through a Base Feed cover (HTEFB) at the End Gable.

- 2 Power Harnesses routes power to connecting Stages The structure of the Simple Stage allows for cable management for the linking of harnesses, as well as provide a data trough to route data cables.
The correct harness lengths must be specified.

- 3 The simple stage doesn't have a flexible power module, it has a fixed power box.

simple stage power entry basics

Power can enter a Simple Stage through either a Base Feed or a Ceiling Feed.

Ceiling Feed (HTECF)

- Routes power from the ceiling to the workstation
- Wire systems:
 - 8-Wire Isolated Ground (8T)
 - 7-Wire Non Isolated Ground (7T)
 - 8-Wire Dual Isolated (8K)
 - 7-Wire Dual Non Isolated (7K)
- Used with the Power Pole (HTEL)
- Available 120" and 144" long

Chicago Ceiling Feed (HTECC)

- Required for the city of Chicago electrical code requirements
- Used with the Power Pole (HTEL)
- Available 120" and 144" long

Power Pole (HTEL)

- Routes a Ceiling Feed and Data Cables from the ceiling to the workstation
- Available in 96", 120" and 144" high
- Finishes available are Foundation, Mica and Accent colors

Base Feed (HTEBF)

- Routes power from the floor into the stage, then on a Four-Way Splitter
- Wire systems:
 - 8-Wire Isolated Ground (8T)
 - 7-Wire Non Isolated Ground (7T)
 - 8-Wire Dual Isolated (8K)
 - 7-Wire Dual Non Isolated (7K)
- Available (For Stage modules less than 60" or 66" or more)
- When For Stage Module 66" or more option is selected, base feed will come with additional I-Connector and Short Harness to reach the required length

Split Base Feed (HTEBS)

- Routes power from the floor into the stage, then to a Four-Way Splitter and is wired into the building power source in two locations for New York City wiring restrictions
- Wire systems:
 - 8-Wire Isolated Ground (8T)
 - 7-Wire Non Isolated Ground (7T)
 - 8-Wire Dual Isolated (8K)
 - 7-Wire Dual Non Isolated (7K)
- Available 72" long

Chicago Base Feed (HTEBC)

- Required for the city of Chicago electrical code requirements
- Available 72" long

Base Feed Cover (HTEFB)

- Used to route Base Feed and Data Cables into a workstation from the floor
- Applications available are Interior, Mid or Exterior of Stage
- Finishes available are Foundation, Mica and Accent colors

planning with simple stage power entry

The following should be considered when planning with upStage power entry.

power poles

Power Poles mount to the outside of the Simple Stage End Gable only in order to route power and data from the ceiling.

Infeed Grommet Location

When using a Power Pole, the Simple Stage with an Infeed Grommet must be specified to allow power to enter the stage.

2"

The Power Pole protrudes 2" beyond the Simple Stage gable.

base feed cover

Mounts to either the outside of an End Gable or the inside of a Mid or End Gable.

Interior and Mid application

Outside application

planning with simple stage power entry (continued)

base feed connection

If the Simple Stage is 30" wide, 36" wide or between 72"-96" wide and has "end" electrics, the base feed can connect directly to the Simple Stage Power Box (HTEFS) which is fixed and shared along the spine of the Simple Stage.

30" - 36" wide

72" - 96" wide

If the Simple Stage is 42"-66" wide, the Base Feed must connect to a Flexible Harness (HTEBH) before connecting to the Simple Stage Power Box (HTEFS).

42" - 66" wide

Additional Power Harnesses (HTEB) routes power to connecting stages. The correct length of Power Harness (HTEB) must be specified. See *planning with simple stage power distribution* for more information on specifying harnesses.

power box locations

Simple Stage electrics are fixed and double sided which allows for optimization of symmetrical planning.

- Centered electrics are only available for Simple Stages 30" - 66" wide
- Electrics are non-handed as they are double sided
- No mid-gable is required

- End electrics only are available for Simple Stages 72" - 96" wide
- Electrics are non-handed as they are double sided
- End electrics can be set at either end by flipping the structure on site, no specification needed
- Center Support is required for simple stages larger than 72". On 72" wide Simple
- Stages that support large amounts of storage, it is recommended that the Stage Center Support be specified for additional support

understanding simple stage data/communications

The Simple Stage provides various locations for both the Power Harness cable and data cables to be routed within the interior of the Simple Stage.

stage vs. simple stage data cables capacity

Simple Stage allows for 36 cat 5 data cables (centered).

Stage allows for 42 cat 5 data cables (21 per side).

simple stage power distribution basics

Power is distributed through the Simple Stage with Power Harnesses and accessed with Power Boxes.

Simple Stage Power Box

Power Harness (HTEBH)

- Routes power through the stage by connecting to a Four-Way Splitter or I-Connector, Simple Power Box
- Wire system:
 - 8-Wire Isolated Ground (8T)
 - 8-Wire Dual Isolated (8K)
- Lengths: 18" - 144" in 6" increments

Simple Stage Power Box (HTEFS)

- Compatible Wiring Systems:
 - 8-Wire Isolated (8T)
 - 8-Wire Dual Isolated (8K)
 - 7-Wire Non-Isolated (7T)
 - 7-Wire Non-Dual Isolated (7K)
- Finishes:
 - Soft Gris
 - Very White
- Receptacle Outlet (HTERO) must be specified separately

Standard 15 amp

T-Slot 20 amp

Receptacle Outlet (HTERO)

- Mounts onto the Simple Stage Power Box to provide access to power
- Outlet Configurations
 - Circuit 1
 - Circuit 1 and 2
 - Circuit 1 and 3 (use 8T only)
 - Circuit 1 and 5
 - Circuit 1 and 6 (use 8K only)
 - Circuit 2 and 2
 - Circuit 2 and 3 (use 8T only)
 - Circuit 2 and 5
 - Circuit 2 and 6 (use with 8K only)
 - Circuit 3 and 3 (use 8T only)
 - Circuit 3 and 5 (use 8T only)
 - Circuit 5 and 5
 - Circuit 5 and 6 (use 8K only)
 - Circuit 6 and 6 (use 8K only)

Simple Stage Power Cover (HTEK)

- A blank plate to cover unused opening in power ports

Data Extender Plate (HTEEE)

- Placed over a communication opening to provide extended depth for data jack

Simple Stage Data Cover (HTEZ)

- A blank plate to cover unused opening in data ports

planning with simple stage power distribution

power harness lengths

When specifying the harnesses for Simple Stages, the correct length must always be calculated. Power Harness calculations must account for the length of the Power Module which is 12" wide. For Stages 72" or wider, the distance of the center of the Power Module to the end of the stage is 15". For Stages 30"-60" the Power Module is centered. For example, in the following example a 72" beginning stage, a 60" middle stage and a 60" finish stage has been specified. The length of the Harness is calculated as followed:

Harness A= (Beginning stage dimension-15"-6") + (stage dimension/2 -6")

Harness B= (Middle stage dimension/2 -6") + (End stage dimension/2 -6")

power conservation system basics

Furniture based solution for the controlling function that addresses the ASHRAE/Title 24 electrical requirements.

Power Conservation System (HTEPC)

- Up to two circuits can be controlled by occupancy sensors (included)
- Maximum of 4 sensors can be connected to each individual controlled circuit
- When using the Power Conservation System, circuits 3, 5, 6, A and B will always stay powered on (uncontrolled)
- To get individually controlled stations, specify the Power Conservation System with 2 sensors
- Available with option of 2, 4 or 8 sensors (Maximum of 4 sensors per run)
- Sensors mount to the underside of the worksurface
- A hard wired connection supplies power into a stage from the building power source

planning with power conservation system

The following should be considered when planning with the Power Conservation System.

The following are two ways of planning with the Power Conservation System.

scenario A: multiple sensor planning

The connection between two power modules only applies on the installation for 4 sensors and 8 sensors.

scenario B: single sensor planning

- Always specify one sensor per workstation.
- Only one controlled circuit per workstation (do not specify two controlled circuits in one single workstation)
- Do not specify mix receptacles for both circuit 1 and 2 in a single workstation

understanding worksurfaces

upStage offers a variety of workstations for parallel and perpendicular applications. They can be mounted directly to the Stage, storage units or hutch stackers in a semi-suspended application or specified with legs to create freestanding tables. Navigate + hiSpace can also be integrated with upStage.

parallel and perpendicular worksurfaces

When no hutches or stacked storage are used worksurfaces are typically mounted 2" from the centerline of the stage. The gap is required to allow for the placement of screens on the stage and for cable management.

Parallel

Worksurfaces face the Stage

Standard Parallel Planning

Parallel Planning with Hutches

(When mounting parallel to a Hutch, there is no gap)

Back to Back Parallel Planning

Single Sided Planning

Perpendicular

Worksurfaces run perpendicular to the Stage

Standard Perpendicular Planning

Single Sided Perpendicular Planning

Perpendicular Planning with Hutches

(When mounting perpendicular to a Hutch, there is no gap)

understanding worksurfaces (continued)

navigate and hispace table integration

Navigate and hiSpace Tables are available with an upStage leg option.

Navigate and hiSpace Tables Integrated with stages

- The leg fits into the Stage Module for Height-Adjustable Table to conceal the leg

Navigate Tables Integrated with Credenzas

- The leg fits into the credenza for Height-Adjustable Table to conceal the leg

Navigate and hiSpace Freestanding

- Designed to sit the leg against the stage in freestanding applications

freestanding tables

Freestanding tables are available with Interpret legs or Y-legs.

Freestanding Table

- The table sits beside the stage

Y-table

- The shape of the leg allows the table to overlap the stage

Worksurfaces can be mounted perpendicular or parallel over the stage with no gap in between to create a large shared workspace.

Perpendicular

Parallel

← Stage →

worksurface basics

upStage worksurfaces are available for parallel and perpendicular applications to optimize “zero footprint” planning.

Parallel Worksurface (HTWR)

- Runs parallel to the stage or can be used freestanding when configured with legs (see *Supports* section for details)
- Depths: 23", 29" and 35"
- Widths: 30", 36" and 42" to 96" in 1" increments
- All dimensions are actual
- Available with Access Door or Rectangular Cut Outs
- Access door Cut Out options are not available for 23" depth worksurface

Perpendicular Worksurface (HTWP)

- Runs perpendicular from the stage or can be used freestanding when configured with legs (see *Supports* section for details)
- Depths: 24" - 48" in 6" increments
- Widths: 46" - 71" in 1" increments
- All dimensions are actual
- Available with Access Door or Rectangular Cut Outs

Perpendicular with Radius Corner Worksurface (HTWH)

- Runs perpendicular from the stage
- Depths: 24" - 48" in 6" increments
- Widths: 46" - 71" in 1" increments
- All dimensions are actual
- Available with Access Door or Rectangular Cut Outs
- Available with two or four radiused corners

Dual Perpendicular Worksurface (HTWV)

- Two face to face worksurfaces
- Wire gap and flush profiles available
- Depths: 48", 60" and 72"
- Widths: 46" to 71" in 1" increments
- All dimensions are actual
- Available with Access Door or Rectangular cut outs
- Access door cut out options are not available for 23" depth worksurface
- Round 3" radius corner profile

Dual Perpendicular with Radius Corner Worksurface (HTWW)

- Two face to face worksurfaces
- Wire gap and flush profiles available
- Depths: 48", 60" and 72"
- Widths: 46" - 71" in 1" increments
- All dimensions are actual
- Available with Access Door or Rectangular cut outs
- Access door cut out options are not available for 23" depth worksurface
- Available with two or four radius corners

End Worksurface (HTWG)

- Two face to face worksurfaces
- Wire gap and flush profiles available
- Depths: 16"
- Widths: 50", 62" and 74"
- All dimensions are actual

End with Radius Corners Worksurface (HTWZ)

- Provides an end worksurface to a dual perpendicular worksurface
- Depths: 16"
- Widths: 50", 62" and 74"
- All dimensions are actual
- Round 3" radius corner profile

table basics

upStage workspaces are available for parallel and perpendicular applications to optimize “zero footprint” planning.

**Worksurface Finishes:**

Foundation Laminate, Flintwood and Natural Veneer

Edge Trim Finishes for Worksurface:

PVC with HPL surface only, Acrylic with HPL, Flintwood edge trim defaults to Flintwood surface finish, Natural Veneer edge trim defaults to Natural Veneer surface finish

- Widths: 46" - 70"
- Depths: 23", 29" and 35"
- Available with Access Door option or Rectangular Cut Outs option
- Worksurface finishes: Foundation Laminate, Flintwood and Natural Veneer
- 23" deep tables are not available in 70" wide
- 29" and 35" deep tables are not available in 46" wide
- Rectangular Grommet Cut Outs and Access Door for Multi-Circuit Desk Cut Outs have size restrictions:
 - On Parallel worksurface widths less than 42" and specified with the Access Door, only the center location is available.
 - Access Door **cannot** be specified on the Y-Table (HTWE)
 - Access Door **cannot** be specified on parallel worksurfaces if the depth is less than 29".
 - Access Door Cut Out options Left and Right and the Rectangle Cut Out options Left and Right are not available on 30" and 36" wide parallel worksurfaces

**Interpret Style Table (HTWT)**

- A freestanding table with Interpret legs
- Fixed Height has a leveling range of +1 and -1
- Height-Adjustable available with a (+3" and -3" range)
- All dimensions are actual
- Available with or without casters
- Leg finishes: Foundation, Mica and Accent colors

**Interpret Table Radius Corner Table (HTWU)**

- A freestanding table with Interpret legs
- Round 3" Radius corner profile
- Fixed Height has a leveling range of +1 and -1
- Height-Adjustable available with a (+3" and -3" range)
- All dimensions are actual
- Available with or without casters
- Leg finishes: Foundation, Mica and Accent colors

**Y Table (HTWE)**

- A freestanding table featuring Y-Legs
- Y-Legs are available in two finish options
 - Wood and Metal (Upper support metal and lower support wood)
 - Metal and Metal (Upper and lower supports metal, can specify different metal finishes)
- Wood and Metal option offers an adjustment range of + 1/2" and - 1/2"
- Metal and Metal option offers an adjustment range of + 2" and - 1"
- Available without casters only
- Metal finishes: Foundation, Mica and Accent colors
- Wood support finishes are Flintwood and select Natural Veneer coordinate

**Y Table with Radius Corner (HTWX)**

- A freestanding table featuring Y-Legs
- Round 3" Radius corner profile
- Y-Legs are available in two finish options
 - Wood and Metal (Upper support metal and lower support wood)
 - Metal and Metal (Upper and lower supports metal, can specify different metal finishes)
- Wood and Metal option offers an adjustment range of + 1/2" and - 1/2"
- Metal and Metal option offers an adjustment range of + 2" and - 1"
- Available without casters only
- Metal finishes: Foundation, Mica and Accent colors
- Wood support finishes: Flintwood and select Natural Veneer coordinate

planning with worksurfaces

The following should be considered when planning with upStage worksurfaces mounted to the Stage.

parallel worksurfaces

When specifying parallel work surfaces, it is recommended that all work surfaces be mounted 2" from the centerline of the stage, which allows for a 6" overhang over the stage

2" wire gap required when planning single sided.

perpendicular worksurfaces

When specifying Perpendicular worksurfaces, it is recommended that all worksurfaces be mounted 2" from the centerline of the stage, which allows for a 6" overhang over the stage.

To allow for "zero footprint" planning, perpendicular worksurfaces should be planned 2" less than the desired footprint.

1" wire gap required when planning perpendicular worksurfaces.

planning with worksurfaces (continued)

The following should be considered when planning with upStage worksurfaces mounted to the Stage.

If a common kit of parts is desired, “zero footprint” planning can still be achieved, however there will be minor variances between widths and depths of worksurface.

parallel worksurfaces

- 1 49" wide x 29" deep
- 2 70" wide x 23" deep

perpendicular worksurface

- 1 48" wide x 30" deep
- 2 70" wide x 24" deep

When combining parallel and perpendicular worksurfaces, both worksurfaces must be mounted to the stage, a perpendicular worksurface **cannot** be mounted to a parallel worksurface.

planning with worksurfaces (continued)

freestanding tables

The Interpret table is available with Flat and Knife edges. Y Table is only available with Flat edges.

Flat Edge

On Flat Edge worksurfaces, the legs are flush to the worksurface edge.

Knife Edge

On Knife Edge worksurfaces, the legs are inset by 1".

planning with worksurfaces mounted to hutch stackers or storage

Worksurfaces can be mounted to hutches or storage on the stage (see Storage section for more details). When mounting a perpendicular worksurface to a hutch, the hutch depth must be taken into consideration when determining the width of the surface.

When a worksurface is specified against hutch storage there will be no gap the worksurface must be specified 8" less then the desired footprint size.

When planning parallel worksurfaces with a shared Hutch each the worksurface will have to be 8" less then the stage width to accommodate the Shared Hutch Stacker.

When planning parallel worksurfaces with Hutches note your worksurface will have to be 16" less then the stage width to accommodate the Hutch Stackers.

planning with worksurfaces (continued)

planning with lateral screens

upStage parallel worksurfaces are available in 1" widths to allow for the placement of lateral screens between worksurfaces. Lateral Screens are offset to the left or right, they are not centered between two Stages.

When a lateral Screen is not required on either end of a worksurface, the worksurface is specified the same width as the stage.

When a Lateral Screen is not required between two worksurfaces, the worksurfaces are specified the same widths as the stages.

When a lateral screen is being specified between two worksurfaces allow 1" for the thickness of the screen and a additional 1" gap on either side.

planning with worksurfaces (continued)

planning with dual perpendicular worksurfaces and elevated hutches

When planning with the Dual Perpendicular Worksurface and Elevated Hutch, the Support Kit can accommodate the Elevated Hutch gables.

The accessory rail between the two worksurfaces will be shorter to allow for the gables of the elevated hutch.

planning with worksurfaces with radius corners

Worksurfaces with radiused corners allow for planning with the Infinity Desk Edge Screen to offer a softer aesthetic

Side by Side Planning

- Worksurfaces have two curved corners and two straight corners

Single Side Planning'

- Worksurfaces have two curved corners

workspace power access basics

Multi-Circuit power is available for semi-suspended worksurface applications. Worksurfaces must be specified with Access Door Cut Out to access the power.

Multi-Circuit Desk Power Module (HTEM)

- Mounts inside of a multi-circuit desk housing to provides access to power on semi-suspended worksurfaces
- Wire system:
 - 8-Wire Isolated Ground (8T)
 - 8-Wire Dual Isolated (8K)

Multi-Circuit Desk Housing (HTEN)

- Provides the housing required to support the Multi-Circuit Desk Module
- Finishes: Foundation, Mica and Accent colors

Access Door for Multi-Circuit Desk (HTEA)

- Provides the above worksurface access to the outlets on the Multi-Circuit Desk Module
- Finishes: Foundation, Mica and Accent colors

Chicago Desk Power Module (HTEMC)

- Provides access to power on semi-suspended worksurfaces in Chicago applications

CALA Power Station (VBWB)

Mounts to a worksurface to provide power

Outlet Configurations:

Double duplex
Two Power and Two Data
Four Power
Three Power and One USB

Country of Installation:

R Argentina
N Brazil
L Chile

Cord Length:
1800 mm

Finishes

Receptacle Finish:
Ebony Coordinate
Very White Coordinate

Clamp Finish:
Clear Anodized Aluminum

Standard 15 amp

T-Slot 20 amp

Receptacle Outlet (HTERO)

- Mounts onto the Power Module or in the Multi-Circuit Desk Module or to the Power Module in a Height-Adjustable Module
- Styles: Standard 15 amp, T-Slot 20 amp, Controlled 15 and 20 amp
- Outlet configurations consist of Circuit 1, Circuit 2, Circuit 3 (use 7T and 8T only), Circuit 5 (8T and 8K only), Circuit 6 (use 8K only), Circuit A (7T and 7K only) and Circuit B (7K only)
- Receptacle style D and E include a marking indicating it is connected to a control system.
- Finishes: Platinum, Ebony, Storm White and Very White

wire management basics

Wire management components are specified to route and manage cables below the worksurface.

Rectangle Grommet (HTEG)

- Provides worksurface pass through wire management
- Finishes: Clear Anodized Coordinate, Graphic Steel, Storm White, Very White and Platinum

Worksurface Cable Tray (HTET)

- Provides wire management below worksurface
- Length: 12"
- Available in Black only

Wire Clips (HTEW)

- Provides management below the worksurface
- Package includes six clips
- Available in Black only

International Stage Mount Kit (VES)

A bracket that holds International electrics to the stage

Mounting styles:

Power Logic
CALA

Bracket Packages:

For Two Outlet Box
For Four Outlet Box

planning with worksurface power access

The following should be considered when planning with Worksurface Power Access.

worksurface power and data management

Worksurfaces can be specified with a Rectangle Cut Out or an Access Door Cut Out. Two options are available for accessing power at desk level.

Rectangle Grommet

The Rectangle Grommet (HTEG) routes power through the worksurface to the Flexible Power Module specified on the stage and must be ordered separately.

Access Door for Multi-Circuit Desk

The Access Door for Multi-Circuit Desk (HTEA) is used with the Multi-Circuit Desk Module (HTEM) and housing to provide multi-circuit power from the worksurface. A worksurface with Access Door Cut Out must be specified. All components need to use specified separately.

multi-circuit desk power

The Multi-Circuit Desk Housing (HTEN), Multi-Circuit Desk Power Module (HTEM), Receptacle Outlet (HTERO) and Access Door for Multi-Circuit Desk (HTEA) are all specified separately. Multi-Circuit Desk Power is only available with Standard Stages and cannot be specified with Simple Stages.

Multi-Circuit Desk Housing (HTEN)

+

Multi-Circuit Desk Power Module (HTEM)

+

Receptacle Outlet (HTERO)

+

Access Door for Multi-Circuit Desk (HTEA)

=

perpendicular worksurfaces

Rectangular Grommet Cut Out are available left, right and center.

Rectangle Cut Out is inset 4" from the edge of the worksurface.

Access Door for Multi-Circuit Desk can be specified on worksurfaces that are semi suspended from the stage.

Access Door for Multi-Circuit Desks are available left and right.

Access Door Cut Outs are inset 5" from the edge of the worksurface.

*If an Access Door Cut Out is specified, a left or right Rectangular Cut Out **cannot** be specified in the same location

Access Door for Multi-Circuit Desk can be specified on worksurfaces that are attached to a Hutch Stacker.

planning with worksurface power access (continued)

The Multi-Circuit Desk Module must be used in a semi-suspended application. The following examples demonstrate how power routes to the module.

Standard Application

- Half the width of the stage power is required at desk level only, two harnesses extend from the Four-way Splitter to connect to the Multi-Circuit Desk Power Module

Alternate Aesthetic Application

- When power is required at desk level only, two Harnesses extend from the Four-Way Splitter to two I-Connectors, (or an additional Four-Way Splitter) and a 24" Harness from each I-Connector to the Multi-Circuit Desk Power Module
- It is recommended that a 24" flexible harness be used to go from the stage to the bottom of the worksurface as it provides a better aesthetic

Both Power and Flexible Power Module

- When both desk power and a Flexible Power Module are required for each user, additional Four-Way Splitters are required
- The Four-Way Splitter connects to the base feed, two 24" harnesses leading to the Multi-Circuit Desk Power Modules and the next Four-Way Splitter, which then connects to two flexible power modules and connects to the next Four-Way Splitter to repeat the same connections in the next stage

planning with worksurface power access (continued)

parallel worksurfaces

Rectangular Cut Out are available left, right and center.

Rectangular Cut Out is inset 4" from the edge of the worksurface.

Access Door Cut Outs are available left, right and center.

Access Door Cut Outs are inset 5" from the edge of the worksurface and can only be specified over the stage.

Access Door Cut Out can only be specified to be centered when planning with the Y-Leg in parallel applications.

Parallel and Perpendicular worksurfaces can be interchanged but electrical cut outs will not be in their correct positions. Also, the depths are not consistent so some gaps may appear.

The Access Door for Multi-Circuit Desk can be specified centered on a parallel worksurface that has been mounted perpendicularly application, however the housing and cables will be visible. Longer harness will be required.

wiring systems

Four wiring systems are available for Interpret 8-Wire Isolated (8T), 7-Wire Non Isolated (7T), 8-Wire Dual Isolated (8K) and 7-Wire Dual Non Isolated (7K). Most common Teknion wiring configurations are achieved with these wiring systems.

For sites where Isolated Ground is not available, Teknion offers Non-Isolated Ground options for furniture wiring. The site electrician or electrical contractor/consultant can identify sites where Isolated Ground is not available. For those sites, specify Teknion 7T or 7K wiring systems.

	No. Regular Circuits	No. Isolated Circuits
8-Wire Isolated (8T) (3+1) 	3	1
8-Wire Dual Isolated (8K) (2+2) 	2	2
7-Wire Non Isolated (7T) (3+1) 	4	0
7-Wire Dual Non Isolated (7K) (2+2) 	4	0

wiring system/receptacles

	Wiring System			
	8T	8K	7T	7K
Regular Ground Receptacles	1, 2, 3	1, 2	1, 2, 3, A	1, 2, A, B
Isolated Ground Receptacles	5	5, 6	n/a	n/a

wiring system/related circuit

	Wiring System			
	8T	8K	7T	7K
Regular Circuit 1 Receptacle	✓	✓	✓	✓
Regular Circuit 2 Receptacle	✓	✓	✓	✓
Regular Circuit 3 Receptacle	✓		✓	
Isolated Circuit 5 IG Receptacle	✓	✓		
Isolated Circuit 6 IG Receptacle		✓		
Regular Circuit A Receptacle			✓	✓
Regular Circuit B Receptacle				✓

✓ Applicable

15 Amp

20 Amp

USB

- Outlets are available 15, 20 amp or USB
- The 20 Amp is only available in Black
- USB is always on Circuit 1

worksurface grain/pattern direction

Attention to grain/pattern direction is important when planning worksurfaces.

grain direction

- There is no user edge so care must be taken during installation to match grain/pattern direction
- Grain/patterns are not “centered” on worksurfaces
- Applies to Foundation Laminate (Wood Grain patterns), Flintwood (Standard and Cathedral) and Natural Veneer

- Grain direction will appear in the same direction, from side to side
- For Cathedral Flintwoods and Natural Veneers the grain will run from left to right from the user's prospective

edges

	Foundation Laminate Worksurface	Flintwood Worksurface	Natural Veneer Worksurface
Flat (8) All Edges		n/a	n/a
Flintwood Flat (9) All Edges	n/a		
Flat (G) All Edges	n/a	n/a	n/a
Full Knife (H) User Edge			
Full Knife (X) User Edge	n/a	n/a	n/a

worksurface supports & accessory basics

upStage supports worksurfaces and are used to mount to Stage or to make freestanding tables.

Interpret Style Leg (HTWN)

- Used in freestanding and/or semi-suspended applications
- Available in pairs and singles (left and right), standard or height-adjustable
- Height-adjustable leg has range of 6" (3" above and 3" below)
- Standard leg has leveling range of 2" (1" above and 1" below)

Interpret Style Mono Leg (HTWM)

- Installed between two semi-supported worksurfaces to provide support
- Available fixed or height-adjustable
- Height-adjustable leg has range of 6" (3" above and 3" below)

Y-Leg (HTWD)

- Y-Legs are available in two finish options
 - Wood and Metal (Upper support metal and lower support wood)
 - Metal and Metal (Upper and lower supports metal, can specify different metal finishes)
- Wood and Metal option offers an adjustment range of +1/2" and -1/2"
- Metal and Metal option offers an adjustment range of +2" and -1"
- Metal finishes: Foundation, Mica and Accent colors
- Wood support finishes: Flintwood and select Natural Veneer coordinate

Stage to Worksurface Support (HTWQ)

- Mounts to the underside of a worksurface and to the top of the stage to provide support to the worksurface
- Available fixed or height-adjustable
- Height-Adjustable ranges include +3" and -1"

End Worksurface Support Kit (HTWJ)

Flush Plate (HTWA)

- Used in conjunction with other supports to maintain alignment of worksurfaces
- Available as Flush Plate or Structural Flush Plate
- Available in Black only

Worksurface Support Wire Manager (HTWY)

- The HTWY cable router is used to guide power and data cables from the stage to the worksurface
- It is installed on top of the Stage to Worksurface Support (HTWQ) as an add-on piece

Worksurface Reinforcement Channel (UNRC)

- Adds rigidity to worksurfaces to reduce deflection
- Must be used on all unsupported worksurface spans over 48"

planning with worksurface supports

The following should be considered when planning with upStage worksurface Supports.

Worksurfaces must be supported on all corners, they **cannot** be cantilevered.

flush plates

Structural Flush Plate

Used with legs and brackets to provide required stability with worksurface returns.

Flush Plate

Used in conjunction with other supports to maintain alignment of worksurfaces.

stage to worksurface supports

Brackets mount to the underside of the stage to prevent damage when repositioning.

worksurface support wire manager

Bracket can be installed right on top of the worksurface support (HTWQ) as an add-on piece.

planning with worksurface supports (continued)

stage to worksurface supports (continued)

- Supports connect worksurfaces to Stages and can be installed anywhere along the length of the stage
- When no Access Door Cut Out, are required inset brackets 6" from the edge of worksurface

- Spacing from the edge of the worksurface is dependent on whether worksurface has Access Door Cut Out
- At least one Stage to Worksurface (HTWQ) support must be specified on each end of the worksurface and at least one every 72".
- Spacing location of the stage to worksurface Brackets are dependent on the location of the Multi-Circuit Module when specified

When the stage to Worksurface support is being planned in a perpendicular application with Access Door Cut Outs, the support locations are based on worksurface depths.

planning with worksurface supports (continued)

y-leg

In freestanding applications the Y-Leg enables worksurfaces to bridge over the stage to provide the necessary 2" gapping or it can be used to create freestanding tables.

Parallel

Perpendicular

Freestanding

edges

Flat Edge

On worksurfaces with Flat Edges, the Interpret Post or Y-Legs is installed flush to the edge.

Knife Edge

On worksurfaces with Knife Edges, the Interpret or Y-Legs are installed 1" inset from the edge.

planning with worksurface supports (continued)

worksurface mounting

Y-Leg with wood finish and the Interpret Style Leg, fixed height leg **should not** be used when mounting a worksurface to a hutch stacker as it could cause leveling issues.

Semi-Suspended

When planning with Y-Legs in a semi-suspended application, the metal finish should be specified as it allows for the height-adjustment range needed for leveling on uneven floors.

interpret style post leg

Handedness is determined by the location of the leg from the users perspective.

planning with worksurface supports (continued)

planning with end worksurfaces

End Worksurfaces are used to complete the ends of parallel planning applications. They function as shared collaborative surface on the end of runs and visually complete the end of the configuration.

End worksurfaces are offered in standard square corners (HTWG) or with a 3" radius (HTWZ).

End Worksurface Support Kit (HTWJ)

+

End Worksurface (HTWG)
End with Radius Corners Worksurface (HTWZ)

=

Complete Solution with End Worksurface

End Worksurface Support Kit (HTWJ) includes all required flush plates, reinforcement channels and an option of leg styles.

End Worksurfaces are sized to accommodate the 2" gap between the two parallel worksurfaces.

23" deep
worksurfaces

29" deep
worksurfaces

35" deep
worksurfaces

End Worksurface (HTWG)

The 16" deep End Worksurface can be used with 16" wide storage.

planning with worksurface supports (continued)

planning with dual perpendicular worksurfaces

The Dual Perpendicular Worksurface combines two worksurfaces, face to face, removing the cost of unnecessary middle legs. It also adds an accessory beam down the middle for the attachment of Interpret screens.

Dual Perpendicular Worksurfaces are offered with standard square corners or with a 2" radius.

Stage to Dual Worksurface Support Kit (HTWB)

+

Dual Perpendicular Worksurface (HTWV)
Dual Perpendicular with Radius Corner Worksurface (HTWW)

=

Complete solution with Dual Perpendicular Worksurface

Stage to Dual Worksurface Support Kit (HTWB) includes all required flush plates, reinforcement channels and option of leg styles.

Two options are available for wire management:

- Grommet cut outs
- 1/2" wire gap between the worksurface and the accessory rail

If the wire gap option is not desired, the worksurface is available with no gap

A wire gap enables the mounting of desk edge accessories such as edge mounted power bars and monitor arms

Standard Dual worksurface with no Wire Gap

- The worksurface will mount flush to the accessory beam
- Grommet cut-outs are recommended in this application

Standard Dual worksurface with Wire Gap

- The worksurface will have a 1/2" gap for wire management

understanding height-adjustable tables

Height adjustable tables can be integrated into upStage in a variety of ways. The follow provides a step by step understanding of the options available.

1 choose your application:

freestanding

- Both legs of height-adjustable table are exposed
- Allows for ease of reconfiguration

integrated with stage module

- One height-adjustable table leg is concealed in a stage module
- Ease of planning with smaller footprints

integrated with stage module and credenza

- One height-adjustable table leg is concealed in the stage module
- One height-adjustable table leg is concealed in a credenza
- Maximizes use of space with extra storage capabilities

understanding height-adjustable tables (continued)

There are two options in upStage height-adjustable tables:

- Navigate
- hiSpace

2 choose your height-adjustable table type:

navigate height-adjustable built-in tables

- Option of two types of base mechanisms:
 - Standard Range Electric
 - Extended-Electric-Restricted
- Leg styles:
 - Post Leg and T-Leg
 - T-Legs
 - T-Leg and Gable Leg
- Two worksurface styles:
 - Rectangular
 - Rectangular worksurface with Radius Corners
- Worksurface finishes:
 - Foundation Laminate, Flintwood and Natural Veneer
- Power and undersurface cable management options available

hiSpace height-adjustable built-in quickconnect tables

- Option of one type of base mechanism:
 - Extended Electric with Riser
- Leg styles:
 - T-Legs
- Two worksurface styles:
 - Rectangular
 - Rectangular worksurface with Radius Corners
- Worksurface finishes:
 - Foundation Laminate
- Power and undersurface cable management options available

upstage navigate height-adjustable table basics

upStage Navigate tables are available with a square or radius corner profile.

upStage Navigate Height-Adjustable Table with Double Stage Module (HTBD) for Height-Adjustable Table

Worksurface Finishes:
Foundation Laminate, Flintwood and Natural Veneer

Navigate worksurfaces are used with a coordinating Navigate height-adjustable base to create a complete table.

- Widths: 53", 59", 65", 71", 77" and 83" (actual)
- Depths: 25" and 30" (actual)
- Cut Out Styles:
 - None (no cut outs)
 - Rectangular (Diamond Shaped cut outs)

For more information about planning with IEC connection and height-adjustability, refer to Complements: *Teknion's Ergonomics & Accessories Program*.

Rectangular Height-Adjustable Worksurface (WBU)

- A height-adjustable worksurface with a rectangular corner profile
- Available in three different leg applications:
 - Two T-Leg
 - Two T-Leg (Left Leg in Corridor, Right Leg in Stage Module) (TML)
 - Two T-Leg (Right Leg in Corridor, Left Leg in Stage Module) (TMR)
 - Two T-Leg (Left Leg in Credenza, Right Leg in Stage Module) (TCL)
 - Two T-Leg (Right Leg in Credenza, Left Leg in Stage Module) (TCR)
 - T-Leg and Post Leg
 - T-Leg and Post Leg (Left Post in Credenza, Right Leg in Stage Module) (PTL)
 - T-Leg and Post Leg (Right Post in Credenza, Left Leg in Stage Module) (PTR)
 - Gable and T-Leg
 - Gable and T-Leg (Left Gable in Corridor, Right Leg in Stage Module) (GTL)
 - Gable and T-Leg (Right Gable in Corridor, Left Leg in Stage Module) (GTR)

Rectangular Height-Adjustable Worksurface with Radius Corners (WJU)

- A height-adjustable worksurface that have radius corner profile
- Available in two different leg applications:
 - Two T-Leg
 - Two T-Leg (Left Leg in Corridor, Right Leg in Stage Module) (TML)
 - Two T-Leg (Right Leg in Corridor, Left Leg in Stage Module) (TMR)
 - Two T-Leg (Left Leg in Credenza, Right Leg in Stage Module) (TCL)
 - Two T-Leg (Right Leg in Credenza, Left Leg in Stage Module) (TCR)
 - T-Leg and Post Leg
 - T-Leg and Post Leg (Left Post in Credenza, Right Leg in Stage Module) (TTL)
 - T-Leg and Post Leg (Right Post in Credenza, Left Leg in Stage Module) (TTR)

upstage navigate height-adjustable table basics (continued)

upStage Navigate tables are available with a square or radius corner profile.

upStage Navigate Height-Adjustable Table with Double Stage Module (HTBD) for Height-Adjustable Table

Base Finishes:
Foundation, Mica color or Accent

Navigate bases are used with a corresponding Navigate height-adjustable worksurface to create a complete table.

Base Mechanisms:

- Standard Range Electric (27" to 43")
- Extended Range Electric-Restrict Height (25" to 48.7")

Switch Styles:

- Standard Up/Down
- Display with Up/Down Memory
- Toggle Up/Down
- Display Toggle with Memory and Navigate GPS

Optional Under Surface Cable Manager

- Cable Organizer with or without felt cover
- Dual Plastic Tray with or without Power Bar

Optional Vertical Wire Carrier

- Optional Cross Chancel Integrated Powerbar

For more information about planning with IEC connection and height-adjustability, refer to Complements: *Teknion's Ergonomics & Accessories Program*.

Bases are handed, the handedness is determined by the location of the corridor, stage module, or credenza.

upStage Height-Adjustable Built-In Base (YGU)

- The Built-in Table Base size is determined by the size of the worksurface it is used with
- Widths: 53", 59", 65", 71", 77", 83" (actual)
- Depths: 25" and 30" (actual)
- Leg style:
 - Standard T-Leg (30" deep)
 - Standard T-Leg and Post Leg
- Available for following Leg Applications:
 - Two T-Leg (Left Leg in Corridor, Right Leg in Stage Module)
 - Two T-Leg (Right Leg in Corridor, Left Leg in Stage Module)
 - Two T-Leg (Left Leg in Credenza, Right Leg in Stage Module)
 - Two T-Leg (Right Leg in Credenza, Left Leg in Stage Module)
 - T-Leg and Post Leg (Left Post in Credenza, Right Leg in Stage Module)
 - T-Leg and Post Leg (Right Post in Credenza, Left Leg in Stage Module)

upStage Height-Adjustable Built-In Gable Base (YVU)

- The Built-in Base size is determined by the size of the worksurface it is used with
- Widths: 47", 53", 59", 65", 71", 77", 83" (actual)
- Depths: 30" (actual)
- Available for following Leg Applications:
 - Gable and T-Leg (Left Gable in the Corridor, Right Leg in the Stage Module)
 - Gable and T-Leg (Right Gable in the Corridor, Left Leg in the Stage Module)

upstage hispace height-adjustable table basics

upStage hiSpace Height-Adjustable Table with Double Stage Module (HTBD) for Height-Adjustable Table

Worksurface Finishes:
- Foundation Laminate

hiSpace worksurfaces are used with a coordinating hiSpace height-adjustable base to create a complete table.

- Widths: 53", 59", 65", and 71" (actual)
- Depths: 25" and 30" (actual)
- Cut Out Styles
 - None (no cut outs)
 - Rectangular (Diamond Shaped cut outs)

- Cut Out Styles:
 - None (no cut outs)
 - Center
 - Left
 - Right

For more information about planning with IEC connection and height-adjustability, refer to Complements: *Teknion's Ergonomics & Accessories Program*.

Rectangular Height-Adjustable Worksurface (WBA)

- A height-adjustable worksurface with a rectangular corner profile
- Available in four different T-leg applications:
 - Two T-Leg (Left Leg in Corridor, Right Leg in Stage Module) (TML)
- Two T-Leg (Right Leg in Corridor, Left Leg in Stage Module) (TMR)
 - Two T-Leg (Left Leg in Credenza, Right Leg in Stage Module) (TCL)
 - Two T-Leg (Right Leg in Credenza, Left Leg in Stage Module) (TCR)

Rectangular Height-Adjustable Worksurface with Radius Corners (WJB)

- A height-adjustable worksurface that have radius corner profile
- Available in four different T-leg applications:
 - Two T-Leg (Left Leg in Corridor, Right Leg in Stage Module) (TML)
- Two T-Leg (Right Leg in Corridor, Left Leg in Stage Module) (TMR)
 - Two T-Leg (Left Leg in Credenza, Right Leg in Stage Module) (TCL)
 - Two T-Leg (Right Leg in Credenza, Left Leg in Stage Module) (TCR)

upstage hispace height-adjustable table basics (continued)

upStage hiSpace Height-Adjustable
Table with Double Stage Module
(HTBD) for Height-Adjustable Table

Base Finishes:

- Platinum
- Very White
- Ebony

hiSpace bases are used with a corresponding hiSpace height-adjustable worksurface to create a complete table.

Base Mechanisms:

- Extended Electric with Riser (25" to 51.1")
- Display with Up/Down Memory

Optional Undersurface Cable Management:

- Cable Organizer with Felt Cover
- None
- Optional Cross Chancel Integrated Powerbar

For more information about planning with IEC connection and height-adjustability, refer to Complements: *Teknion's Ergonomics & Accessories Program*.

Bases are handed, the handedness is determined by the location of the corridor, stage module, or credenza.

upStage Height-Adjustable Built-In Base (YGU)

- The Built-in Table Base size is determined by the size of the worksurface it is used with
- Widths: 53", 59", 65", and 71" (actual)
- Depths: 25" and 30" (actual)
- Leg style: Standard T-Leg
- Available for following Leg Applications:
 - Two T-Leg (Left Leg in Corridor, Right Leg in Stage Module (TML)
 - Two T-Leg (Right Leg in Corridor, Left Leg in Stage Module (TMR)
 - Two T-Leg (Left Leg in Credenza, Right Leg in Stage Module (TCL)
 - Two T-Leg (Right Leg in Credenza, Left Leg in Stage Module (TCR)

planning with upstage height-adjustable tables

The following should be considered when planning with upStage Navigate and hiSpace Height-Adjustable tables.

cut outs and grommets

Grommets are used to direct wires to the underside of the desk so they can be plugged into an under worksurface power bar or directed to the Vertical Wire Carrier (YEEE) for plugging into a monument or power bar that is not on the desk.

Cut out locations:

- None
- Rectangular Center
- Rectangular Right
- Rectangular Left

Rectangle Grommet (HTEG) routes power through the worksurface to the Flexible Power Module specified on the stage and is ordered separately.

grommet options

Left, right and center cut out positions are available. Cut outs **cannot** be specified in the corridor side if credenzas are specified, to avoid wires or components interference. The following are cut out locations:

Rectangular Left Cut Out Location

Rectangular Center Cut Out Location

Rectangular Right Cut Out Location

Rectangular Left Cut Out Location

Rectangular Center Cut Out Location

Rectangular Right Cut Out Location

planning with upstage height-adjustable tables (continued)

height-adjustment range

Standard Electric

- Minimum Height: 27"
- Maximum Height: 43"

Extended Electric - Restricted

- Minimum Height: 25"
- Maximum Height: 48.7"
- Minimum height is restricted so it does not interfere with a credenza or stage module

hiSpace Extended Electric - Riser

- Minimum Height: 25"
- Maximum Height: 51.1"

upstage height-adjustable table leg integration

upStage Height Adjustable tables must always have one leg integrated into a stage module with the other leg integrated into the credenza or on the corridor. There are four options for upstage height-adjustable leg integration:

T-Leg and Corridor (TMR/TML)

- Two T-Legs
- One Leg is integrated into the stage module and the other leg exposed
- Accommodates worksurface depths of 25" and 30"

T-Leg and Credenza (TCR/TCL)

- Two T-Legs
- One Leg is integrated into the stage module and the other leg is integrated into one of the following credenzas:
 - Double Credenza for HA Table (HTSCC)
 - Triple Credenza for HA Table (HTSCP)
- Accommodates worksurface depths of 30" only

Post and T-Leg (PTR/PTL)

- One T-Leg and one Post Leg
- The T-Leg is integrated into the stage module and the Post leg is integrated into one of the following Elevated Credenzas:
 - Height-Adjustable Integrated Double Credenza (HTSCD) or,
 - Height-Adjustable Integrated Triple Credenza (HTSCP)
- Accommodates worksurface depths of 30" only

Gable and T-Leg (GTR/GTL)

- This application is only available on Navigate Height-adjustable built-in tables
- One Gable and one T-Leg
- The T-Leg is integrated into the stage module and the gable is exposed on the corridor side
- Accommodates worksurface depths of 30" only

planning with upstage height-adjustable tables (continued)

handedness

upstage Height-Adjustable worksurfaces are specified right or left handed. Handedness is determined by the user's point of view, sitting at the desk. The worksurface has an overhang which is always on the corridor side and determines the handedness of the worksurface.

Right handed worksurface, overhang to the corridor side on right

Left handed worksurface, overhang to the corridor side on left

To plan a right handed layout; Worksurface, Base, Stage Module, Credenza and Screens - all have to be specified right handed.

right handed workstation layout

Right handed

- upStage Height-Adjustable Table - Right Handed
- Single Stage Module for Height-Adjustable Table - Right Handed
- upStage Credenza for Height-Adjustable Table - Right Handed

left handed workstation layout

Left handed

- upStage Height-Adjustable Table - Left Handed
- Stage Module for Height-Adjustable Table - Left Handed
- upStage Credenza for Height-Adjustable Table - Left Handed

planning with upstage height-adjustable tables (continued)

switches

There are four switches available when specifying the upStage Navigate Height-Adjustable Built-In Base.

- Navigate
 - Standard Up/Down
 - Display with Up/Down Memory
 - Toggle Up/Down
 - Display Toggle with Memory & Navigate GPS
- hiSpace
 - Display with Up/Down Memory
 - Toggle with Display Memory

wire management

power bars

There is an optional Cross Channel Integrated Power Bar which is mounted under the worksurface in the cross channel.

- Available on worksurfaces with 53" - 83" widths
- Includes four outlets and one internal cord to provide power both the table controls and the power bar

If no Cross Channel Integrated Power Bar is specified, a cover plate will be provided.

power pack on hiSpace

There is an optional power pack integrated with Cable Organizer with felt cover.

- Available on worksurfaces 53" - 71"

planning with upstage height-adjustable tables (continued)

under surface cable manager

The following under surface are available for upStage Navigate and hiSpace Height-Adjustable Built-In bases:

- Navigate
 - None
 - Cable organization with felt cover (Only available on worksurface depths 30')
 - Cable organization with no cover
 - Dual Plastic Trays and Power Bar
 - Dual Plastic Trays
- hiSpace
 - None
 - Dual Plastic Trays and Power Bar
 - Dual Plastic Trays

None

Cable organization with felt cover (Only available on worksurface depths 30')

Cable organization with no cover

Dual plastic trays, power bar and under surface mount

Dual plastic trays

vertical wire carrier

Vertical Wire Carriers are an option on upStage Navigate and hiSpace Height-Adjustable Built-In Bases:

- None
- Vertical Wire Carrier

stage module for height-adjustable table basics

The Stage Module for Height-Adjustable Table provides built-in single- or double-sided height-adjustable tables.

Base Finishes:
Source Laminate, Flintwood and Natural Veneer
Front Finishes:
Source Laminate, Flintwood and Natural Veneer
Metal Finishes:
Foundation, Mica and Accent colors

- Connects to any Beginning, End or Complete Stage for integration of Height-Adjustable Tables
- An integrated option is available on Navigate tables that allows the leg to be concealed into the Stage Module
- Widths: 30", 36" and 42"
- Height: 21"
- Depth: 16"
- Available with an optional Accessory Beam to maintain a continuous look and functionality with other Stages
- Available with Infeed Grommet options. Options:
 - One Grommet
 - Two Grommets
 - No Grommets
- Stage connectors are provided with Stage Modules in order to connect them to the End Gables on the Stage.

Single Stage Module for Height-Adjustable Table (HTBH)

- Used when a Height-Adjustable Table is used on one side only
- Handedness is determined by the location of the table

Double Stage Module for Height-Adjustable Table (HTBD)

- Used when a Height-Adjustable Table is used on both sides of the Module
- Is not handed

planning with stage module for height-adjustable tables

The following should be considered when planning with Stage Modules for Height-Adjustable tables.

handedness

Handedness, when applicable, is determined by the worksurface overhang which will always be on the corridor side

Single stage modules for Height-Adjustable Tables are handed, The handedness is determined by the location of the cut out on the module from the users perspective

Single-sided modules must be specified left or right and cannot be rotated

Right handed

- upStage Height-Adjustable Navigate Table - Right Handed
- Single Stage Module for Height-Adjustable Table - Right Handed
- upStage Credenza for Height-Adjustable Table - Right Handed

Left handed

- upStage Height-Adjustable Navigate Table - Left Handed
- Stage Module for Height-Adjustable Table - Left Handed
- upStage Credenza for Height-Adjustable Table - Left Handed

Double-sided stage modules for Height-Adjustable Tables are non-handed

Since the product is shipped unassembled, handedness is determined during assembly for double-sided modules

planning with stage module for height-adjustable tables (continued)

leg grommet

The movable leg grommet accommodates multiple positions of the upStage Navigate or hiSpace height-adjustable table leg within the module based on screen type and planning application.

When planning back-to-back with height-adjustable tables and credenza, the leg cut out allows screens to be added in the future without disassembling the whole layout.

planning with stage module for height-adjustable tables (continued)

stage modules with leg integration and vertical wire carrier

The Stage Module for Height-Adjustable Table is complete with an offset cut out for the upStage height adjustable table leg to be recessed into the module. When the unit is closed, the leg and Vertical Wire Carrier will be concealed.

stage modules with wire management

The above worksurface power for monitors, lights etc. should be routed through a cut out with Grommet (HTEG) and plugged into an under worksurface Power Bar (see Complements: *Teknion's Ergonomics & Accessories Program*). It is routed through a cable tray and then to the Vertical Wire Carrier Vertical Cable Manager, Navigate for upStage Built-In Stage (YEEE11) to the interior of the module, so that no cables are visible.

connecting stage modules for height-adjustable tables to stage modules with stage connectors

- The Stage Module for Height-Adjustable Table connects to the End Gables on the stage using the Stage Connector that is included. It cannot be mounted to a Mid Gable
- The Infeed Grommet option allows electrics to pass through to the stage. The Infeed Grommet option must be selected on the adjacent Stage if power routing is required through to the Module
- When one Infeed Grommet is specified, Stage module will include one Stage Connector. When two, Infeed Grommets are specified, it will include two Stage Connectors

stage module for height-adjustable table

power distribution basics

Power and Data are distributed through the Stage Module for Height-Adjustable Table with Power Modules and Communication Boxes.

Power Module for Height-Adjustable Stage (HTEPM)

- Mounts inside of the Stage Module for Height-Adjustable Table to accommodate the mounting of receptacles
- Wire system available:
 - 8-Wire Isolated Ground (8T)
 - 8-Wire Dual Isolated (8K)
- Mounting brackets included and available in Black only
- Outlets must be ordered separately and can be mounted to one or both sides of the Power Module for Single or Double Sided application
- See *Power Access Basics* page for Outlet details

Communication Box (HTECB)

- The Communication Box is used on the Stage Module for Height-Adjustable Tables to accommodate data modules
- Opening measures 2.71" x 1.38" to accommodate Voice/Data jacks and faceplates (not included)
- Finished in Platinum

Chicago Power Box for Height-Adjustable Stage Module (HTEPMC)

- Mounts inside of the Stage Module for Height-Adjustable Table to accommodate the mounting of receptacles in Chicago applications
- Available Single or Double Sided

planning with stage module for height-adjustable table power access

The following should be considered when planning with Stage Module for Height-Adjustable Table Power Access.

power routing to module for height-adjustable table

The Power Module for Height-Adjustable Stage mounts 6" off center and mounts to the underside of the Stage Module for Height-Adjustable Table Surface. The harness attaching to the module must be a minimum of half the length of the connecting Stage plus the remaining length determined by size and direction of the Module.

Example 1

15" from left side of the Power Module for Height-Adjustable Stage + half the length of the connecting Stage (42") = 57" length (round up to 60" harness).

60" long harness required

planning with stage module for height-adjustable table power access (continued)

power routing to module for height-adjustable table

The Power Module for Height-Adjustable Stage mounts 6" off center and mounts to the underside of the Stage Module for Height-Adjustable Table Surface. The harness attaching to the module must be a minimum of half the length of the connecting Stage plus the remaining length determined by size and direction of the Module.

Example 2

3" from right side of the Height-Adjustable Power Module + half the length of the connecting Stage (42") = 45" length (round up to 48" harness).

48" long harness required

I-Connectors and Four-Way Splitters are not required when planning with the Power Module for Height-Adjustable Stage.

Each power module has two ins and two outs and can be used in combination with Flexible Power Module.

When connecting the Simple Stage to a Height-Adjustable Module, ensure 3" of harness can reach into the Height-Adjustable Module.

credenza for height-adjustable table basics

Credenzas for Height-Adjustable Tables are available in a double and triple configuration and accommodate the leg of upStage Height-Adjustable Tables.

Triple Credenza for Height-Adjustable Table

- Height is 21" high and depth is 16"
- Power and Data cannot be passed through Credenzas, it must route to Stage side
- upStage Navigate and hiSpace Height-Adjustable Tables can be used with these credenzas
- Orientation is determined from users perspective, sitting at the desk

Double Credenza for Height-Adjustable Table (HTSCC)

- Widths: 48", 54" and 60"
- Configurations:
 - Box/Box
 - File
 - Hinged door
- Do **not** require counterweights

Height-Adjustable Integrated Double Credenza (HTSCD)

- Widths: 48" and 54"
- Configurations are specified left to right:
 - Box/Box
 - File
- Do **not** require counterweights

Triple Credenza for Height-Adjustable Table (HTSCT)

- Widths: 66" and 72"
- Hinged Door is always positioned at the outer end of the credenza with drawers being placed in the middle section
- Do **not** require counterweights

Height-Adjustable Integrated Triple Credenza (HTSCP)

- Widths: 54", 60", 66" and 72"
- Configurations are specified left to right:
 - Hinged Door/File (HF)
 - Hinged Door, Box/Box (HB)
 - File, Box/Box (FB)
- Do **not** require counterweights

planning with credenzas for height-adjustable tables

The following should be considered when planning with Credenzas for Height-Adjustable Tables.

Credenzas for height-adjustable tables have cut-outs and metal grommets to match upStage Navigate and hiSpace height-adjustable tables.

If an upStage Navigate or hiSpace Height-Adjustable Table is specified with T-Legs and Credenza (TCR/TCL), you can choose between the Double Credenza for Height-Adjustable Table (HTSCC) and the Triple Credenza for Height-Adjustable Table (HTSCT).

Double Credenza for Height-Adjustable Table (HTSCC)

Triple Credenza for Height-Adjustable Table (HTSCT)

These two non-elevated credenzas hide a T-Leg foot. The storage starts right after the worksurface.

If the upStage Navigate Height-Adjustable Table is specified with Post and T-Legs (PTR/PTL), you can choose between the Height-Adjustable Integrated Double Credenza (HTSCD) and the Height-Adjustable Integrated Triple Credenza (HTSCP).

Height-Adjustable Integrated Double Credenza (HTSCD)

Height-Adjustable Integrated Triple Credenza (HTSCP)

These two elevated credenzas hide a Post Leg. The storage tucks under the worksurface.

The Post Leg can be leveled through two standard levelers which work independently from the credenza

Height-Adjustable Integrated Double Credenza (HTSCD) and the Height-Adjustable Integrated Triple Credenza (HTSCP) are compatible with 30" deep upStage worksurfaces only.

25" upStage Navigate worksurface.

30" upStage Navigate worksurface.

planning with credenzas for height-adjustable tables (continued)

It is recommended that 65", 71", 77" and 83" wide Rectangular Height-Adjustable Worksurface for upStage Navigate (WBU or WJU) be specified for enough clearance between credenza and stage.

53" worksurface

59" worksurface

65" worksurface

71" worksurface

77" worksurface

83" worksurface

It is recommended to plan with a grommet over the non-credenza side of a worksurface to avoid pinching wires and component interference.

planning with credenzas for height-adjustable tables (continued)

Power and data should always be routed through the stage side, not through the credenza side. If an Vertical Wire Carrier is specified, it must be specified to the non-credenza side.

Credenza will not fit under the stage. Height-Adjustable worksurface cannot overlap edge.

planning with credenzas for height-adjustable tables (continued)

hutches and stackers

Hutches and stackers must be 6" shorter than available space to provide adequate clearance between height adjustable worksurface and stationary hutch or stacker.

workstation footprint

Workstations planned with stage and credenza are 1" wider and 1" - 3" deeper than standard footprint. For example, a 6'x6' workstation planned with a credenza will have a width of 73" and a depth of 73" - 75".

When planning face to face workstations with credenzas additional space is required between desks for screens and pinch gap (minimum 1")

Credenzas are not recommended for parallel planning as there are not enough space for circulation path.

The overhang of the worksurface is 1" after the credenza edge. Worksurface edge will always be 2" offset inside from the center of the stage when leg is installed in stage module.

The width will be determined by the worksurface.

Depth of the worksurface is determined by screens used and the pinch gap required. The minimum 1" pinch point clearance is provided between screens to avoid pinch and accommodating cable routing. The gap between worksurface and screen will be 1/2".

planning with credenzas for height-adjustable tables (continued)

handedness

Handedness is determined from users point of view, in which side they are sitting at the desk.

All credenzas for upStage Height-Adjustable Tables are available with right to left handedness.

Credenza configuration must be specified left to right.

Left handed Height-Adjustable
Integrated Double Credenzas
(HTSCD)

Left handed Height-Adjustable
Integrated Triple Credenza (HTSCP)

Left handed Double Credenza for
Height-Adjustable Table (HTSCC)

Left handed Triple Credenza for
Height-Adjustable Table (HTSCD)

Right handed Height-Adjustable
Integrated Double Credenzas
(HTSCD)

Right handed Height-Adjustable
Integrated Triple Credenza (HTSCP)

Right handed Double Credenza for
Height-Adjustable Table (HTSCC)

Right handed Triple Credenza for
Height-Adjustable Table (HTSCD)

planning with height-adjustable tables, credenzas and screens

upStage height adjustable worksurfaces and credenzas provide sufficient clearance for screens applications.

upStage hiSpace and Navigate Rectangular Height-Adjustable Worksurfaces for will have 2" overhang on the non-user side and 1" overhang on the corridor side. After integrating the upStage credenza, upStage hiSpace and Navigate Rectangular Height-Adjustable Worksurfaces will have 1" overhang on front and side, which avoids the conflict between credenza and screen.

planning with credenzas for height-adjustable tables (continued)

maximum width of screen

There should be a 1" pinch gap between the stage module and a screen used with a height-adjustable work surface. The illustrations below show the maximum width of the screens that can be used with a height-adjustable work surface.

Centered Screens

- 83" wide height-adjustable table = maximum screen width is 66"
- 77" wide height-adjustable table = maximum screen width is 60"
- 71" wide height-adjustable table = maximum screen width is 54"
- 65" wide height-adjustable table = maximum screen width is 48"
- 59" wide height-adjustable table = maximum screen width is 42" (credenzas not recommended with 59" worksurface)
- 53" wide height-adjustable table = maximum screen width is 36" (credenzas not recommended with 53" worksurface)

Corridor Justified Screens

- 83" wide height-adjustable table = maximum screen width is 72"
- 77" wide height-adjustable table = maximum screen width is 68"
- 71" wide height-adjustable table = maximum screen width is 62"
- 65" wide height-adjustable table = maximum screen width is 56"
- 59" wide height-adjustable table = maximum screen width is 50" (credenzas not recommended with 59" worksurface)
- 53" wide height-adjustable table = maximum screen width is 44" (credenzas not recommended with 53" worksurface)

Infinity Curved Screens

- 83" wide height-adjustable table = maximum screen width is 59"
- 77" wide height-adjustable table = maximum screen width is 59"
- 71" wide height-adjustable table = maximum screen width is 59"
- 65" wide height-adjustable table = maximum screen width is 53"
- 59" wide height-adjustable table = maximum screen width is 47" (credenzas not recommended with 59" worksurface)
- 53" wide height-adjustable table = maximum screen width is 41" (credenzas not recommended with 53" worksurface)

meeting tables

meeting tables

MEETING TABLES OVERVIEW 110

MEETING TABLES BASICS. 112

PLANNING WITH MEETING TABLES ELECTRICS 113

meeting tables overview

The following layouts could be considered when planning with upStage meeting tables.

meeting tables overview (continued)

The following are examples of upStage meeting tables with electrics.

meeting tables basics

The following outlines the features of upStage Meeting Tables.

upStage Rectangular Meeting Table
(HTMR)

- A freestanding table featuring Y-Legs
- Y-Legs are available in two finish options:
 - Wood and Metal (upper support metal and lower support wood)
 - Metal and Metal (upper and lower supports metal, can specify different metal finishes)
- Wood and Metal option offers an adjustment range of $+1/2"$ to $-1/2"$
- Metal and Metal option offers an adjustment range of $+2"$ to $-1"$
- Available without casters only
- Worksurface Corner style is available in Straight Corner or Radius Corner
- Metal finishes are Foundation, Mica and Accent colors
- Wood support finishes are Flintwood and select Natural Veneer coordinates
- Worksurface finishes are Foundation Laminate, Grade 2 Laminate, Flintwood and Natural Veneer
- Edge Trim finishes for Worksurface: PVC with HPL surface only, Acrylic with HPL, Flintwood edge trim defaults to Flintwood surface finish, Natural Veneer edge trim defaults to Natural Veneer surface finish

upStage Rectangular Meeting Table (HTMR)

- Widths: 60" - 96" (6" increments)
- Depths: 42", 48"
- Electric cut out options:
 - None (NN)
 - One- 7" Compact Recessed Access Door (AB)
 - Two- 7" Compact Recessed Access Door (2B)
 - One- 12" Standard Recessed Access Door (AF)
 - One- Dual Flush Power Module Cut Out (AH)
 - Two- Dual Flush Power Module Cut Out (2H)
 - One- Triple Flush Power Module Cut Out (AJ)
 - Two- Triple Flush Power Module Cut Out (2J)
- All electric modules must be ordered separately, refer to the Electrics and WE Connect Sections in *Complements: Teknion's Ergonomics & Accessories Program*
- If (2B), (2H) or (2J) are specified you must order the electrics from WE Connect Sections in *Complements: Teknion's Ergonomics & Accessories Program*

upStage Square Meeting Table (HTMS)

- Depths: 42", 48", 54", 60"
- Electric cut out options:
 - None (NN)
 - 7" Compact Recessed Access Door (AB)
 - Dual Flush Power Module Cut Out (AH)
 - Triple Flush Power Module Cut Out (AJ)
- All electric modules must be ordered separately, refer to the Electrics Section in *Complements: Teknion's Ergonomics & Accessories Program*

upStage Round Meeting Table (HTMC)

- Diameters: 48", 54", 60"
- Electric cut out options:
 - None (NN)
 - 7" Compact Recessed Access Door (AB)
 - Dual Flush Power Module Cut Out (AH)
 - Triple Flush Power Module Cut Out (AJ)
- All electric modules must be ordered separately, refer to the Electrics Section in *Complements: Teknion's Ergonomics & Accessories Program*

planning with meeting tables electrics

The following is an example of two Flush Power Modules linked through WE Connect, refer to the Electrics and WE Connect Sections in *Complements: Teknion's Ergonomics & Accessories Program*.

wire management

If electrics are specified for Square, Circular or tables less than 72" widths, one Excess Wire Manager and one Power Cable Manager are included.

If electrics are specified for larger tables, 78" - 96" widths, two Excess Wire Managers and two Power Cable Managers are included.

planning with meeting tables electrics (continued)

grain direction

Power Modules are always in line with grain direction.

understanding screens

upStage offers a variety of screens at varying heights and available in multiple materials. The screens provide various levels of casual privacy and functionality.

casual screens

- Casual Screens mount to the Accessory Beam on the Stage to provide space division
- Available in six styles:
 - Glass
 - Solid
 - Thick Solid
 - Solid with Glass
 - Infinity
 - Framed
- Solid and Thick Solid Screens with rail can accommodate hanging accessories

desk edge screens

- Mounts on-or off-module to the edge of single return worksurfaces
- Creates space division and local desktop privacy at various heights
- Desk Edge Screens are available in six styles:
 - Glass
 - Solid
 - Solid with Glass
 - Infinity
 - Framed
 - Smooth Felt Desk Edge Screens
- Smooth Felt Screen with a lightweight aesthetic
 - Available in Complements: *Teknion's Ergonomics & Accessories Program*

infinity desk edge screens

- Attaches to worksurfaces to provide a lightweight, thin upholstered fabric screen
- Provides privacy at 42"h, 51"h and 57"h
- Provides a softer curvilinear aesthetic
- Creates space division and local desktop privacy at various heights
- Available in four styles:
 - Curved
 - Desk Edge
 - Quilted
 - Side Desk Edge

framed fabric desk edge screens

- Attaches to worksurfaces to provide an upholstered fabric screen
- Provides privacy at 42"h, 51"h and 57"h
- Is outlined by a frame
- Creates space division and local desktop privacy at various heights
- Above and below the workspace
- Available in two styles:
 - Desk Edge
 - Side Desk Edge

understanding screens (continued)

solid lateral screens

- Solid Lateral Screens mount perpendicular to the spine to provide space division
- Available in two styles:
 - Solid
 - Solid with Glass
- Various heights available to match datum heights along screens and storage on the stage

lateral screens

- Lateral Screens attach to the worksurface to provide lateral space division
- Available with a straight/curved profile
- Five different finishes available:
 - Glass
 - Writable solid surface
 - Smooth Felt
 - Fabric
 - Metal

functional screens

- Functional Screens are a panel like structure with fascias that provide privacy and functionality
- Functional Screen fascia finishes available:
 - Fabric
 - Whiteboard
 - Accessory Fascias
 - Glass Add-ons

casual screen basics

Casual Screens mount to the Accessory Beam on the Stage to provide space division.

Metal and Hardware Frame Finishes:
Foundation, Mica and Accent colors
Solid Finishes:
Source Laminate, Flintwood and Natural Veneer
Glass Finishes:
Clear and Frost
Fabric Finishes:
All Teknion Standard Panel Fabrics

Casual Glass Screen (HTNX)

- Provides glass space division along the Accessory Beam of the stage
- Heights:
 - 21" high for a 42" high datum
 - 30" high for a 51" high datum
- Widths: 24" - 96" in 6" increments
- Available in 6mm or 10mm
- 6mm is not available on 30" high Screen

Casual Solid Screen (HTND)

- Provides solid space division along the Accessory Beam of the stage
- Available with or without Accessory Rail at the top
- Heights:
 - 21" high for a 42" high datum
 - 30" high for a 51" high datum
- Widths: 24"-96" in 6" increments

Casual Thick Solid Screen (HTNJ)

- Provides solid space division along the Accessory Beam of the stage
- Available with or without Accessory Rail at the top
- Heights:
 - 21" high for a 42" high datum
 - 30" high for a 51" high datum
 - 36" high for a 57" high datum
- Widths: 24" - 96" in 6" increments
- Available with three alignment options:
 - Without Alignment
 - With In-Line Alignment
 - End Alignment

Casual Thick Solid Screen with Glass (HTNK)

- Provides solid space division along the Accessory Beam of the stage
- Heights:
 - 51" (42" plus 9" glass)
 - 57" (48" plus 9" glass)
- Widths: 24"-96" in 6" increments
- Available with three alignment options:
 - Without Alignment
 - With In-Line Alignment
 - End Alignment

Casual Infinity Screen (GXAU)

- Provides solid space division along the Accessory Beam of the stage or on worksurface
- Heights:
 - 21" high for a 42" high datum
 - 30" high for a 51" high datum
- Widths: 24"-72" in 6" increments
- Applications:
 - Stage Mount
 - Worksurface Mount

Casual Framed Fabric Screen (HTNB)

- Provides tackable fabric space division along Accessory Beam of the stage
- Heights:
 - 13" high for a 42" high datum Worksurface Mount
 - 21" high for 42" high datum Stage Mount
 - 22" high for 51" high datum Worksurface Mount
- Widths: 24" - 72" in 6" increments
- Applications:
 - Stage Mount
 - Worksurface Mount

planning with casual screens

The following should be considered when planning with Casual Screens.

casual screen datum heights

- Casual Screens match standard Teknion datum heights of 42", 51" and 57" when mounted on the stage
- Alignment clips are provided

casual thick solid screens

- Casual Thick Solid Screens can be specified with or without alignment holes for added stability for longer runs
- When multiple screens are ganged together, alignment kits are supplied

- No Alignment
 - No Alignment holes
 - Two end caps
- With In-Line Alignment
 - Alignment holes both sides
 - No End Caps
- End Alignment, holes one side, one end cap
 - Alignment holes one side
 - No End Caps

Casual Thick Solid Screens, 42", 51" and 57" datum heights can be placed along the stage side by side.

planning with casual screens (continued)

casual thick solid screens with accessories

- Sit and Slide Screens with Accessories (JNSSE) can be used on a casual thick solid screen without a accessory rail
- The datum heights are 44" and 53" and cannot be used on any other screen type
- Casual Solid Screens and Casual Thick Solid Screens with an accessory rail can accommodate
 - Personal Organizers (PAX)
 - fx Accessories (with the exception of the fx Letter Tray (YFXY))
- The accessory rail can accept up to a 5 lb load

Sit and Slide Screens with Accessories (JNSSE)

Personal Organizers (PAX) and fx Accessories

casual infinity and framed screens

- Casual Infinity and Casual Framed Screens can be specified side by side on a stage
- When Casual Infinity Screens are ganged together, Infinity Screen Alignment Clip (GXCC) must be specified separately

Casual Infinity Screens (GXAU)

Casual Framed Fabric Screens (HTNB)

desk edge screen basics

Desk Edge Screens mount to worksurfaces on- and off-module to provide privacy.

glass and solid desk edge screens

Metal and Hardware Finishes:

Foundation, Mica and Accent colors

Solid Finishes:

Source Laminate, Flintwood and Natural Veneer

Glass Finishes:

Clear and Frost

Fabric Finishes:

All Teknion Standard Panel Fabrics

Glass Desk Edge Screen (HTNG)

- Heights above worksurface:
 - 13" for a 42" high datum
 - 22" for a 51" high datum
 - 28" for a 57" high datum
- Modesty Base Heights:
 - Modesty Height (15")
- Widths:
 - 30" - 66" in 6" increments
- Glass thickness is 6mm or 10mm
- Provides privacy at 42", 51 and 57" height

Solid Desk Edge Screen (HTNS)

- Heights above worksurface:
 - 0" for a 29" high datum
 - 13" for a 42" high datum
 - 22" for a 51" high datum
 - 28" for a 57" high datum
- Modesty Base Heights:
 - Partial Modesty Height (23")
 - Modesty Height (15")
 - Elevated Height (6")
 - Floor Height (1")
- Available widths:
 - 30" - 66" in 6" increments
- Available with or without an Accessory Rail along the top
- If 0" (29" high) is specified the Accessory Rail is not available
- Provides privacy at 42", 51 and 57" height

desk edge screen basics (continued)

infinity desk edge screens

Infinity Curved Desk Edge Screen (GXCU)

- A curved fabric screen that mounts to a radius corner workspace
- Depths: 20"
- Widths:
 - 23", 29", 35", 41", 47", 53" and 59"
- Optional wire manager

Infinity Desk Edge Screen (GXDU)

- A fabric screen that mounts to the edge of a workspace
- Widths:
 - 36" to 71" in 1" increments
- Optional wire manager

Quilted Infinity Desk Edge Screen (GQDU)

- A quilted fabric screen that mounts to the edge of a workspace
- Widths:
 - 36" to 66" in 1" increment and 71"
- Optional wire manager

Infinity Side Desk Edge Screen (GXSU)

- A fabric screen that mounts to the side edge of a workspace
- Widths:
 - 17", 18", 23", 24", 29", 30", 31", 35", 36", 42", 48", 60" and 72"

Infinity Screen Alignment Clip (GXCC)

- Used to clip Infinity screens together in side-by-side applications

desk edge screen basics (continued)

framed desk edge screens

Framed Side Desk
Edge Screen

Framed Fabric Desk
Edge Screen

Framed Fabric Desk Edge
Screen, Floor Height

- Square Corners
- Tackable
- 1" Thickness
- Tight fit corner application
- Select Panel Fabric and Upholstery Fabric available for application.
See *Teknion's Fabrics & Finishes Program* for more information

Metal and Hardware Finishes:
Foundation, Mica and Accent colors
Solid Finishes:
Source Laminate, Flintwood and Natural Veneer
Glass Finishes:
Clear, Frost and Satin
Fabric Finishes:
All Teknion Standard Panel Fabrics

Framed Fabric Desk Edge Screen (HTNF)

- Heights above worksurface:
 - 13" for a 42" high datum
 - 22" for a 51" high datum
 - 28" for a 57" high datum
- Modesty Base Heights:
 - Modesty Height (15")
 - Elevated Height (6")
 - Floor Height (1")
- Widths:
 - 36" to 72" in 1" increments
- If Floor Modesty Base Height is specified, 22" high for a 51" datum is not available
- Provides privacy at 42", 51 and 57" height

Framed Side Desk Edge Screen (GYSU)

- Heights above worksurface:
 - 13" for a 42" high datum
 - 22" for a 51" high datum
- Modesty Base Heights: Modesty Height (15")
- Depths: 20"
- Widths:
 - 23", 29", 35", 41", 47", 53" and 59"
- Provides privacy at 42", 51 and 57" height

desk edge screen basics (continued)

smooth felt desk edge screens

Smooth Felt Desk Edge Screen shown

Smooth Felt Side Desk Edge Screen shown

The Smooth Felt Screens can be used on upStage worksurfaces.
They are available in Complements: *Teknion's Ergonomics & Accessories Program*

Smooth Felt Desk Edge Screen (GZDH)

Smooth Felt Side Desk Edge Screen (GZSH)

Smooth Felt Curved Radius
Desk Edge Screen (GZCH)

Smooth Felt Square Corner
Desk Edge Screen (GZBH)

planning with desk edge screens

The following should be considered when planning with upStage Desk Edge Screens.

The following are all of the possible datum and modesty heights for Desk Edge Screens.

Refer to each individual screen for the list of specific heights available for that screen.

For 15" high Desk Edge Screens on worksurfaces semi-suspended from the stage or freestanding, it is recommended that the Screens be centered and be minimally 16" smaller than the worksurface to avoid interference with the stage.

For Desk Edge Screens for worksurfaces semi-suspended from storage or a hutch, screens can be flush with the worksurface edge. If the width is shorter than the worksurface width, it is recommended that it be centered on the worksurface.

When Partial Modesty Height is specified, Solid Desk Edge Screens can be specified the full width of the worksurface as they will not interfere with the stage.

planning with desk edge screens (continued)

infinity screens

The following applications are available when planning with infinity screens.

Desk Edge Screen

Side Desk Edge Screen

Curved Desk Edge Screen

Desk Edge Floor Screen

Side Desk Edge Floor Screen

Infinity Screen widths are nominal.

- The actual width is 1/4" less on each side

When two screens are planned side by side, there will be a 1/2" gap between the two screens.

- Screen Alignment Clips (GXCC) are used to align the two parallel screens

Infinity screens have no physical connection at corners. They are a casual fit.

The brackets on infinity screens will always have a common bracket placement of 4 1/2" from either edge

There are two types of patterns available when planning with the Quilted Infinity Desk Edge Screens:

Diode

Pico

planning with desk edge screens (continued)

Infinity Desk Edge Screens (GXDU) can be attached to worksurfaces in the following applications.

Worksurface with Stage Module or Credenza

Worksurface with Hutch Stacker

Freestanding Worksurface

Infinity Desk Edge Screens should only be placed on worksurfaces mounted perpendicular to the stage.

Two leg styles can be used with the Infinity Desk Edge Screen:

- Y-Leg (HTWD) (shown)
- Interpret Leg (HTWN)

planning with desk edge screens (continued)

The following should be considered when planning with Infinity Desk Edge Screens:

Perpendicular Worksurface (HTWP) with Infinity Desk Edge Screen (GXDU).

Perpendicular with Radius Corner Worksurface (HTWH) with Infinity Curved Desk Edge Screen (GXCU).

planning with desk edge screens (continued)

Infinity Side Desk Edge Screens can be planned at both partial and full depth.

24" deep workspace with
24" deep Infinity Side Desk Edge Screen (GXSU).

30" deep workspace with
30" deep Infinity Side Desk Edge Screen (GXSU).

36" deep workspace with
36" deep Infinity Side Desk Edge Screen (GXSU).

24" deep workspace with
18" deep Infinity Side Desk Edge Screen (GXSU).

30" deep workspace with
24" deep Infinity Side Desk Edge Screen (GXSU).

36" deep workspace with
30" deep Infinity Side Desk Edge Screen (GXSU).

Infinity Desk Edge Screens offer an optional wire manager that accompanies the bracket connection

- The gap will always be 1/2"
- A continuous trough allows for cable management
- The trough can accommodate a Power Rod (YEPD) or Power Bar (YEPS). Available from Complements: *Teknion's Ergonomics & Accessories Program*

planning with desk edge screens (continued)

framed fabric screens

The following applications are available when planning with framed fabric screens.

Side Desk
Edge Screen

Accessory Beam
Mount Screen

Desk Edge
Floor Screen

Side Desk Edge
Floor Screen

Framed Fabric Screen widths are actual and will be same width as worksurface.

Framed Fabric Screens are always the width of the worksurface, there are no gaps. When planning in-line, no alignment clips are required. It will be a tight fit but not physically connected.

The screen mounts 1/2" from the worksurface.

Framed Fabric Screens are physically connected at a corner. It is not a casual collection.

The brackets on framed fabric screens will always have a common bracket placement of 10 3/8" from either edge

Framed Desk Edge Screens (GYSU) can be attached to worksurfaces in the following applications:

Worksurface with Stage Module or Credenza

Worksurface with Hutch Stacker

Freestanding Worksurface

planning with desk edge screens (continued)

The following should be considered when planning with Framed Desk Edge Screens:

Perpendicular Worksurface (HTWP) with Framed Fabric Desk Edge Floor Screen (GYFU).

Two leg styles can be used with the Framed Side Desk Edge Screens:

- Y-Leg (HTWD) (shown)
- Interpret Leg (HTWN)

desk edge floor screen basics

Desk Edge Floor Screens mount to worksurfaces and provide full-height privacy.

Metal and Hardware Finishes:
Foundation, Mica and Accent colors
Solid Finishes:
Source Laminate, Flintwood and Natural Veneer
Glass Finishes:
Clear, Frost and Satin
Fabric Finishes:
All Teknion Standard Panel Fabrics

Infinity Desk Edge Floor Screen (GXFU)

- Heights above worksurface:
 - 13" for a 42" high datum
 - 22" for a 51" high datum
- Modesty Base Heights: Floor Height (1")
- Widths: 36" - 70" in 1" increments

Infinity Side Desk Edge Floor Screen (GXEU)

- Heights above worksurface:
 - 0" for a 29" high datum
 - 13" for a 42" high datum
 - 22" for a 51" high datum
- Modesty Base Heights:
 - Partial Modesty Height (23")
 - Modesty Height (15")
 - Elevated Height (6")
 - Floor Height (1")
- Widths: 30" - 66" in 6" increments
- Available with or without an Accessory Rail along the top

Infinity Screen Alignment Clip (GXCC)

- Used to clip Infinity screens together in side-by-side applications

Framed Fabric Desk Edge Floor Screen (GYFU)

- Heights above worksurface:
 - 13" for a 42" high datum
 - 22" for a 51" high datum
- Modesty Base Heights: Floor Height (1")
- Widths: 36" - 70" in 1" increments

Framed Fabric Side Desk Edge Floor Screen (GYEU)

- Heights above worksurface:
 - 13" for a 42" high datum
 - 22" for a 51" high datum
- Modesty Base Heights: Floor Height (1")
- Widths: 36" - 70" in 1" increments
- Depths: 18" to 48" in 6" increments

planning with desk edge floor screens

The following should be considered when planning with single-sided upStage Desk Edge Floor Screens.

When mounting a Desk Edge Floor Screen on a single sided upStage configuration, the screen must stop minimum 12" from the edge of Stage Module to avoid bracket interferences

desk edge screens with glass basics

Desk Edge Screens with Glass mount to worksurfaces on-module to provide privacy at 42", 51" and 57" heights.

desk edge screens with glass

Metal and Hardware Finishes:

Foundation, Mica and Accent colors

Solid Finishes:

Source Laminate, Flintwood and Natural Veneer
(Horizontal Wood Grain)

Glass Finishes:

Clear, Frost and Satin

Desk Edge Screens with Glass (GVGU)

Mount to a worksurface to provide a solid modesty below and glass above at various heights.

- Widths: 46", 52", 58", 64", 70"
- Heights:
 - 29" Solid with 13" Glass to provide a 42"h datum
 - 42" Solid with 9" Glass to provide a 51"h datum
 - 29" Solid with 22" Glass to provide a 51"h datum
 - 42" Solid with 15" Glass to provide a 57"h datum
- Modesty Base Heights: Floor Height 1"

planning with desk edge screens with glass

The following should be considered when planning with Desk Edge Screens with Glass.

desk edge screens with glass

- Desk Edge Screens with Glass are available in three standard Teknion overall datum heights, 42", 51" and 57" high.

42" high datum

42" high Screen consists of a 29" high solid screen with 13" Glass above.

51" high datum

- The 51" high Screen is available in two options:
 - 42" high solid Screen with 9" Glass above
 - 29" high solid Screen with 22" Glass above

51" high datum

57" high datum

57" high Screen consists of a 42" high solid screen with 15" Glass above.

Desk Edge Screens with Glass can be attached to workspaces in the following applications.

Workspace with Stage Module or Credenza

Workspace with Hutch Stacker

Freestanding Workspace

modesty screens basics

Modesty Screens mount below the worksurface to provide privacy.

modesty screens

Modesty Screen (HTNN)

- Modesty Height Below Worksurface: (13") for 29" high datum
- Widths: 24" - 54" in 6" increments
- Available in Solid only

Careful attention should be paid when planning Modesty Screens with the Y-Leg and Interpret Leg as brackets can interfere.

When specifying a Modesty Screen with the Y-leg it must be specified 22" narrower than the worksurface.

When specifying a Modesty Screen with the Interpret Leg it must be specified 16" narrower than the worksurface.

solid lateral screen basics

Solid Lateral Screens mount perpendicular to the spine to provide space division.

- Options:
 - End Mounted Single
 - End Mounted Double
 - End Mounted Double (for HA module)
 - End Mounted Shared
 - End Mounted Shared (for HA module)
 - Flush Mid Gable
 - Flush End Gable
 - End Mounted Corner Connection
- Most screens are handed and are determined by the location of the bracket in relation to the screen
- All floor screen widths are actual
- Infeed Grommets **cannot** be accessed when End Mounted, Shared, Double and Single are used
- Power Pole or Exterior Base Feed **cannot** be used when Lateral Screens are covering both End Gables of a Stage

Solid Lateral Floor Screen (HTNL)

- Heights: 42", 51" and 57"
- Depths: 24", 30", 36" and 42" - 84" in 1" increments

Solid Lateral Screen with Glass (HTNA)

- Heights:
 - 42" total (29" plus 13" glass)
 - 51" total (42" plus 9" glass)
 - 51" total (29" plus 22" glass)
 - 57" total (42" plus 15" glass)
- Depths: 24" - 84" in 6" increments

- The left handed orientation will have the visible mounting brackets on the right and the support foot (if required) will be on the left
- The right handed orientation will have the visible mounting brackets on the left and the support foot (if required) will be on the right

planning with solid lateral screens

The following should be considered when planning with Solid Lateral Screens.

solid lateral screens

When there is 36" of unsupported screen a Support Foot is required and will be included with screen.

The Lateral Screen can be mounted in nine locations:

End Mounted Corner Connection (handed)

- Mounts to the entire end of the Spine to provide Privacy in single sided applications
- Works in conjunction with HTNE Solid Corridor Screens and includes alignment pin hardware to ensure tight corners
- Widths: 24" - 84"
- To determine User Width, minus the full depth of the stage (16")

On widths 44" and above there will be a mandatory support foot

End Mounted Shared (not handed)

- Mounts on the outside of the stage to provide partial privacy on both sides
- Widths: 24" - 84"
- To determine User Width, use overall width of screen, minus the depth of the stage

Will not have support foot

End Mounted Double (handed)

- Mounts to the midpoint of the outside of the stage to provide additional privacy
- Widths: 24" - 84"
- To determine User Width, use overall width of screen, minus half the depth of the stage (8")

On widths 44" and above there will be a mandatory support foot

End Mounted Single (handed)

- Mounts to the entire end of the spine to provide privacy in single sided applications
- Widths: 24" - 84"
- To determine User Width, use overall width of screen, minus the full depth of the stage (16")

On widths 52" and above there will be a mandatory support foot

Flush Mid Gable (not handed)

- Mounts to the face of the stage to provide privacy between users
- Widths: 24" - 72"
- 73" - 84" is not available
- The User Width equals overall width of screen

On widths 36" and above there will be a mandatory support foot

Flush End Gable (handed)

- Mounts to both faces of the stage to provide privacy between users
- Widths: 24" - 72"
- 73" - 84" is not available
- The User Width equals overall width of screen

On widths 36" and above there will be a mandatory support foot

End Mounted Shared for HA Module (handed)

- Mounts on the outside of the stage to provide partial privacy on both sides
- Widths: 24" - 84"
- To determine User Width, use overall width of screen, minus the depth of the stage

Will not have support foot

End Mounted Double for HA Module (handed)

- Mounts to the midpoint of the outside of the stage to provide additional privacy
- Widths: 24" - 84"
- To determine User Width, use overall width of screen, minus half the depth of the stage (8")

On widths 44" and above there will be a mandatory support foot

End Mounted Single for HA Module (handed)

- Mounts to the entire end of the spine to provide privacy in single sided applications
- Widths: 24" - 84"
- To determine User Width, use overall width of screen, minus the full depth of the stage (16")

On widths 52" and above there will be a mandatory support foot

planning with solid lateral screens (continued)

solid lateral screens with glass

- Lateral Screens with Glass are available in two standard Teknion overall datum heights, 42", 51" and high.

42" Datum

42" high Screen consists of a 29" high solid screen with 13" Glass above

51" Datum

The 51" high Screen is available in two options:

- 29" high solid Screen with 22" Glass above
- 42" high solid Screen with 9" Glass above

51" Datum

57" Datum

57" high Screen consists of a 42" high solid screen with 15" Glass above

grain direction

- For 42" high solid lateral screens with Source Laminate finishes the grain runs horizontal
- For Cathedral Flintwood and Natural Veneers the grain direction is from left to right from the user's perspective. From the visitor's perspective, outside the workstation, the grain direction is right to left

- For 51" and 57" high solid lateral screens with Source Laminate finishes the grain runs horizontal
- For Cathedral Flintwood and Natural Veneers the grain direction is from bottom to top from both the user's and visitor's perspective, inside and outside the workstation

solid corridor screen basics

Corridor Screens attach to the Stage to provide space division in a single-sided application or along a corridor.

Metal and Hardware Frame Finishes:
Foundation, Mica and Accent colors
Solid Finishes:
Source Laminate, Flintwood and Natural Veneer
Glass Finishes:
Clear and Frost
*Support Foot will match hardware color

Solid Corridor Screen with Glass (HTNE)

- Heights:
 - 42" total (29" plus 13" glass)
 - 51" total (42" plus 9" glass)
 - 51" total (29" plus 22" glass)
- Widths:
 - 42" high screens include widths 24" - 96" in 6" increments
 - 51" high screens include widths 24" - 84" in 6" increments
- All Solid Corridor Screen widths are actual

Solid Corridor Screen (HTNC)

- Heights: 42" and 51" high
- Widths:
 - 42" high screens include widths 24" - 96" in 6" increments
 - 51" high screens include widths 24" - 84" in 6" increments
- All Solid Corridor Screen widths are actual

planning with solid corridor screens

The following should be considered when planning with Solid Corridor Screens.

solid corridor screens

When planning with solid corridor screens there are various ways to create privacy and one-sided workstations.

Corridor Screens can be used together with lateral screens for a continuous privacy solution.

Corridor Screens can be combined with stage-mounted storage to completely cover one side of the stage.

Corridor Screens can be used with single-sided work surfaces to optimize the available space above the stage.

Corridor Screens can be casually overlapped with stage-mounted storage units to provide varying levels of privacy.

Corridor Screens cannot attach to Height-Adjustable credenzas.

Corridor Screens are always planned against a stage.

on and off module planning

- When planning with corridor screens on-module, or end-mounted off-module, the end gables will always be used as a primary vertical bracket attachment, whenever possible
- When planning with corridor screens off-module, at least one vertical attachment should always be provided either by a mid-gable or a credenza

- For Solid Corridor Screens that are 24" to 48", there will be two horizontal brackets and one vertical bracket included

- For Solid Corridor Screens that are 54" to 96", there will be three horizontal brackets and two vertical bracket included

planning with solid corridor screens (continued)

The following should be considered when planning with Solid Corridor Screens.

without alignment, with in-line alignment and extended corner in-line alignment

The following shows the location of alignment options for self alignment and mix and match capabilities of the Solid Corridor Screens. Solid Corridor Screens (HTNC) have the option of specifying Without Alignment, With In-Line Alignment, Extended Left Corner and In-Line Alignment and Extended Right Corner and In-Line Alignment. Solid Corridor Screens with Glass (HTNE) have the option of specifying Without Alignment and With In-Line Alignment. In order to connect Solid Corridor Screen (HTNC) with the Solid Lateral Screen (HTNL), End Mounted Corner Connection (EC) must be specified.

Alignment options for Solid Corridor Screen (HTNC)

Without alignment

With In-Line alignment

Alignment options for Solid Corridor Screen with Glass (HTNE)

Without alignment

With In-Line alignment

Extended Left/Right Corner and In-Line Alignment

planning with solid corridor screens (continued)

In-Line Alignment

solid corridor screens with glass

Corridor Screens with Glass are available in two standard Teknion overall datum heights, 42" and 51" high.

42" Datum

42" high Screen consists of a 29" high solid screen with 13" Glass above

51" Datum

The 51" high Screen is available in two options:

- 29" high solid Screen with 22" Glass above
- 42" high solid Screen with 9" Glass above

51" Datum

grain direction

- For 42" (24"-96" wide) high solid corridor screens with Source Laminate finishes the grain runs horizontal
- For Cathedral Flintwood and Natural Veneers the grain direction is from left to right from the user's perspective. From the visitor's perspective, outside the workstation, the grain direction is right to left

- For 51" (24"-84" wide) high solid corridor screens with Source Laminate finishes the grain runs horizontal
- For Cathedral Flintwood and Natural Veneers the grain direction is from bottom to top from both the user's and visitor's perspective, inside and outside the workstation

lateral screen basics

Lateral Screens attach to the worksurface to provide lateral space division.

- A screen with straight/curved profile which provides privacy along with lateral space division
- Heights:
 - 13" for a 42"h datum
 - 22" for a 51"h datum
 - 28" for a 57"h datum
- Depths: 23", 29" and 35"
- Desktop Lateral Screens are applicable to 1" worksurface only

Metal and Hardware Finishes:
Foundation, Mica and Accent colors

Solid Finishes:
Source Laminate, Flintwood and Natural Veneer

Glass Finishes:
Clear, Frost and Satin

Fabric Finishes:
All Teknion Standard Panel Fabrics

Felt Finishes:
Smooth Felt Colors

6mm Glass Lateral Screen (GNGU)

10mm Glass Lateral Screen (GNTU)

Writeable Glass Lateral (GNWU)

Solid Lateral Screen (GNSU)

Writeable Laminate Lateral Screen (GNLU)

Infinity Lateral Screen (GNXU)

Smooth Felt Lateral Screen (GNZU)

- Available 13" and 22" high only

Framed Fabric Lateral Screen (GNYU)

Metal Lateral Screen (GNMU)

- Available 13" and 22" high only

functional screen basics

upStage offers one framed spine screen option; the Functional Screen. The panel like structure with fascias provide privacy and functionality.

functional screen

The Functional Screen provides additional stability and can be used with Fabric, Whiteboard as well as Accessory Fascias and Glass Add-ons up to 51" high datum height. Accessory Fascia is only available 13" high to provide a total of 42" high when use with a Glass Add-On.

Functional screens add functionality to a workstation.

Functional Screens may be specified 13", 21" and 30" high. The 13" high Functional Screen is optimized to be used with the Glass Add-On Screen.

Functional Screen Frame (HTCF)

- Mounts to the Accessory Beam and consists of a frame with vertical posts and a top rail. Frames over 48" wide will consist of two segments for added stability
- Heights: 13", 21" and 30"
- Widths: 24" - 96" in 6" increments
- Supports the Glass Add-On Screen
- Mounted on- or off-module

Fascia Post Kit (HTCK)

- Required to provide additional support to the Functional Screen Frame when Accessory Fascias (HTCA) are used
- The kit mounts vertically inside of the frame and its required for all fascia sizes
- Heights: 13" and 21"

functional screen basics (continued)

Functional Spine Screen Frames require Top Trim, End Trim, Intermediate Trim, Screen Connectors and Fascias to complete the screen.

Top Trim (HTCT)

- Used on a Functional Screen when no Glass Add-On is required
- Widths: 24" - 96" in 6" increments
- Finishes: Foundation, Mica and Accent colors
- Can span more than one frame

Top Trim for Glass Add-On (HTCG)

- Finishes the top of Functional Screen when a Glass Add-On is used
- Widths: 24" - 96" in 6" increments
- Finishes: Foundation, Mica and Accent colors
- Includes clips
- Can span more than one frame

End Trim (HTCE)

- Finishes the end of a Functional Screen
- Heights: 13", 21" and 30"
- Finishes: Foundation, Mica and Accent colors

Fabric Fascia (HTCR)

- Provides a tackable surface
- Heights: 13", 21" and 30"
- Widths: 24", 27", 30", 33", 36", 39", 42", 45", 48", 54" and 60"
- Finishes: all Standard Teknion Panel Fabrics

Whiteboard Fascia (HTCW)

- Provides a Whiteboard surface
- Heights: 13", 21" and 30"
- Widths: 24", 27", 30", 33", 36", 39", 42", 45", 48", 54", 60", 66" and 72"

Accessory Fascia (HTCA)

- Provides an Accessory Rail for mounting accessories
- Additional Fascia Post Kits (HTCK) are required for stability of this screen and are not included with the screen
- Available 13" high only and when used with an 8" Glass Add-On Screen provides a 42" high datum Height
- Widths: 24" - 96" in 6" increments
- Finishes: Foundation, Mica and Accent colors

Glass Add-On Screen (HTCL)

- Heights:
 - 8" and 9" (8" high attaches to a 13" functional screen for a 42" datum height
 - 9" high attaches to a 21" functional screen for 51" a datum height)
- Widths: 24" - 96" in 6" increments
- Screen finishes: Clear and Frosted Glass

Screen Connector (HTCC)

- Required to connect adjoining frames
- Heights: 13", 21" and 30"

planning with functional screens

The following should be considered when planning with Functional Spine Screens.

functional spine screens

Frame widths 24" – 48" consist of two vertical posts and a top frame, they can accommodate one Fascia on each side of the frame.

Frame widths 54" – 96" consist of four vertical posts and can accommodate one or two Fascia on each side of the frame.

Fascias can be specified to span over the entire width of the Functional Screen, or two Fascias can be specified at half the width each and do **not** need to be the same finish.

Side 1

Side 2

Fascias do not need to be the same on both sides of a frame, two Fascias can be specified on one side of the frame and a single fascia on the opposite side.

Only one or two Fascias of equal size can be used on a frame. Three Fascias **cannot** span on one frame.

planning with functional screens (continued)

Screen connectors are required between adjoining screens

End Trims are required on all exposed Ends.

Four End Trims are required

One End Trim is required

When planning with Casual Screens beside Functional Screens, the End Cap on the Casual Screen must be removed providing space for the End Trim of the Spine Screen.

planning with functional screens (continued)

top trim-glass

The Top Trim for Glass Add-On (HTCG) must be used when Add-On Glass Screens (HTCL) are specified.

datum heights

The 8" high Glass Add-On is used with the 13" high functional frame to reach a 42" high datum. The 9" high Glass Add-On is used with the 21" high functional frame to reach a 51" high datum.

hutch stackers &
accessories

hutch stackers & accessories

UNDERSTANDING HUTCH STACKERS	154
HUTCH STACKERS BASICS	156
PLANNING WITH HUTCH STACKERS	157
HUTCH STACKERS WITH SLIDING DOOR BASICS	158
PLANNING WITH HUTCH STACKERS WITH SLIDING DOOR OVERHEAD	159

PLANNING WITH FASCIA ADD-ONS	168
ELEVATED HUTCH BASICS	170
PLANNING WITH ELEVATED HUTCHES.	171
ELEVATED HUTCH & LATERAL TOWER FINISHES	172

understanding hutch stackers

Hutch Stackers are used on Stages and Credenzas to provide functional space division and various levels of privacy. All are complete with a lower cubby and options for upper storage.

Hutches are available in three styles:

Single Hutches face one direction with a screening element aligned to the back of the cabinet. The integrated cubby and optional overhead extends the full depth of the cabinet.

Shared Hutches face in two directions with a screening element along the center line of the cabinet, so is optimized for flexible planning. The integrated lower cubbies are half depth and the optional overhead creates a handed “S” style split.

Aperture Style Hutches have the screening element split, with a 6” gap between them. Optimized for asymmetric planning of workspaces, it provides a shared open space between neighbors, while providing privacy for heads-down work. Both lower cubbies and optional overheads have the “S” style split (always handed).

Single Style Hutches allow for head down space and privacy between users. Provides full cabinet depth of storage for one user in single sided applications or allows for a second user to access the backside for additional functionality.

Shared Style Hutches allow for head down space and privacy between users. The center screen allows workspaces to be planned either symmetric or asymmetric with some area for small items.

Aperture Style Hutches Worksurfaces mount to the backside of each screen to provide heads down privacy when required, additional space for small items and the ability to collaborate when desired.

understanding hutch stackers (continued)

Six levels of privacy are available:

Open Through Hutch
Hutch area is open, however both upper and lower Cubby area closed.

Glass Back Hutch
Provides translucency between users in Hutch area.

Solid Back Hutch
Provides solid privacy for users in Hutch and Cubby area.

Perforated Hutch
Provides privacy in Hutch area while allowing light to pass through the Hutch.

hutch stackers basics

upStage hutches mount to a stage to provide various levels of casual privacy and functionality.

- All hutches include a lower cubby at desk height to allow worksurfaces to be mounted horizontally
- Heights: 21", 30" and 45"
 - The 30" and 45"h are available with optional top cubbies
- Configurations:
 - Single, the hutch and cubbies will be open from one side only
 - Shared (the hutch and cubby section is split so that each side is half the depth of the hutch)
 - Aperture (the hutch and cubby section is split so that each side is half the width of the hutch but the full depth)
- The cubby section will always be solid regardless of the style
- Widths:
 - 30" - 72" in 6" increments for single applications
 - 42" - 72" in 6" increments for shared or aperture applications
- Styles:
 - Open
 - Solid back
 - Glass back
 - Perforated metal
- In single and shared hutches 42"w or wider, the lower and upper cubbies will have a mid gable for support
- An interior chrome rod is required for support on hutches 42'w or wider (except in shared applications)

Open Through Hutch Stacker (HTSHN)

- The hutch is open through so only the cubbies are considered single sided

Solid Back Hutch Stacker (HTSHS)

- The hutch has a solid back
- Accommodates a hutch fascia add-on (HTAH)

Glass Back Hutch Stacker (HTSHG)

- The hutch has a glass back

Perforated Hutch Stacker (HTSHP)

- The hutch has angled perforated blades to provide partial privacy
- Not available single sided

planning with hutch stackers

The following chart outlines the configurations available when planning with upStage Hutch Stackers.

		Open		Solid Back		Glass Back		Perforated	
		HTSHN	with cubbies	HTSHS	with cubbies	HTSHG	with cubbies	HTSHP	with cubbies
21" High	Single		×		×		×	×	×
	Shared		×		×		×		×
	Aperture		×	×	×	×	×	×	×
30" High	Single							×	×
	Shared

hutch stackers with sliding door basics

upStage hutches mount to a stage to provide various levels of casual privacy and functionality and additional closed overhead storage.

- All hutches with sliding doors include a lower cubby at desk height to allow workspaces to be mounted horizontally
- Heights: 45"h
- Configurations:
 - Single, the hutch, cubbies and overhead will be open from one side only
 - Shared (the hutch and lower cubbies are split so that each side is half the depth of the hutch, the overhead is split so that each side is half the width of the hutch but the full depth)
 - Aperture (the hutch, cubbies and overhead is split so that each side is half the width of the hutch but the full depth)
- The cubby section will always be solid regardless of the style
- Widths:
 - 30" - 72" in 6" increments for single applications
 - 42" - 72" in 6" increments for shared or aperture applications
- Styles:
 - Open
 - Solid back
 - Glass back
 - Perforated metal
- In single and shared hutches 42"w or wider, the lower cubbies will have a mid gable for support
- An interior chrome rod is required for support on hutches 42"w. or wider (except in shared applications)

Open Through Hutch Stacker with Sliding Door Overhead (HTSHNK)

- The hutch is open through so only the cubbies are considered single sided

Solid Back Hutch Stacker with Sliding Door Overhead (HTSHSK)

- The hutch has a solid back
- Accommodates a hutch fascia add-on (HTAH)

Glass Back Hutch Stacker with Sliding Door Overhead (HTSHGK)

- The hutch has a glass back

Perforated Hutch Stacker with Sliding Door Overhead (HTSHPK)

- The hutch has angled perforated blades to provide partial privacy
- Not available single sided

planning with hutch stackers with sliding door overhead

The following chart outlines the configurations available when planning with upStage Hutch Stackers with Sliding Door Overhead.

		Open	Solid Back	Glass Back	Perforated
		HTSHNK	HTSHSK	HTSHGK	HTSHPK
45" HIGH	Single				×
	Shared				
	Aperture				

planning with hutch stackers & hutch stackers with overhead

The following should be considered when planning with Hutch Stackers & Hutch Stackers with Overheads.

- upStage Hutches match Teknion standard 42", 51" and 66" datum heights
- Hutches can stack onto the following:
 - 21h" stages
 - 21h." elevated credenzas
 - 15"h. stage credenzas with a 6" Stage Spacer Block (HTAS)

datum heights

Hutch on Stage
(42"h shown)

Hutch on Stage Credenza
with spacer block
(42"h shown)

Hutch on Elevated Credenza
(51"h shown)

Hutch on Stage
(66"h shown)

The top cubby height will vary depending on the height of the hutch.

30" high Hutch with
Top Cubby

The 8" high Top Cubby accommodates casual piling.

45" high Hutch with
Top Cubby

The 15" high Top Cubby accommodates standard binder storage.

45" Hutch with
Sliding Door Overhead

The 15" high Sliding Door Overhead accommodates standard binder storage.

planning with hutch stackers & hutch stackers with overhead (continued)

support

A chrome plated rod is integrated into hutches over 42" w excluding the following:

- Shared Solid and Glass Hutches
- Shared Solid and Glass Aperture Hutches

handedness

Singled Sided Hutches are not handed aperture hutch handedness is determined by the location of the open space in both the upper and lower cubbies.

Shared Hutch handedness is determined by the location of the open space in both the upper and lower cubbies.

planning with hutch stackers & hutch stackers with overhead (continued)

Perforated Hutches are handed to provide various degrees of privacy between users. The user can either look into the dividers or through the dividers.

The spacing between the perforated blades depends on the width of the hutch.

Perforated Metal Shared Hutch

Perforated Metal Aperture Hutch

planning with hutch stackers & hutch stackers with overhead (continued)

aperture hutches

- Hutches are designed to provide privacy for the user
 - The worksurface should be mounted against the solid side of the hutch
 - Planning against the open side will cause bracket interference

additional support

- The following 45" high hutches (66"h overall datum height) without overheads or top cubbies require additional support for stability
 - Open
 - Perforated
- The support must be provided by an adjacent hutch 30"h or higher
- The two hutches must be fastened to each other on site

semi-suspended worksurfaces and hutches

- Cubbies have a shelf at 29" high which has two uses
 - Perpendicular worksurfaces mount to it
 - It provides a secondary worksurface
 - If used in this application it is recommended that both surfaces be specified in the same finish

hutch stacker finishes

upStage offers an extensive finish offering. The following outlines the finish protocol for Hutch Stackers.

For all Hutches without Sliding Door Overhead (Open Through Hutch Stacker **HTSHN**, Solid Back Hutch Stacker **HTSHS**, Glass Back Hutch Stacker **HTSHG**, Perforated Hutch Stacker **HTSHP**)

- Two Finish Zones
 - Case
 - Secondary which has three options
 - A - Shelves Only
 - B - Backs and Interior Dividers
 - C - Shelves and Interior Dividers and Back

Case Finish	Secondary Finish
Flintwood	Flintwood
Natural Veneer	Natural Veneer
Source Laminate	Source Laminate

- Glass Back Options:
 - Clear
 - Frosted
- Perforated Metal Paint Options:
 - Foundation
 - Mica
 - Accent

hutch stackers with sliding door overhead finishes

upStage offers an extensive finish offering. The following outlines the finish protocol for Hutch Stackers with Overheads.

For Hutch Stackers with Sliding Door Overhead (Open Through Hutch Stacker with Sliding Door Overhead **HTSHNK**, Solid Back Hutch Stacker with Sliding Door Overhead **HTSHSK**, Glass Back Hutch Stacker with Sliding Door Overhead **HTSHGK**, Perforated Hutch Stacker with Sliding Overhead **HTSHPK**)

- Three Finish Zones
 - Case, includes the outer walls and any surfaces not included in the secondary or front finish
 - Secondary finish, shelves only
 - Front, sliding doors

- Case
- Secondary Color
- Front (Glass shown)

Case Finish	Secondary Finish	Front Finish

Foundation, Mica

hutch accessory basics

Hutch Accessories are available to add functionality to upStage Hutches.

Finishes:

- Fabric:
 - Standard Teknion panel fabrics
- Back Painted Glass:
 - Standard Teknion back painted glass finishes

Hutch Fascia Add-On (HTAH)

- Heights: 21", 30" and 45"
 - Heights are nominal and match the size of the hutch it is being mounted to
- Widths: 30" - 72" in 6" increments
- Applications:
 - Single
 - Single with overhead/cubby
 - Aperture
 - Aperture with overhead/cubby
 - Shared
 - Shared with overhead/cubby
- Interior and exterior options for shared applications

Hutch Overhead Fascia Add-On (HTAV)

- Mounts to the back of an overhead/cubby
- Heights: 30" and 45"
 - Heights are nominal and match the size of the hutch it is being mounted to
- Widths: 30" - 72" in 6" increments
- Applications:
 - Single
 - Shared
 - Aperture

Hutch Accessory (HTHA)

- Adds casual file storage to a hutch with and without overhead/cubbies
- Width: 12"
- Heights are nominal to match the height of the opening in the hutch
 - 21" High (actual 12"h)
 - Used with a 21"h hutch without an overhead/cubby
 - Used with a 30"h hutch with an overhead/cubby
 - 30" High (actual 21"h)
 - Used with a 30"h hutch without an overhead/cubby
 - Used with a 45"h. hutch with an overhead/cubby
 - 36" High (actual 36"h)
 - Used with a 45"h hutch without an overhead/cubby
- The back is unfinished, placing it against glass is not recommended unless it is planned back to back

hutch fascia add-on basics

- Fascias are applied to hutches with solid backs

planning with fascia add-ons

The following should be considered when planning with Hutch Fascia Add-Ons.

Fascia sizes are nominal and match the size of the hutch that they are being mounted to.

applications

- Fascias are available for:
 - Interior and exterior applications
 - Single and shared applications

Hutch Fascia Add-On

Single Application, Interior

Shared Application, Interior

Single Application, Exterior

Shared Application, Exterior

Hutch Overhead Fascia Add-On

- When a fascia is required on an overhead, it must be specified separately
- It is available for single and shared applications

Single Application

Shared Application

planning with fascia add-ons (continued)

When planning with hutches with overheads the fascias are applied as follows:

- The exterior fascia spans the full height
- The interior fascia spans the height from the hutch shelf to the underside of the overhead
- Fascias do not span over the exterior or interior of a cubby

Fascias must be ordered to match the configuration that they are being used on.

Back

Single Sided, Back

- Spans over the hutch and the overhead (excludes the back of the cubbies)
- It conceals the seam between the hutch and overhead

Shared

- Covers only the back of one side of the overhead
- One fascia for each side is required

Aperture

- Covers only the back of one side of the overhead
- One fascia for each side is required

overhead fascia heights

Overhead heights:

- 8" on 30" high hutch (overall datum height of 51")
- 14" on 45" high hutch (overall datum height of 66")
- The actual fascia width is 2" less than the width of the hutch

Single

Shared / Aperture

elevated hutch basics

upStage Elevated Hutches mount on stages or credenzas to provide storage and space division.

Elevated Hutch Stacker (shown)

Elevated Hutch Stacker (HTSHE)

- Elevated hutches are always shared between 2 users
- Height: 51" datum
- Depth: 16"
- Widths: 60", 66", 72", 78", 84", 90" and 96"
- Styles:
 - Paper storage (shown)
 - Hinged doors
 - Door is lockable

planning with elevated hutches

The following should be considered when planning with Elevated Hutches.

lateral tower styles

Paper Storage

- An angled display shelf and file slots

stage planning

Perpendicular worksurfaces can be used when the elevated hutch is mounted to a stage.

The work surface must be fixed.

- Mounts inside of the Elevated Hutch Gable

Height-adjustable tables mounted in a Stage Module **cannot** be used when Elevated Hutches are mounted onto a stage.

Elevated hutches need an accessory rail on the stage

Hinged Door

- An angled display shelf
- Open shelves
- Hinged door storage

credenza planning

Elevated Hutches can be mounted to upStage and District Credenzas, they are both 21" high and 16" deep.

- They can be mounted to:
 - A single credenza
 - Overlap the stage in single sided applications
 - Overlap the stage in side by side applications

elevated hutch & lateral tower finishes

upStage offers an extensive finish offering to allow a user to create their own unique look.

- Three finish zones:
 - Outer case finish
 - Inner case finish
 - Accent metal

Elevated Hutch (HTSHE)

understanding credenzas

upStage credenzas are available in a variety of sizes and configurations to meet all of a users filing and storage needs.

Credenzas are available single sided, or shared.

Stage Credenza

Stage credenzas are 15"h. and sit below the stage in parallel or perpendicular applications

Elevated Credenza

Elevated credenzas are 21"h. and match the depth and height of a stage

- Can be used parallel or perpendicular to a stage or support stackers

Elevated Credenza with Casters

Elevated credenzas with casters are 21"h. and match the depth and height of a stage

- Provide user movability

understanding credenzas (continued)

handedness

Single Sided Credenzas are always specified from the left to the right and have four options for storage.

F- File
B- Box/Box
H- Hinged Door
C- Cubby

Example: Hinged Door, Box/Box, Cubby Door (H/B/C)

- Shared Double Credenzas are handed
- The handedness is determined by the location of the drawer when viewed by the user

Left handed shown

- Shared Triple Credenzas are handed
- The handedness is determined by the location of the drawer when viewed by the user

Left handed shown

Right handed shown

stage credenzas basics

upStage Credenzas are used below the stage to provide storage and are available in a variety of configurations.

Shared Stage Triple Credenza

- Height: 15"
- Formats:
 - Box/Box
 - File
 - Hinged door (hinged doors have touch latch hardware and no handles)
- Single and shared configurations
- Provides support to stages that are 72w" or wider
- Power and data cannot route through stage credenzas

Stage Single Credenza (HTSCJ)

- Widths: 24", 30" and 36"
- Includes one file drawer
- Must be used under a stage, and is not freestanding

Stage Triple Credenza (HTSCZ)

- Widths: 54", 60", 66" and 72"
- Includes three sections, all facing the same direction
- Configurations:
 - Hinged Door/File/Cubby (HFC)
 - Cubby/File/Hinged Door (CFH)
 - Hinged Door/Box, Box/Cubby (HBC)
 - Cubby/Box, Box/Hinged Door (CBH)
 - File/Box, Box/Cubby (FBC)
 - Cubby/Box, Box/File (CBF)
 - File/Box, Box/Hinged Door (FBH)
 - Hinged Door/Box, Box/File (HBF)
- Does not require counterweights

Stage Double Credenza (HTSCW)

- Widths: 30", 36", 42" and 48"
- Includes two sections, both facing the same direction
- Configurations:
 - File/Hinged Door (FH)
 - Hinged Door/File (HF)
 - Box, Box/Hinged Door (BH)
 - Hinged Door/Box, Box (HB)
 - File/File (FF)
 - File/Box, Box (FB)
 - Box, Box/File (BF)
- Counterweight Options:
 - If used freestanding counterweights must be specified on credenzas with file drawers
 - If used under the stage, counterweights are not required but are recommended for reconfiguration flexibility

Stage Shared Double Credenza (HTSCU)

- Widths: 42", 48", 60" and 72"
- Includes two sections, one facing each direction
- Configurations:
 - File (F)
 - Box/Box (B) (not available on 60" or 72" w credenzas)
- Counterweight Options:
 - If used freestanding counterweights must be specified on credenzas with file drawers
 - If used under the stage, counterweights are not required but are recommended for reconfiguration flexibility

Stage Shared Triple Credenza (HTSCV)

- Widths: 54", 60", 66" and 72"
- Includes three sections, one facing each direction, and one open through cubby
- Configurations:
 - File (F) (accessory option not available)
 - Box/Box (B)
- Counterweights are not required

planning with stage credenzas

The following should be considered when planning with Stage Credenzas.

- Stage credenzas can be planned parallel or perpendicular to the stage
- Provide support for stages 72" w or wider

parallel

centered
(For Stage Support)

perpendicular

Stage credenzas planned in parallel positions must be specified at least one size narrower than the overall width of the stage to allow for the thickness of the gables on either side.

Stage credenzas planned in perpendicular positions must be specified with a cubby under the stage.

- The credenza depth of 16" is nominal
- The drawer fronts will sit outside of the stage

Worksurfaces **cannot** be mounted to Stage Credenzas, the heights do not align.

Planning Tip

- Stage Credenzas can support stackers, but do not match standard datum heights
- To reach the 21" high datum requirement for stackers a Stage Spacer Block (HTAS) is required. See *Accessory Section* for more details

stage credenza with
spacer block

elevated credenzas basics

upStage Elevated Credenzas are the same height as a Stage and can be planned parallel and perpendicular to the Stage to provide storage.

Elevated Shared Triple Credenza

- Height: 21"
- Includes a cubby for accessories
- Formats:
 - Box/Box (B)
 - File (F)
 - Hinged door (hinged doors have touch latch hardware and no handles)
- Single and shared configurations
- Can support worksurfaces
- Power and data cannot route through Elevated Credenzas

Elevated Double Credenza (HTSCY)

- Widths: 30", 36", 42" and 48"
- Includes two sections, both facing the same direction
- Available with either feet or casters
- Configurations:
 - Box, Box/Cubby (BC)
 - Box, Box/Hinged Door (BH)
 - File/Cubby (FC)
- Counterweight is included in file configurations

Elevated Shared Double Credenza (HTSCR)

- Widths: 42" and 48"
- Includes two sections, one facing each direction
- Configurations:
 - File (F)
 - Box/Box (B)
- Counterweights are required in freestanding applications

Elevated Triple Credenza (HTSCX)

- Widths: 54", 60", 66" and 72"
- Includes three sections, all facing the same direction
- Configurations:
 - Cubby/Box, Box/File (CBF)
 - Cubby/File/Hinged Door (CFH)
 - File/Box, Box/Cubby (FBC)
- Counterweights are not required

Elevated Shared Triple Credenza (HTSCQ)

- Widths: 54", 60", 66" and 72"
- Includes three sections, one facing each direction, and one open through location
 - The open through location can be on the side or centered
- Configurations:
 - File (F)
 - Box/Box (B)
- Counterweights are not required

planning with elevated credenzas

The following should be considered when planning with Elevated Credenzas.

- Elevated Credenzas are 21" h. the same height as a stage
- They can accommodate stacked storage when used in perpendicular applications

- Elevated Double Credenza configurations with an opening can support a work surface
- The work surface must mount over the opening
- Credenza to Worksurface Support (HTSCY) must be specified over an open cubby
- The Cubby Shelf is removable to allow the work surface support to be installed
- The back of the cubby section will be solid

When installed on worksurfaces 30" or 36" deep, the support bracket is centered to the work surface.

When installed on a work surface 24" deep, the support bracket is centered to the credenza cubby.

- Elevated Shared Credenzas have a solid back on the back side of each drawer configuration to provide a seamless aesthetic
- Credenzas with a center cubby cannot support a work surface, the open through must be on an end location
- Cubby spaces are open from both sides

The following outlines the size of work surface a credenza can support.

- 54" w. - up to 24" d. work surface
- 60" w. - up to 30" d. work surface
- 66" w. - up to 36" d. work surface
- 72" w. - all work surface depths

integrating accessories

- Cubby spaces on all Elevated Credenzas can accommodate mobile cubby trays
- Mobile Cubby Trays can be oriented horizontally or vertically to fill the cubby space

Cubby space

- The Mini Tray organization attaches to the Mobile Cubby Tray to provide storage for small items
- It is also used as a handle

pedestal basics

upStage Mobile Pedestals provide additional personal storage in a workstation.

Mobile Pedestal (HTSM)

- Widths: 16"
- Height: 21"
- Depth: 19"
- Configurations:
 - Hinged Door
 - File Drawer
- Optional seat cushion available (HTAC)

The rolling Pedestal **cannot** be used for support.

The top cubby accommodates Mobile Accessory Trays (HTAT).

credenza finishes

upStage offers an extensive finish offering, to allow a user to create their own unique look.

Stage Credenza Finishes

bookcase basics

upStage Bookcases stack onto stages or credenzas to provide storage and space division, and are available in a variety of configurations.

All bookcases listed below:

- Depth: 16"
- Applications:
 - Single
 - Shared

Variable Bookcase Stacker (HTSBV)

- Depth: 16"
- Provides open bookcase storage with variable privacy
- Heights: 21", 30" and 45"
- Widths: 30" - 72" in 6" increments

Single Shared, Open Through Top

Bookcase Stacker (HTSB)

- A bookcase with open shelves only
- Heights: 21", 30", 45"
- Widths:
 - Single -24", 30", 36", 42", 48" w
 - Shared -30", 36", 42", 48", 60", 66" and 72"
- Configurations:
 - Shelves
 - Shelves with open through top

Single Shared, Open Through Top

Solid Door Bookcase Stacker (HTSBS)

- A bookcase with a solid sliding door
- Heights: 21", 30", 45"
- Widths:
 - Single -42", 48" w
 - Shared -42", 48", 60", 66" and 72"
- Configurations:
 - Shelves with solid sliding door panel
 - Shelves with open through top and sliding door panel

Single Shared, Open Through Top

Writeable Door Bookcase Stacker (HTSBW)

- A bookcase with a writable sliding door
- Heights: 30", 45"
- Widths:
 - Single -42", 48" w
 - Shared -42", 48", 60", 66" and 72"
- Configurations:
 - Shelves with backpainted glass sliding door panel
 - Shelves with open through top and backpainted glass sliding door panel
- Te glass frame finish coordinates with the finish of the glass

Single Shared, Open Through Top

Fabric Door Bookcase Stacker (HTSBF)

- A bookcase with a fabric sliding door
- Heights: 30", 45"
- Widths:
 - Single -42", 48" w
 - Shared -42", 48", 60", 66" and 72"
- Configurations:
 - Shelves with fabric sliding door panel
 - Shelves with fabric open through top and fabric sliding door panel
 - fabric is tackable
- Door Trim Finishes:
 - Clear Anodized
 - Espresso
 - Very White

planning with bookcases

The following chart outlines the configurations available with upStage Bookcase Stackers.

	Bookcase		Bookcase with Sliding Door (Solid, Back-Painted Glass, Fabric)	
	Shelves	Shelves with open through top	Shelves with sliding door panel	Shelves with sliding door panel and open through top

hinged door stacker basics

upStage Hinged Door Stackers stack onto Stages or Credenzas to provide closed storage.

- Heights: 21", 30" and 45"
- Widths: 30", 36", 42" and 48"
- All doors are hinged
- Push Latch or upStage handle available
- With Push Latch option, no handle is required
- Lock options available
- Handle Styles:
 - Push Latch, no handle required
 - upStage handle

Open with Cubbies All Closed

Single Solid Hinged Door Stacker (HTSSS)

- Two options available:
 - Closed door with open cubbies
 - Closed doors
- Used in single sided applications

Shared Solid Hinged Door Stacker (HTSSD)

- The hinged door is solid
- Two options available:
 - Closed door with open cubbies (available on 42" and 48"w, the cubbies will be centered)
 - Closed doors
- Used in shared applications, one door will face in each direction

Open with Cubbies All Closed

Single Writeable Hinged Door Stacker (HTSSG)

- The hinged door is back-painted glass
- Two options available:
 - Closed door with open cubbies
 - Closed doors
- Used in single sided applications
- Only the push latch option is available
- The glass frame finish will coordinate with the finish of the glass

Shared Writeable Hinged Door Stacker (HTSSP)

- The hinged door is writable
- Two options available:
 - Closed door with open cubbies (available on 42" and 48"w, the cubbies will be centered)
 - Closed doors
- Used in shared applications, one door will face in each direction

planning with hinged door stackers

The following should be considered when planning with upStage Hinged Door Stackers.

single application

- On cabinets with doors:
 - 30" and 36"w. have two doors
 - 42" and 48"w. have three doors
 - Two doors will be connected and one will be a single door
 - The handedness is determined by the location of the single door

30"

36"

42" Right Handed

48" Right Handed

- On cabinets with doors and cubbies:
 - 30" and 36"w. have one door and one cubby section
 - 42" and 48"w. have two doors and one cubby section
 - The handedness is determined by the location of the open cubbies

30" Right Handed

36" Right Handed

42" Right Handed

48" Right Handed

shared application

30"

36"

42"

48"

- On cabinets with all doors:
 - 30" and 36"w have two doors, one on each side
 - 42" and 48"w have two doors, one on each side, and an open through cubby section in the center
- Widths 42" and 48" have an open through cubby section in the middle

hinged door stacker finishes

upStage offers an extensive finish offering to allow a user to create their own unique look.

Single Hinged Door Stackers (HTSSS)

- Three finish zones
 - Case
 - Secondary which has three combinations
 - A Shelves only
 - B Backs only
 - C Shelves and interior dividers and backs
- Front

Shared Hinged Door Stackers (HTSSD)

- Three finish zones
 - Case
 - Secondary which has three combinations
 - A Shelves only
 - B Backs only
 - C Shelves and interior dividers and backs
- Front

Flintwood	Flintwood	Flintwood Back-Painted Glass
Natural Veneer	Natural Veneer	Natural Veneer Back-Painted Glass
Source Laminate	Source Laminate	Source Laminate Flintwood Back-Painted Glass

locker basics

upStage Lockers provide personal coat and shelf storage.

Cubby Locker

- Handle Styles:
 - Push latch
 - upStage handle
- Locks included (digital or custom locks available)

Dual, Push Latch Triple, Push Latch Quad, Push Latch

Hinged Door, Push Latch Hinged Door with Mail Slot, Push Latch

Lockers (HTSL)

- Lockers have full height doors
- Heights: 42", 51" and 66"h
 - (no push latch available on 66"h)
- Configurations:
 - Dual
 - Triple
 - Quad
- Widths:
 - Dual 30" and 36"w
 - Triple 42" and 48"w
 - Quad 48"w

Cubby Lockers (HTSLC)

- Cubby lockers have four cubbies per unit
- Configurations:
 - Hinged doors
 - Hinged doors with mail slots
- Heights: 51" and 66"
- Widths: 30", 36" and 42"h.

planning with lockers

The following should be considered when planning with upStage Lockers.

- Dual and quad lockers are not handed
- Triple lockers are handed, two of the doors will have their handles side by side and the third door will have a single handle
 - The handedness is determined by the location of the hinge on the single door

- Each 51" and 66"h locker section includes:
 - One triangular corner shelf
 - One adjustable shelf

A Locker can provide support to a worksurface using the Storage Back to Worksurface Support (HTWS)

The worksurface must be supported from the back side of the storage.

worksurfaces cannot be supported from the side of a locker.

locker finishes

upStage offers an extensive finish offering to allow a user to create their own unique look.

- Two finish zones:
 - Case
 - Front

Lockers (HTSL)

Cubby Lockers (HTSLC)

Lockers (HTSL)
Cubby Lockers (HTSLC)

Case Finish	Front Finish
Flintwood	Flintwood
Natural Veneer	Natural Veneer
Source Laminate	Source Laminate Natural Veneer

- Foot finishes:
- Storm White
 - Platinum
 - Very White
 - Anthracite
 - Graphite
 - Burnished Bronze

storage support basics

Worksurface supports connect worksurfaces horizontally either to the back of a stacker, credenza or to a hutch.

Storage Back to Worksurface Support (HTWS)

- Used to attach a worksurface to the back of stacking storage
- Available only as a pair (two)

Credenza to Worksurface Support (HTWC)

- Mounts to the underside of a worksurface and to the top of the credenza to provide support to the worksurface
- Available Fixed or Height-Adjustable

Hutch to Worksurface Support (HTWF)

- Used to attach a worksurface to a Hutch
- Brackets that are included are dependent on the Hutch style, size and worksurface depth

lateral tower basics

Lateral Towers mount to stages and elevated credenzas to provide functional space division and an impromptu collaboration surface.

Lateral Tower (HTST)

- Height: 42"
- Depth: 16"
- Widths: 60", 66", 72"
- Mounts to a stage or credenza
- Styles:
 - Basic Gable
 - Storage Tower (lockable)
- Applications:
 - Single Sided
 - Shared

planning with lateral towers

The following should be considered when planning with lateral towers.

Lateral Towers are available in four styles:

- storage shared
- storage single sided
- solid gable shared
- solid gable single sided

Storage - Shared

- Mounts to a stage or elevated credenza
- Is Shared between two users
- Features:
 - An angled display shelf
 - A closed storage section with slots for filing above
- Non handed

Storage - Single Sided

- Mounts to a stage or elevated credenza
- Singled sided
- Features:
 - Open shelves
 - A closed storage section
 - Left or right handed

Solid Gable - Shared

- Mounts to a stage or elevated credenza
- Shared between two users
- Features:
 - An angled display shelf
 - An end gable
- Non handed

Solid Gable - Single Sided

- Mounts to a stage or elevated credenza
- Singled sided
- Features:
 - Open shelves
 - An end gable
- Non handed

handedness

Single Sided and Solid Gable Single Sided handedness is determined by the open space as viewed by the user.

Shared Storage - Left

Shared Storage - Right

Solid Gable - Left

Solid Gable - Right

planning with lateral towers (continued)

The following should be considered when planning with lateral towers.

lateral towers with single and shared storage

Shared Storage

- The shelves and lower closed storage have a mid divider with storage on each side

(Note: image for visualization purposes, is shown without an end gable)

Single-Sided Storage

- The shelves and lower closed storage have a back with storage facing the user

(Note: image for visualization purposes, is shown without an end gable)

mounting lateral towers

Lateral towers mount to a stage or to 21" h storage.

Stages

- When mounting to a stage the lateral tower the inside gable will connect to the accessory beam
- Towers can be mounted on one or both sides of the stage

- When mounting to a credenza the lateral tower the inside gable will connect mount to the back of the credenza

- Towers can mount to upStage or District credenzas

planning with lateral towers (continued)

lateral tower datum heights

Lateral Towers are at 42" high provide a perch for impromptu collaboration or seated height divisional privacy.

Standing Height

Seated Height

Single sided and shared lateral towers to do not have same clearance from the worksurface to the underside of the storage on the lateral tower

- Single sided applications 5"
- Shared 3"

Lateral Tower - Single Sided

Lateral Tower - Shared

side filer & mini side filer basics

The following outlines the features of upStage Side Filer and Mini Side Filers.

Side Filers have a pull out storage door provide personal storage and divisional privacy.

- Side Filers are available in two formats:
 - Side Filer - provides storage and privacy
 - Mini Side Filers - provide undersurface storage
- Width: 16"
- a variety of accessory and wardrobe options are available

- Front Face and Case and Interior finish:
 - Laminate
 - Flintwood
 - Natural Veneer
- Interior Metal and Pull Handle finish:
 - Foundation
 - Mica
 - Accent

Side Filer (HTSFT)

- Heights: 42" and 51"
- Depths: 24" , 30" and 36"
- Applications:
 - With fixed height tables
 - With height adjustable tables
 - Freestanding
- Leveling Range:
 - fixed levelers with no range, the unit is supported with a caster when extended
- Locks: Standard
 - Digital lock options available
- Configurations:
 - (N) No Accessories, with Wardrobe
 - (A) Accessory Bundle A, with Wardrobe
 - (B) Accessory Bundle B, with Wardrobe
 - (K) No Accessories, No Wardrobe
 - (M) Accessory Bundle A, No Wardrobe
 - (P) Accessory Bundle B, No Wardrobe
- USB Options:
 - (N) No USB
 - (S) Grommet on the Side
 - (B) Grommet on the Bottom

Mini Side Filer (HTSFS)

- Height: 28"
- Depths: 23" and 29"
- Provides support to a worksurface
- Leveling Range is 0.5" to +2.5"
- Configurations:
 - (N) No Accessories
 - (A) Accessory Bundle A
 - (B) Accessory Bundle B
- USB option
- Locks: Standard
 - Digital lock options available

planning with side filers & mini side filers

interior configurations

All Side Filers and Mini Side Filers are complete with accessory shelves, rails, bag drop area and the option for a wardrobe and accessory bundles. The storage area will vary depending on the depth and configuration selected.

42" High Side Filer

24" deep Side Filer

- 20 4/5" extension
- Option with coat storage, accessory storage and bag drop

24" deep Side Filer

- 20 4/5" extension
- Option with accessory storage and bag drop

30" or 36" deep Side Filer

- 26 4/5" extension
- Option includes coat storage, accessory storage and bag drop

51" High Side Filer

24" deep Side Filer

- 20 4/5" extension
- Option with coat storage, accessory storage and bag drop

24" deep Side Filer

- 20 4/5" extension
- Option with accessory storage and bag drop

30" or 36" deep Side Filer

- 26 4/5" extension
- Option includes coat storage, accessory storage and bag drop

28" High Mini Side Filer

23" deep Side Filer

- 20 1/10" extension
- Option with accessory storage and bag drop

29" deep Mini Side Filer

- 26 1/10" extension
- Option includes accessory storage and bag drop

handedness

Handedness is determined by the location of the Side Filer and Mini Side Filer in relation to the user.

planning with side filers

The following should be considered when planning with upStage Side Filers.

Side Filers can be planned in parallel and perpendicular applications.

parallel planning

30" deep worksurface

- Can be planned with a 24" or 30" deep side filer
 - 24" deep is used in the middle of a run and will sit against the stage
 - 30" deep is used at the end of a stage run, and can be planned back to back

36" deep worksurface

- Can be planned with a 30" or 36" deep Side Filer
 - 30" deep is used in the middle of a run and will sit against the stage
 - 36" deep is used at the end of a stage run, and can be planned back to back

perpendicular planning

In perpendicular applications, the Side Filer will match the depth of the worksurface.

Perpendicular 24" deep worksurface

Perpendicular 30" deep worksurface

planning with mini side filers

The following should be considered when planning with Mini Side Filers.

- Mini Side Filers can be planned in parallel and perpendicular applications
 - worksurface supporting

parallel planning

30" deep worksurface

- If planned below the worksurface must be one depth smaller than the worksurface
 - 24"d. is used on a 30" worksurface
 - 30"d. is used on a 36" worksurface

Parallel 30" deep worksurface

Parallel 36" deep worksurface

perpendicular planning with side filers

24" and then 30" deep worksurface

- Mini Side Filers are worksurface supporting:
 - The Mini Filer must be the same depth as the worksurface

Perpendicular 24" deep worksurface

Perpendicular 30" deep worksurface

planning with side filer, mini side filer & usb power

The following should be considered when planning with Side Filers and USB Power.

The optional USB add-on provides one USB-A and one USB-C port in the pocket drop area to allow for the charging of USB powered devices.

power cord locations

- The power location can be specified in these locations:
 - Bottom (Side Filer only)
 - Right side (Side and Mini Side Filer)
 - Left side (Side and Mina Side Filer)

Side Filer
Bottom Power Location

Side Filer
Right Side Power Location

Side Filer
Left Side Power Location

Mini Side Filer
Right Side Power Location

Mini Side Filer
Left Side Power Location

The height from the floor to a power cord location is 25" for Side Filers and Mini Side Filers.

The Side Filer can be planned at least 50" from a power source.

The Mini Side filer can be planned at leave 80" from a power source.

planning with side filer, mini side filer & usb power (continued)

- When parallel planning with Side Filers, the power cord will come from the side of the Side Filer to the stage
 - This applies to both Side Filers in a run or at the end of a run

- When perpendicular planning with Side Filers, the power cord will run from the side of the Side Filer to a Power Rod, Under Worksurface Mount with Cable Tray (YEPD)
 - It is also recommended what Wire Management Clips (YESW) are specified

storage cube basics

The Storage Cube is a mobile personal storage unit that fits casually under the stage or anywhere in a workstation.

- Storage Cubes can be used in a variety of locations:
 - Fully underneath stage
 - Protrude outside of it
 - Sit back to be back
 - Be conveniently situated anywhere under a worksurface as a freestanding storage unit

Storage Cube (HTAB)

- Height: 15"
- Depth: 13"
- Width: 18"
- Includes a divider for optimal organization

planning with storage cube

The following should be considered when planning with the Storage Cube.

Back-to-Back Planning
- Will protrude from the stage on the user side

Mirrored Planning
- Will fit fully under the stage

Single Sided Planning
- Will fit fully under the stage

Parallel Back-to-Back Planning
- Will fit fully under the stage

upStage offers an extensive finish offering to allow a user to create their own unique look.

Storage Cube (HTAB)

accessory basics

upStage accessories add functionality and the ability to add a personal touch to a workstation.

Mobile Cubby Tray (HTAT)

- Trays fit into the cubbies of hutches and stackers to provide additional storage
- Configurations:
 - Small
 - Medium
 - Large
- Includes a textured fabric liner to cushion stored items
- Optional Mini Tray Organizer available
- Finishes:
 - Foundation
 - Mica
 - Accent

Stage Spacer Block (HTAS)

- Used between a Stage Credenza and stacking hutches and storage to elevate the credenza height to the standard 21" datum height
- Widths: 24" - 48" w. in 6" increments
- Configurations:
 - Single
 - Shared (24" w. not available)
- Finishes:
 - Foundation
 - Mica
 - Accent

Mini Tray Organizer (HTAG)

- Used with a variety of storage units to provide organization
- Heights: 12", 14"
- Finishes:
 - Foundation
 - Mica
 - Accent

Horizontal Filing Insert (HTAF)

- Provides casual filing storage inside a box drawer
- Options:
 - Ordered as an option with the cabinet (finish will default to the drawer finish)
 - Order separately
- Widths: 16", 18", 21", 24" and 30" w
- Finishes:
 - Foundation
 - Mica
 - Accent

Variable Bookcase Bookend (HTAD)

- Used with a variety of storage units to provide organization
- Heights: 12", 14"
- Finishes:
 - Foundation
 - Mica
 - Accent

Cushion (HTAC)

- Provides additional seating on a stage or credenza
- Widths: 24" - 48" in 6" increments
- Fabrics:
 - All Teknion Seating fabrics

planning with accessories

The following should be considered when planning with upStage Accessories.

bookend

- Bookends can be used with a variety of upStage storage units
 - Short: 12"h
 - Used on the Variable Bookcase lower shelf
 - Tall: 14"
 - Used on the Variable Bookcase upper shelf and all bookcases

cushion

- Cushions can be used on stages or credenzas
- Not for use on a Mobile Pedestal
 - Mobile pedestals have a unique cushion which is ordered as an option on the pedestal

stage spacer block

- Attaches to the underside of a stacker
- Must be the same width as the stacker

planning with accessories (continued)

Horizontal Filing Insert (HTAF)

- Provides casual filing storage in Box/Box drawers
- Available in 16", 18", 21" 24" and 30" widths
- Can be specified as an option when ordering Credenzas with Box/Box drawers
- When ordered as an option within Credenzas, File divider finish specified drawer handle finish and bottom liner is defaulted to the interior of the drawer

- The depth of the Horizontal Filing Insert is dependent on the size of the storage it is used in
- Can only be used in box drawers, and not file drawers
- Inserts mount horizontally into a box drawer

storage fascia add-on basics

upStage Fascia Add-Ons add functionality to bookcases and stackers with hinged doors.

- **Finishes:**
 - **Fabric Finishes:**
 - All standard Teknion Panel Fabrics
 - **Back-Painted Glass Finishes:**
 - All Teknion Back-Painted Glass options

- Fascias mount to the outside back of a storage unit
- **Styles**
 - Whiteboard
 - Fabric
 - Backpainted glass
- Fascias match the height of the stacker

Bookcase Fascia Add-On (HTAN)

- Widths: 30" - 72" in 6" increments
- **Applications:**
 - Single sided
 - Single sided with open through top
 - Shared
 - Shared with open through top

Hinged Door Stacker Fascia Add-On (HTAZ)

- Widths: 30" - 48" in 6" increments
- **Applications:**
 - Single sided
 - Shared

planning with storage fascia add-on

The following should be considered when planning with Storage Fascia Add-Ons.

- Fascias are inset into the frame on the back of a bookcase or stacker
- Widths are nominal and specified the same width as the storage
 - In shared applications one fascia needs to be ordered for each side

Bookcase Stacker Fascia Add-On (HTAN)

Cannot be used with bookcases with sliding doors

- In shared applications the fascia is specified the full width of the bookcase even though it only covers one backside of the bookcase

Hinged Door Stacker Fascia Add-On (HTAZ)

accessory bundle basics

upStage accessories and accessory bundles provide organization to the inside of a Side Filer or Mini Sider Filer.

Paint Finishes:

- Foundation
- Mica
- Accent

Boot Tray (HTAR)

- Provides storage for shoes and boots
- Sits on the bottom shelf of a Side Filer or Mini Side Filer
- Depth: 13"
- Widths:
 - 12"w - used with a 24"d and 32"d Side Filer
 - 18"w - used with a 30"d and 38"d Side Filer
 - 20"w - used with a 24"d Side Filer without coat storage
 - used with a 23"d Mini Side Filer
 - 26"w - used with a 2"d Mini Side Filer

Accessory Bundles (HTAK)

- Provide storage inside of a Side Filer or Mini Side Filer
- Can be specified two ways:
 - As an option to the Side Filer or Mini Side Filer
 - The finish will default to the finish of the cabinet interior
 - Individually
 - All finishes available and can be different than the interior of the cabinet interior
- Configurations:
 - Bundle A
 - Bundle B

- Bundle A includes:**
- Hanging Pen Pocket
 - Hanging Tray
 - Headphone Hook

- Bundle B includes:**
- Hanging Pen Pocket
 - Hanging Tray
 - Headphone Hook
 - Paper Filer

planning with accessory bundles

The following storage components are included in Accessory Bundles.

Hanging Pen Pocket

- Provides storage for pens, pencils, markers and scissors
- Attaches to the accessory rail

Hanging Tray

- Provides storage for small office accessories
- Attaches to the accessory rail

Headphone Hook

- Provides storage for standard headphones
- Attaches to the hanging tray or accessory rail

Paper Filer

- Accommodates file folders, books and papers
- Designed to sit on bottom shelf

filing capabilities

The following outlines the filing capability of Credenzas.

- 16" deep file drawers do **not** have full extension files, therefore Filing must be front-to-back not side-to-side
- For 16" and 18" wide file drawers only one front-to-back filing can be used (letter)
- For 21" and 24" wide file drawers only one front-to-back filing can be used (letter, legal, A4 or foolscap)
- For 30" wide file drawers two front-to-back filing sections can be used (letter) or one filing section (legal, A4 or foolscap)
- For 36" wide filing drawers, two front-to-back filing sections can be used (letter, legal, A4 or foolscap)

HTBM
Middle Stage

The Middle Stage is always used between a Beginning Stage (HTBB) and Finish Stage (HTBF) to create large Stage applications.

WHAT’S INCLUDED

1 Stage with optional accessory beam and single or double side power, 1 mid gable.

NOTES

With both Single and Double Sided Power options selected the related electrical components must be specified separately.

If Accessory Beam option is selected, Stage Accessory Beam Cover (HTBR) must be specified separately.

Stages have a 3" nominal leveling range, 1" below and 2" above.

HTBC
Complete Stage

The Complete Stage is used when a Single 4' - 8' Stage is desired.

WHAT'S INCLUDED
1 stage with optional accessory beam, single or double side power and infeed grommet, 2 end gables.

NOTES
With both Single and Double Sided Power options selected the related electrical components must be specified separately.

If Accessory Beam option is selected, Stage Accessory Beam Cover (HTBR) must be specified separately.

Stages have a 3" nominal leveling range, 1" below and 2" above.

When Infeed Grommets are specified, Grommet Covers are included.

HTDF

Finish Simple Stage

The Finish Simple Stage is always used as the last module when a large spanning Stage is desired. It must be attached to either a Beginning Simple Stage (HTDB) or a Middle Simple Stage (HTDM).

WHAT'S INCLUDED

1 Simple Stage with optional accessory beam and single or double side power, 1 end gable.

NOTES

With both Single and Double Sided Power options selected the related electrical components must be specified separately. If Accessory Beam option is selected, Stage Accessory Beam Cover (HTBR) must be specified separately. When Infeed Grommets are specified, Grommet Covers are included. Stages have a 3" nominal leveling range, 1" below and 2" above.

HTWR
Parallel Worksurface

The Parallel Worksurface provides a range of depths to support the primary and single sided worksurface applications.

WHAT’S INCLUDED
1 worksurface.

NOTES
Dimensions are actual width, allowance for gaps at side edges must be specified.
The number and location of Cut Outs vary, refer to the *Application Guides* for more details.

Access door Cut Out options are not available for 23" depth worksurface.
Worksurfaces include only a cut out in the worksurface. When Rectangular Cut Out (RN, RC, RL) is specified, a Rectangular Grommet (HTEG) must be ordered separately. When Access Door Cut Out (AN, AC, AL) is specified, a kit of products including the Access Door for Multi-Circuit Desk (HTEA), Multi-Circuit Desk Housing (HTEN), Multi-Circuit Desk Power Module (HTEM) and Receptacle Outlet (HTERO) must be specified separately.

If Cut Out is specified, add 46 for each

HTWP
Perpendicular Worksurface

The Perpendicular Worksurface provides a range of depths to support both primary, secondary and single sided worksurface applications.

WHAT'S INCLUDED
1 worksurface.

NOTES
Dimensions are actual width, allowance for gaps at side edges must be specified.
The number and location of Cut Outs vary, refer to the *Application Guides* for more details.

Worksurfaces include only a cut out in the worksurface. When Rectangular Cut Out (RN, RC, RL) is specified, a Rectangular Grommet (HTEG) must be ordered separately. When Access Door Cut Out (AN, AC, AL) is specified, a kit of products including the Access Door for Multi-Circuit Desk (HTEA), Multi-Circuit Desk Housing (HTEN), Multi-Circuit Desk Power Module (HTEM) and Receptacle Outlet (HTERO) must be specified separately.

HTWH
Perpendicular with Radius Corner
Worksurface

The Perpendicular with Radius Corners Worksurface provides a range of depths to support primary worksurface applications.

WHAT'S INCLUDED
1 worksurface, grommet (if specified).

NOTES
Worksurface is designed to accompany the upStage Infinity Curved Desk Edge Screen (GXCU). Dimensions are actual width, allowance for gaps at side edges must be specified.

HTWV

Dual Perpendicular Worksurface

The Dual Perpendicular Worksurface provides two face to face worksurfaces in a range of depths to support both primary, secondary and single sided worksurface applications.

WHAT’S INCLUDED

2 worksurfaces.

NOTES

Dimensions are actual width, allowance for gaps at side edges must be specified.

The number and location of Cut Outs vary, refer to the Application Guides for more details. Worksurfaces include only a cut out in the worksurface. When Rectangular Cut Out (RN, RC, RL) is specified, a Rectangular Grommet (HTEG) must be ordered separately. When Access Door Cut Out (AN, AC, AL) is specified, a kit of products including the Access Door for Multi-Circuit Desk (HTEA), Multi-Circuit Desk Housing (HTEN), Multi-Circuit Desk Power Module (HTEM), Receptacle Outlet (HTERO) and a Stage to Dual Worksurface Support Kit (HTWB) must be specified separately.

Each code includes two Worksurfaces.

If One Cut Out per Worksurface is specified, add 93

If Two Cut Outs per Worksurface are specified, add 187

HTWW

Dual Perpendicular with Radius Corner Worksurface

The Dual Perpendicular with Radius Corner Worksurface provides a range of depths to support both primary, secondary and single sided worksurface applications.

WHAT'S INCLUDED
2 worksurfaces.

NOTES
Dimensions are actual width, allowance for gaps at side edges must be specified. The number and location of Cut Outs vary, refer to the Application Guides for more details. Worksurfaces include only a cut out in the worksurface. When Rectangular Cut Out (RN, RC, RL) is specified, a Rectangular Grommet (HTEG) must be ordered separately. When Access Door Cut Out (AN, AC, AL) is specified, a kit of products including the Access Door for Multi-Circuit Desk (HTEA), Multi-Circuit Desk Housing (HTEN), Multi-Circuit Desk Power Module (HTEM), Receptacle Outlet (HTERO) and a Stage to Dual Worksurface Support Kit (HTWB) must be specified separately.

HTBH
Single Stage Module for HA Table

The Single Stage Module for Height-Adjustable Table is placed in between Stages, or at the end of a Stage run. It conceals power and data wiring and creates a physical enclosure between adjustable legs down to the floor. Designed to accompany Navigate Height-Adjustable Built-In Base (YGU).

WHAT'S INCLUDED
1 stage with optional accessory beam, single or double side power and infeed grommet.

NOTES
Specify the width of the module 6" larger than the depth of the Height-Adjustable Table.

With both Single and Double Sided Power options selected the related electrical components must be specified separately.

If Accessory Beam option is selected, Stage Accessory Beam Cover (HTBR) must be specified separately.

When Infeed Grommets are specified, Grommet Covers are included.

Navigate Height-Adjustable
Built-In Base

One Table
One Plug

Navigate Height-Adjustable Built-In Base is for use with upStage Modules and Credenzas for Height-Adjustable Tables.

WHAT'S INCLUDED

1 electric height-adjustable table base, leg and foot configuration as specified.

NOTES

Electric base mechanism has 0.1 Watt resting power draw and uses 120V North American control box.

For Switch details, see the Application Guide section.

Vertical Wire Carrier includes Cross-Channel bracket and mounts into Module.

Cross Channel Integrated Powerbar option (C) includes 3 outlets + 1 IEC Connection. This IEC connection accepts only one IEC-compatible power accessory (with an IEC cord terminal) at a time.

Undersurface cable management option (5) - Dual Plastic Trays + Powerbar with IEC refers to a Power Rod (with IEC cord terminal) that must be plugged into the IEC connection of the Cross Channel Integrated Powerbar option (C).

For more information about the One Table One Plug electrical system, IEC-compatible power accessories and planning with IEC Connection, refer to Complements: *Teknion's Ergonomics & Accessories Program*.

Navigate Height-Adjustable Built-in Gable Base

Navigate Height-Adjustable Built-In Gable Base is to be paired with Rectangular Height-Adjustable Worksurface Gable to create a specific upStage integrated Height-Adjustable Table.

WHAT'S INCLUDED

1 electric height-adjustable base, leg and foot configuration as specified, integrated Vertical Wire Carrier Cable Manager.

NOTES

Electric base mechanism has 0.1 Watt resting power draw and uses 120V North American control box.

For Switch details, see the Application Guide section.

Vertical Wire Carrier includes Cross-Channel bracket and mounts into Module.

The height-adjustable worksurface must be specified separately.

Cross Channel Integrated Powerbar option (C) includes 3 outlets + 1 IEC Connection. This IEC connection accepts only one IEC-compatible power accessory (with an IEC cord terminal) at a time.

Undersurface cable management option (5) - Dual Plastic Trays + Powerbar with IEC refers to a Power Rod (with IEC cord terminal) that must be plugged into the IEC connection of the Cross Channel Integrated Powerbar option (C).

For more information about the One Table One Plug electrical system, IEC-compatible power accessories and planning with IEC Connection, refer to Complements: Teknion's Ergonomics & Accessories Program.

G X C U
Infinity Curved Desk Edge Screen

The Infinity Fabric Curved Desk Edge Screen attaches to the worksurface on both on the back and lateral edge to provide a lightweight, thin, upholstered fabric screen that is expressed in a softer curvilinear aesthetic that creates space division and local desktop privacy in varying levels.

WHAT’S INCLUDED

1 infinity fabric desk edge screen, attachment brackets, wire manager (if specified).

NOTES

The screen depth is 20" with a 1/2" wire gap around the screen.

Screen is designed to accompany an upStage Rectangle with Radius Corners Worksurface or Table with Radius Corners. Fabric will be applied in the railroad direction in select Panel and Upholstery fabrics, refer to the *Teknion Textiles Program Guide*.

G X D U
Infinity Desk Edge Screen

The Infinity Desk Edge Screen attaches to a worksurface to provide a lightweight, thin, upholstered fabric screen that is expressed in a softer curvilinear aesthetic that creates space division and local desktop privacy in varying levels.

WHAT’S INCLUDED

1 Infinity fabric desk edge screen, attachment brackets, wire manager (if specified).

NOTES

Infinity screen is 1/2" less than specified size. The worksurface wire gap is 1/2", to allow for mounting of select desk edge accessories.

Wire manager is designed to be accompanied by the Power Bar (YEPD) or Compact Power Bar (YEPS).

The screen is available in select Panel and Upholstery fabrics, refer to the *Teknion Textiles Program Guide*.

G Q D U
Quilted Infinity Desk Edge Screen

The Quilted fabrics provide a textured aesthetic, elevating the overall feel of an area creating a tactile user experience. Both the Teknion Quilted patterns Pico and Diode, designed by Suzanne Tick, soften the surface of textiles and elevate the user experience in the workplace with textured, quilted designs that add depth and perspective to a space. The Quilted Infinity Desk Edge Screen attaches to a worksurface to provide a lightweight, thin, upholstered fabric screen that is expressed in a softer curvilinear aesthetic that creates space division and local desktop privacy in varying levels.

WHAT'S INCLUDED

1 quilted infinity fabric desk edge screen, attachment brackets, wire manger (if specified).

NOTES

Infinity screen is 1/2" less than specified size. The worksurface wire gap is 1/2", to allow for mounting of select desk edge accessories.

Wire manger is designed to be accompanied by the Power Bar (YEPD) or Compact Power Bar (YEPS).

Fabric will be applied in the railroad direction in select Panel and Upholstery fabrics, refer to the *Teknion Textiles Program Guide*. The pattern thread is designed to accompany the color way of the fabric selected.

PRODUCT OPTIONS

If Accent/Mica Hardware Finish is specified for width 36" - 42", add 15

If Accent/Mica Hardware Finish is specified for depth 43" - 71", add 31

G X S U

Infinity Side Desk Edge Screen

The Infinity Side Desk Edge Screen attaches to a worksurface to provide a lightweight, thin, upholstered fabric screen that is expressed in a softer curvilinear aesthetic that creates space division and local desktop privacy in varying levels.

WHAT’S INCLUDED

1 Infinity fabric side desk edge screen, attachment brackets.

NOTES

Infinity side screen is 1/2" less than specified size. Screen is designed to have no gap between worksurface and Side Screen.

Fabric will be applied in the railroad direction in select Panel and Upholstery fabrics, refer to the *Teknion Textiles Program Guide*.

If Accent/Mica Hardware Finish is specified for width 17" - 42", add 15
If Accent/Mica Hardware Finish is specified for width 48" - 72", add 31

HTNF
Framed Fabric Desk Edge Screen

The Framed Fabric Desk Edge Screen attaches to the worksurface on to provide an upholstered fabric screen that is outlined by frame that creates space division and local desktop privacy in at various heights both above and below the worksurface.

WHAT’S INCLUDED
1 fabric desk edge screen, attachment brackets.

NOTES
Framed screens match the width of the worksurface for tight fit applications. Recommended to have 1/2" wire gap between screen and worksurface.
If Modesty base height option (F) is selected, then Height above worksurface option (22) is not available.
Fabric will be applied in the railroad direction in select Panel and Upholstery fabrics, refer to the *Teknion Textiles Program Guide*.

PRODUCT OPTIONS

Modesty Base Height	Height Above Worksurface	Width (in 1" increments)	Screen Finish	Metal Frame Finish
M Modesty Height (15")	13 for 42" high datum	36 - 72	Panel Fabric	Foundation
E Elevated Height (6")	22 for 51" high datum		Upholstery Fabric	Mica
F Floor Height (1")	28 for 57" high datum			Accent

GYSU
Framed Fabric Side Desk Edge
Screen

The Framed Fabric Side Desk Edge Screen attaches to the worksurface on to provide an upholstered fabric screen that is outlined by frame that creates space division and local desktop privacy in at various heights both above and below the worksurface.

WHAT’S INCLUDED
1 framed fabric desk edge screen, attachment brackets, corner connection hardware (if specified).

NOTES
Framed screens match the width of the worksurface for tight fit applications.
Fabric will be applied in the railroad direction in select Panel and Upholstery fabrics, refer to the *Teknion Textiles Program Guide*.

G X F U
Infinity Desk Edge Floor Screen

The Infinity Floor Desk Edge Screen attaches to a worksurface to provide a lightweight, thin, upholstered fabric screen that is expressed in a softer curvilinear aesthetic that creates space division and local desktop privacy down to the floor level.

WHAT’S INCLUDED

1 Infinity Floor fabric desk edge screen, attachment brackets, wire manager (if specified).

NOTES

Infinity Floor screen is 1/2" less than specified size. The worksurface wire gap is 1/2", to allow for mounting of select desk edge accessories.

Wire manager is designed to be accompanied by the Power Bar (YEPD) or Compact Power Bar (YEPS).

The screen is available in select Panel and Upholstery fabrics, refer to the *Teknion Textiles Program Guide*.

HTCF
Functional Screen Frame

The Functional Screen Frame is the main raw structure that mounts to the center Accessory Rail to provide privacy and functionality.

WHAT’S INCLUDED
2 or 4 vertical posts, horizontal rail and mounting brackets.

NOTES
The Top Trim (HTCT), End Trims (HTCE) and Fascias must be specified separately.
Frames over 48" wide will consist of two segments for added stability.

Screen Connectors (HTCC) must be specified separately if Functional Screen Frame (HTCF) is to be connected to another Functional Screen Frame to create a continuous screen.

HTSFT
Side Filer

The Side Filer offers personal storage with space dividing functionality (users can leave the side filer open for lateral privacy). Designed for fixed or height-adjustable tables, it can be freestanding or attached based on layout requirements. Accessories can be specified for further functionality and better organization.

WHAT’S INCLUDED

1 Side Filer unit with levelers, 1 drawer with casters, metal shelves, 1 coat hook (wardrobe option only), lock and keys, USB with extension kit, grommet (if specified).

If Accessory Bundle A is specified: 1 pen pocket, one hanging tray, 1 headphone hook

If Accessory Bundle B is specified: 1 pen pocket, 1 hanging tray, 1 headphone hook, 1 Paper Filer

WHAT’S EXCLUDED

Storage to Worksurface Support Kit (HTWS).

The Digital Lock (D) option does not include the Programming Key and the separate Manager Key. For further details on both related keys, see the Teknion Lock Specification Guide on our website.

NOTES

Configurations without Wardrobe: (K), (M), & (P) are only available in Depth 24".

Each USB Outlet has one USB-A port and one USB-C port for charging only.

The USB-A port supplies 18 Watts maximum at 5 Volts DC when used alone.

The USB-C port supplies 20 Watts maximum at 5 to 12 Volts DC when used alone.

Maximum combined output is 20 Watts when both ports are used together: 10 Watts for USB-A port and 10 Watts for USB-C.

HTAB
Storage Cube

Storage Cube is a mobile personal storage unit that fits casually under the stage. It can be used as extra storage to optimize inaccessible areas under the worksurfaces or a more cost-efficient alternative to low credenzas and pedestals.

WHAT’S INCLUDED

1 Storage Cube with casters and repositionable metal divider

NOTES

Secondary Finish applies to the front of the unit.

Power Conservation system provides an automatically turn off to items like task lights, monitors, personal heaters and fans and other non-essential user equipment when they are not in use.

WHAT'S INCLUDED

Power conservation system consists of a control box, selected number of sensors, system connection brackets, connecting cables and a four-way splitter

NOTES

Timer is set for 20 minutes for automatic shut-off after area is unoccupied. System sensors are available in Black only. Sensor connection wires are available in Grey and White only. System control box is available in Platinum (Foundation) only. Each Control Box offers two separate output jack for connection of Occupancy Sensors. The first output jack controls power to all receptacles on Teknion Circuit 1 and the second output jack controls power to all receptacles on Teknion Circuit 2. Each of the output jacks is labeled on the control box.

Do not specify receptacles for circuits 1 and 2 at the same workstation when using Power Conservation System.

Each occupancy sensor can only control one circuit.
