APPLICATION GUIDE 13

PRICE & PRODUCT GUIDE. 43

what are modular cabinets

The Modular Cabinets collection offers easy-to-specify and easy-to-assemble products designed for a broad range of applications such as healthcare, mail room, lunch room and more.

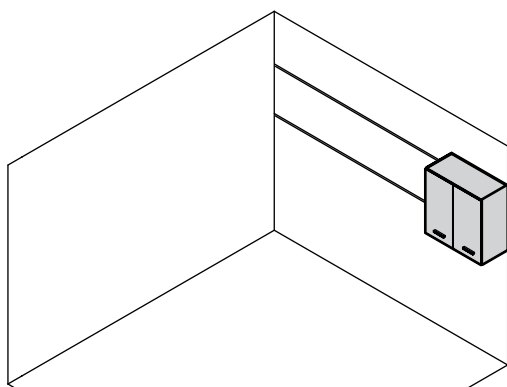

The Modular Cabinets collection comprises three lines of storage cabinets: Wall Cabinets, Base Cabinets and Storage Cabinets. A variety of accessories are also offered to complete the installation of the cabinets.

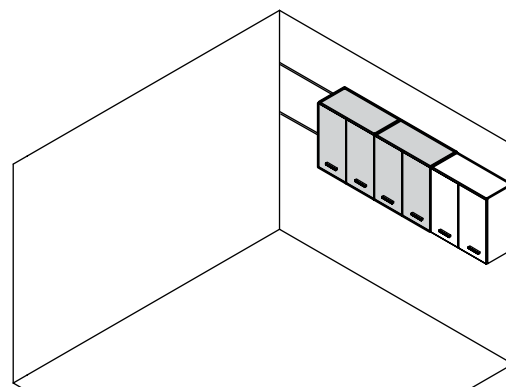

how to plan wall cabinets

Steps given below should be followed when planning with Wall Cabinets.

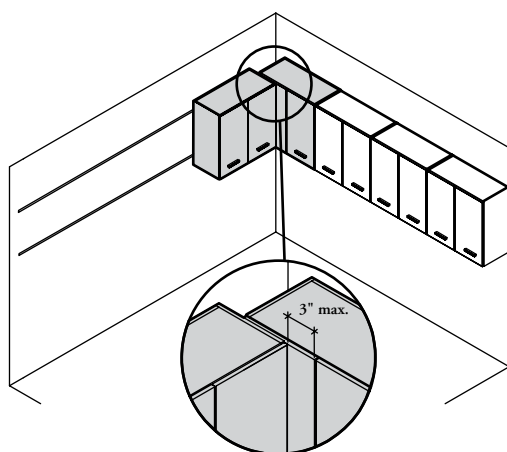

- You should verify the exact wall dimensions before choosing the cabinet widths
- The overall depth of the cabinet includes the Wall Support
- Two Wall Supports must be specified for 24" to 36" high cabinets and one Wall Support for 15" high cabinets
- It is the responsibility of the installer to securely attach Wall Supports to the wall; additional wall reinforcement is not required when using Wall Supports

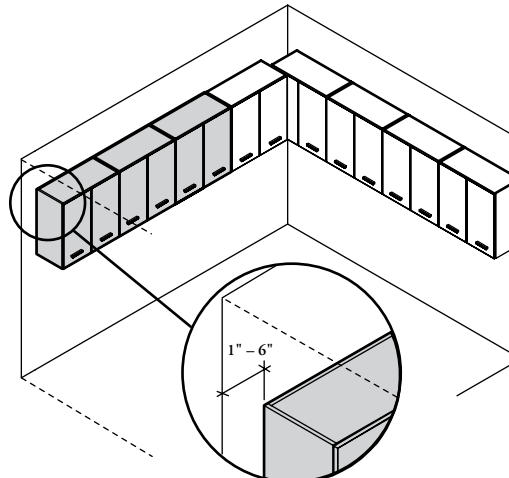

Step 1: Place the first cabinet in the opposite corner

Step 2: Arrange remaining cabinets along the wall

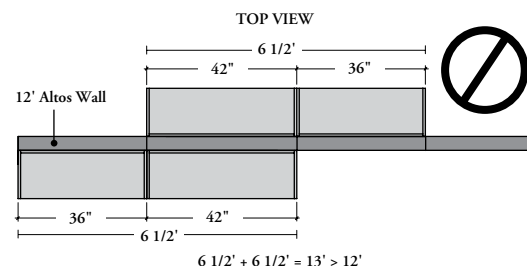

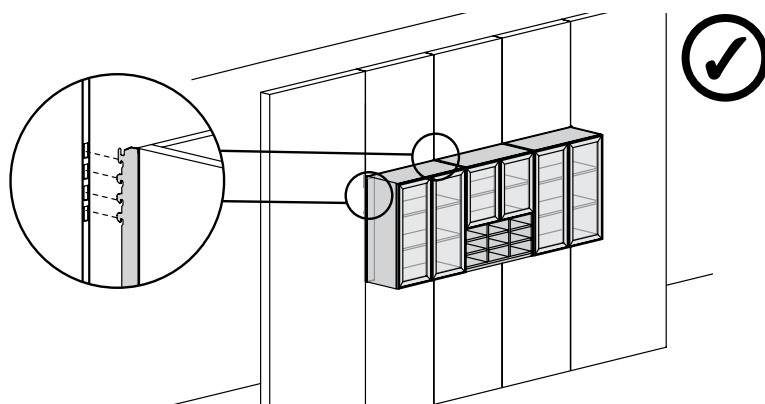

Step 3: Finish the row with a corner cabinet (only one opening door) and start the new row with an adjacent cabinet. Choose the cabinet dimensions so that you do not see more than 3" of the fixed panel

Step 4: Fill the other wall with cabinets. Leave a gap between 1" and 6" at the end as installer can cut to fit within wall conditions

- Wall Cabinets can be installed on Altos Walls, except the Corner Wall Cabinets (RHWCD and RHWCDG)
- Individual cabinet width must be the same as Altos Wall Fascia

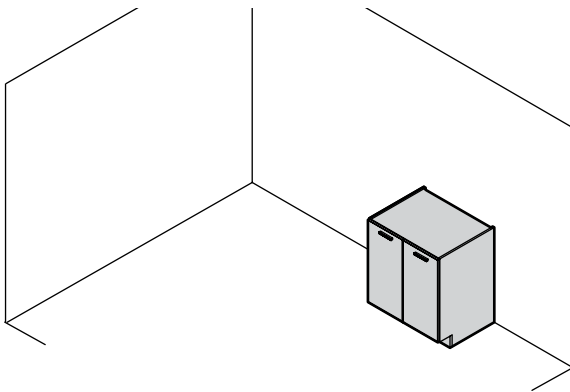

- Total width of cabinets mounted on both sides of the Altos Wall must not exceed the width of the wall
- Contact Teknion for other specific restrictions

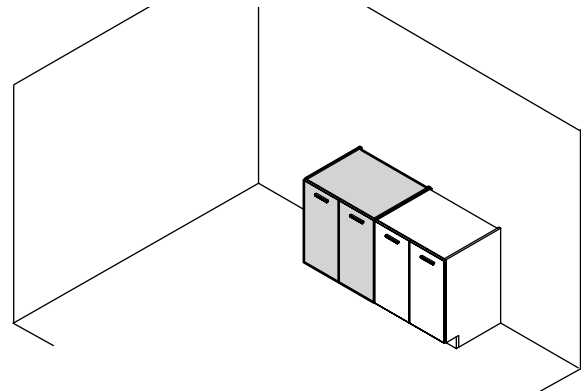

how to plan base cabinets

Steps given below should be followed when planning with Base Cabinets.

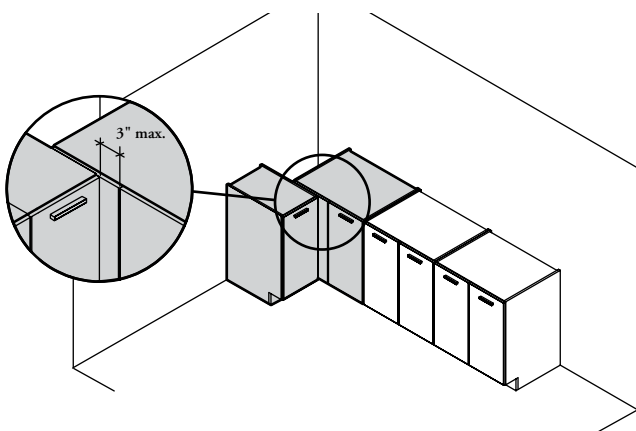

- ! You should verify the exact wall dimensions before choosing the cabinet widths
- Base Cabinets are predrilled on the sides for a more stable assembly when installing two or more cabinets together

Step 1: Place the first cabinet in the opposite corner

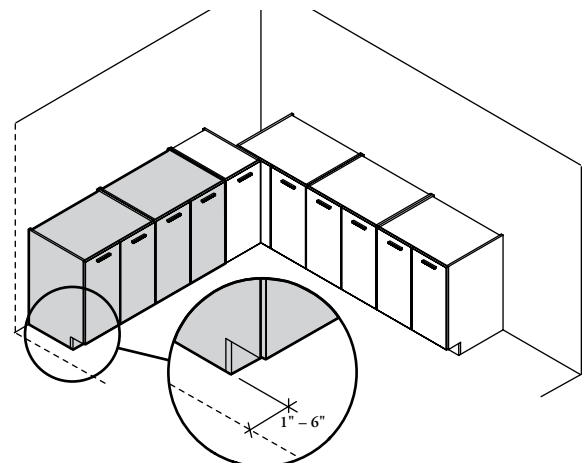

Step 2: Arrange remaining cabinets along the wall

Step 3: Finish the row with a corner cabinet (only one opening door) and start the new row with an adjacent cabinet. Choose the cabinet dimensions so that you do not see more than 3" of the fixed panel

NOTE:

Some base cabinets (RHBD, RHBRC, RHBW, RHBCP and RHBASD) **cannot** be used to start a new row adjacent to a Corner Cabinet

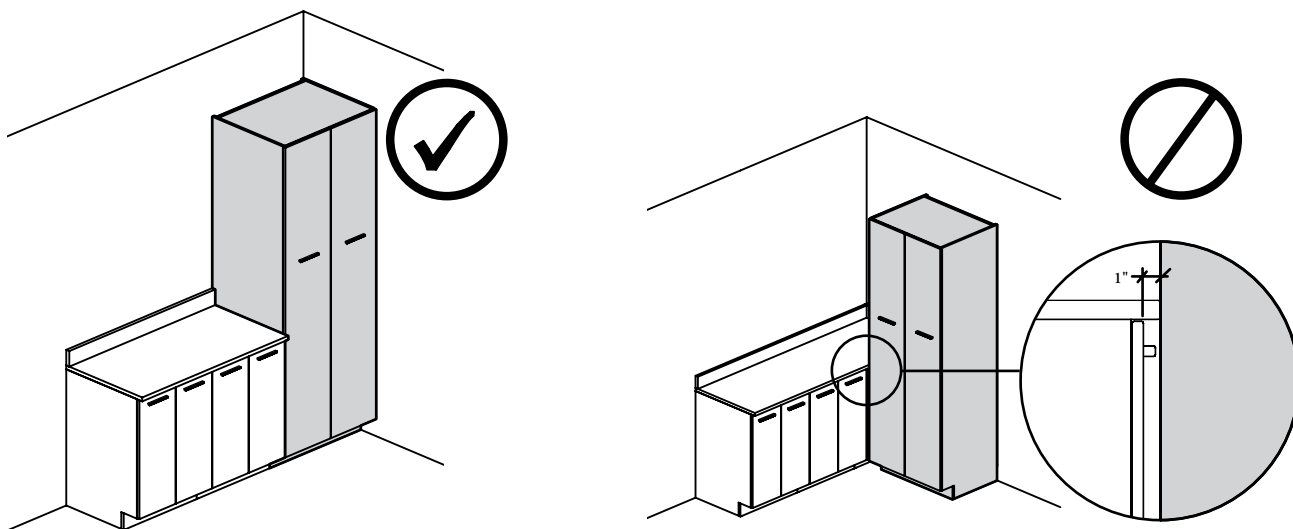

Step 4: Fill the other wall with cabinets. Leave a gap between 1" and 6" at the end as installer can cut to fit within wall conditions

how to plan storage cabinets

Storage Cabinets must be installed adjacent to Base Cabinets and not perpendicular.

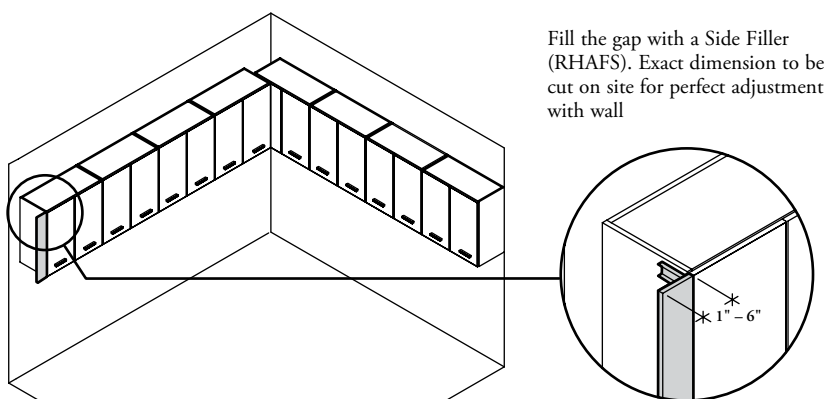

❗ Storage Cabinets are predrilled on the sides for a more stable assembly when installing two or more cabinets together

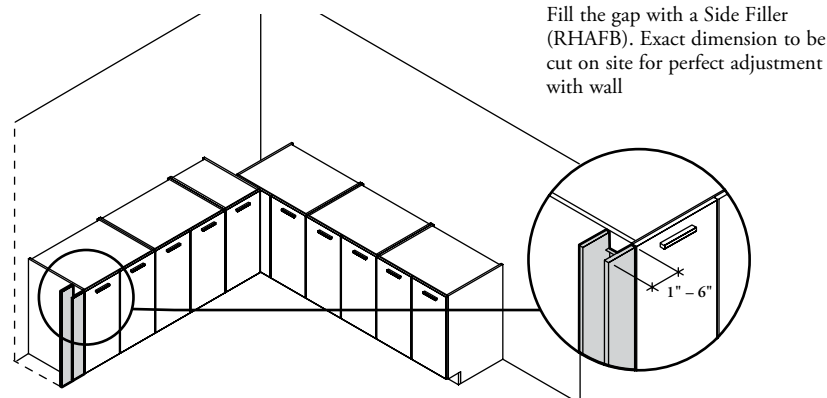

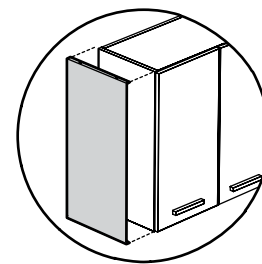

how to plan accessories

NOTE:

If the gap is more than 6", you can use a Metal or Laminate End Panel (RHAEP or RHALEP) to aesthetically cover the side of the cabinet and wall support

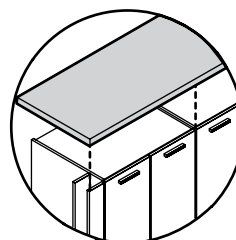

Fill the gap with a Side Filler (RHAFS). Exact dimension to be cut on site for perfect adjustment with wall

Fill the gap with a Side Filler (RHAFB). Exact dimension to be cut on site for perfect adjustment with wall

NOTE:

You must cover all Base Cabinets with Countertops

Backsplash

WHAT'S INCLUDED

1 backsplash and hardware.

WHAT'S EXCLUDED

Countertop and Sidesplash.

NOTES

Standard Backsplashes (S) provide good protection against water splash but Water Resistant (W) Backsplashes are more suitable for more intense water environments.

The Water Resistant option is not available with Flintwood finish.

Edge Trim Finish does not apply to Flintwood.

Do not use a Backsplash on the depth side of a countertop when it meets another Backsplash. Use a Sidesplash instead (see next page).

WHAT'S INCLUDED

Each set of cores include a lock & core and 2 identical keys.

NOTES

All storage furniture is shipped with the lock housing pre-installed in each unit ready to receive the required lock plug cores. Based on the product option, lock cores and keys are shipped either numbered randomly or in "keyed-alike" sets. Quantity of lock cores and keys will match the quantities required for the locking components on the order.

SPECIFICATION NOTES

Count the number of locking components in each workstation. Enter the number of locks into the Quantity column, and then assign a SET to each quantity.

Office Number	Quantity	Set #	Set Total
T1	4	SOKL - 4	1
T2	2	SOKL - 2	1
T3	4	SOKL - 4	1
T4	3	SOKL - 3	1

Total the number of SOKL (Sets of Keys Alike) quantities and transfer each total quantity to your Purchase Order.

Sets ordered in the incorrect quantities that are required for the order may result in the order being placed on hold.

Please verify the quantity by reviewing the plan carefully to ensure that all products with locks have been identified. Remember that some products may have more than one lock core per unit based on size and configuration.

For further details on how to specify locks, please see the Teknion Lock Specification Guide on our website.
